New direction.
New brand.
Renewed commitment.

Bermuda College is celebrating 45 years of providing education excellence and student success to our diverse community and meeting its global needs. We are also launching the College's new brand, reflecting our strategic direction for the future to provide **innovative education, quality instruction, and unparalleled student support**.

- Our timeless **new logo** incorporates and honours the legacy of our three antecedent institutions—the Bermuda Technical Institute; the Hotel & Catering College; and the Academic Sixth Form Centre.
- Our **new colours** reflect the vibrant tropical hues and refreshing tones that characterise the landscape of our Island home.
- And our **commitment** is renewed to deliver excellent opportunities and access to further education and career goals for students from all walks of life.

**Bermuda College. Many Paths. Discover Yours.**

Welcome to the 2019-2020 academic year at Bermuda College!

This is a milestone year for us as we celebrate our 45th anniversary. Imagine! Forty-five years of proudly helping Bermuda’s students fulfils higher education or career goals. We’re celebrating with a new look, a new strategic focus, and new partnerships to help you succeed! Every employee in every division and department at Bermuda College is committed to your success. We provide access, opportunities and options in a student-centred environment that provides quality instruction and support services, second to none.

Let me encourage you to be as committed as we are to your success. Attend and be prepared for every class. Utilise the free support services if you find you require a little extra academic help, or need moral support. Seek out and make new friends. Become acquainted with your instructors and professors. Join a Registered Student Organisation (RSO) or club… Immerse yourself in the Bermuda College experience and create wonderful memories that will last a lifetime!

Still not sure? So was I! But as a proud alumna of Bermuda College, I can personally attest to the solid academic foundation, and unique collegiate experience you will receive here as you embark upon this journey.

It’s an exciting time to be a student at Bermuda College, and we look forward to seeing you on campus as you become a part of the Bermuda College family!

Contact our Recruitment Officer at 239-4099 to take your next step and discover the many pathways that are open to you. Many pathways. Discover yours!

Sincerely,

Dr. Duranda Greene
President
Class of 1981
Bermuda College is accredited by the New England Commission of Higher Education (NECHE). Accreditation status is a testament to the College’s commitment and capacity to deliver a level of education to students that meet rigorous North American recognised quality standards that are subject to external review and verification. Beyond this, graduating from an accredited institution of higher education, like Bermuda College, affords students the opportunity to transfer course credits to another college or university without having to repeat them. Most employers prefer to hire job applicants with degrees or certificates from an accredited institution and also look to see that employees have been educated at an accredited institution when making decisions about promotions within the firm. Accreditation status is also often considered by employers who provide tuition assistance/reimbursement for those employees who desire or need to further their education.

American Culinary Federation
Bermuda College is accredited by the Commission of the American Culinary Federation Education Foundation to offer the Associate degree of Applied Science (Culinary Arts) and the Diploma in Culinary Arts.

VISION STATEMENT
Transforming lives through innovative education.

MISSION STATEMENT
Bermuda College is committed to providing the community with innovative programmes, training, support services and access to partnerships that lead to local and global success.

CORE VALUES
COMMITMENT TO STUDENTS
- Anticipate student needs
- Maintain viable programmes that transfer to university and/or equip students to be successful in the workplace
- Strive toward student satisfaction and retention
- Value and empathise with our students; and be aware of what it took for them to get to this point
- Involve alumni

Quality Teaching
- Stimulate students
- Create a vibrant, inclusive, educational environment
- Include creativity in the classroom
- Develop strategies to deal with various learning styles
- Add value to each student that comes to our College
- Demonstrate timeliness in record keeping

Commitment to Employees
- Provide professional development and clearly defined career tracks
- Provide adequate resources
- Value each employee’s job as a meaningful part of the whole
- Provide job security
- Promote balance between work and family commitments
- Develop health, wellness and social activities

Respect, Recognition and Being Valued
- Involve all stake-holders in decisions that affect their areas
- Allow employees to decide a course of action in their area of expertise
- Recognise employees for doing the right thing, and reward them accordingly
- Support co-workers and promote each other to students and the public

Commitment to High Standards
- Make a commitment to outstanding work and quality results
- Perform work that adds value and meets set goals
- Show pride in work
- Ensure that all areas function effectively and efficiently
- Monitor programmes, service and business structure to keep them current
- Apply standards consistently

Stability, Security and Safety
- Use public relations as a tool to market the institution
- Create a viable organisation
- Create a safe campus environment
- Create a progressively dynamic work environment
- Establish clear written procedures and job descriptions
- Provide training for employees on standard operating procedures
- Respect and allow freedom of speech
- Develop well-defined succession plans for each department

Responsibility and Accountability
- Demonstrate commitment to internal and external stakeholders
- Commit to fairness and equity
- Be committed to carrying out our jobs
- Hold each other accountable for maintaining our Core Values

American Culinary Federation
Bermuda College is accredited by the Commission of the American Culinary Federation Education Foundation to offer the Associate degree of Applied Science (Culinary Arts) and the Diploma in Culinary Arts.
APPLICATION PROCEDURE

To apply to Bermuda College, create an account and complete the online application [https://www.college.bm/index.php/admissions](https://www.college.bm/index.php/admissions). The application fee of $50 can be paid online [https://www.college.bm/payment/](https://www.college.bm/payment/) or submitted to Business Office, College Centre Building, 2nd Floor, 21 Stonington Avenue, Paget PG 04, Bermuda.

**Deadlines for Admission:**

<table>
<thead>
<tr>
<th>Semester</th>
<th>Standard</th>
<th>Late ($75 application fee)</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPRING SEMESTER</td>
<td>1 November*</td>
<td>2 November – 1 December*</td>
</tr>
<tr>
<td>FALL SEMESTER</td>
<td>1 June*</td>
<td>2 June – 1 August*</td>
</tr>
</tbody>
</table>

*Applications and complete documentation (see checklist below) must be submitted prior to the published deadlines; applications received after the deadline may be processed for the next available semester.

**IMPORTANT:** We cannot guarantee financial support for applicants who complete their file after the standard deadline.

**ADMISSIONS CHECKLIST**

1. Completed application form
2. Verification of Citizenship; Bermuda Passport with Registered Status, proof of Bermudian status or Entry Visa
3. Official transcripts and external examination results
4. Application fee of $50 (non-refundable)
5. Completed Medical Disclosure Form

The application for admission and any transcripts of credit become the property of Bermuda College and will not be returned or forwarded.

INTERNATIONAL STUDENTS

International students wishing to be admitted to Bermuda College, must apply to [https://www.college.bm/index.php/admissions](https://www.college.bm/index.php/admissions). The application fee of $100 must be paid online [https://www.college.bm/payment/](https://www.college.bm/payment/)

**INTERNATIONAL ADMISSIONS CHECKLIST**

1. Completed Application Form
2. Official transcripts and external examination results (translated in English)
4. Letter of recommendation from school official, employer or an otherwise suitable source letting us know why s/he thinks you would be a successful student.
6. Application fee of **US $100.00** payable to Bermuda College (non-refundable)
7. Department of Immigration Application fee (non-refundable), in a bank draft payable to the Accountant General
8. Completed Medical Disclosure Form

**NOTE:** International student Entry Permits will be issued only to persons who are pursuing a full-time course of study at Bermuda College. International students cannot seek employment off campus without immigration approval. **International students must apply on or before the standard deadline.**

Address the request to:

**Student Enrolment Registration and Records**

APPLICATION PROCEDURE

ADMISSIONS GUIDELINES
Students will be admitted* to the College if they have met one of the following:
- A high school graduate
- Earned an International Baccalaureate Diploma/Certificate.
- Earned a General Education Diploma (GED)
- Students under the age of 24 without a high school diploma or GED may be admitted based on the results of the Computerised Placement Test (CPT)*, ACT or SAT test. An official transcript of all previous academic work is required.
- Students 25 years of age or older without a high school diploma or GED may be admitted based on the results of the Computerised Placement Test (CPT)* or SAT test.

NOTE:
1. Students wishing to transfer overseas may be required to obtain a high school diploma or GED.
2. The CPT requirement may be waived if the student has a bachelor’s degree or has successfully completed a college level English or mathematics course with a grade of “C” or higher.
3. Students requiring special accommodations are required to submit test results and assessments to the Academic Resource Centre (see complete Policy on Students with Disabilities on pg. 130)

Students who knowingly and willfully misrepresent and/or omit required information on official Bermuda College submissions shall be subject to disqualification from admission.

Returning Students
Students previously enrolled at Bermuda College and who have not been in attendance for a minimum of two academic years are identified as returning students. These students must submit the following:
1. Completed application form
2. Official transcripts for studies outside Bermuda College since last enrolled, if applicable
3. Verification of Citizenship; Bermuda Passport with Registered Status, proof of Bermudian status or Entry Visa
4. Application fee of $50 (non-refundable)
5. Students who have been away from Bermuda College for two years or more may be eligible for the Fresh Start programme (see pg. 9)
6. Completed Medical Disclosure Form

Admission Notification
Bermuda College practices rolling admissions which means it reviews each application as it is submitted. Students will receive an admission decision within approximately four (4) weeks of receiving all the required documents. (see Admissions Checklist).

Students who are enrolled in high school at the time of admission to Bermuda College must submit final high school transcript to the Student Enrolment, Registration and Records (SERR) Office as soon as possible after graduation.

DUAL ENROLMENT
To be eligible for the Bermuda College Dual Enrolment Programme, in partnership with the Bermuda Ministry of Education, a student must:
1. Be enrolled in a Bermuda public senior school.
2. Have completed all of the academic requirements of S2 and be classified as an S3 student with a minimum of B grades in the chosen course of study and an overall GPA of 3.00.
3. Submit the Bermuda College Application with a senior school transcript.
4. Submit a recommendation letter from his/her school.
5. Sign an agreement to release student record information to their respective senior school, and for use by Bermuda College.
6. Be college ready based on appropriate sections of the College Placement Test (CPT)
7. Not have already received a senior school diploma or General Education Development (GED) diploma.

NOTE: Fulfilling the above requirements does not guarantee admission to the Dual Enrolment Programme.

Application Procedure

ASSESSMENT AND PLACEMENT WITH THE COMPUTERISED PLACEMENT TEST (CPT)

Student Assessment
Students are required to take the Computerised Placement Test (CPT). The CPT is used to assess entry-level skills in English, reading and mathematics. Although students can graduate from high school meeting minimum academic requirements, sometimes the courses taken in high school may not adequately prepare students to meet success in college-level courses. Students who have completed college-level English and mathematics at another tertiary institution with a minimum grade of “C” will not be required to take the CPT.

Course Placement Policy
Based on the result of the CPT, high school transcript, SAT, ACT and any other tests taken, students will, with the assistance of an advisor, select appropriate courses to start them on their path to success. Placement in preparatory courses may be required depending on a student’s scores and academic goals. Preparatory courses serve as prerequisites to college level courses. A grade of “C” or better must be attained in preparatory courses for admission to college-level courses.

ADVANCE PLACEMENT (AP) GUIDELINES
The Bermuda College will award Advance Placement (AP) credits to students who have passed the AP exams provided the following conditions are met:

- The College Board (the testing agency) approved the high school as an “Approved High School” and the specific course has been accepted by the agency.
- The student submits an official transcript of the AP results to the Student Enrolment Registration and Records office (SERR).
- The student receives a grade of 4 or above on the course exam.
- The AP course aligns with an equivalent course currently offered at Bermuda College.
- A maximum of five (5) courses may be awarded credit.

LIST OF AP COURSES APPROVED:
(This list will be updated as additional courses are evaluated and approved)

NOTE: Credit will be granted if the courses taken are deemed to be appropriate to the student’s academic programme.

INTERNATIONAL BACCALAUREATE (IB) GUIDELINES
The Bermuda College will award International Baccalaureate (IB) credits to students who have passed the IB exams provided the following conditions are met:

- The International Baccalaureate (the testing agency) approved the high school as an “Approved High School” and the specific course has been accepted by the IB as a Higher Level IB course.
- The student submits an official transcript of the Higher Level IB results to the Student Enrollment, Registration and Records Office (SERR).
- The student receives a grade of 5 or above on the Higher Level IB course exam.
- The Higher Level IB course aligns with an equivalent course currently offered at Bermuda College.
- A maximum of five (5) courses may be awarded credit.

COLLEGE LEVEL EXAMINATION PROGRAMME (CLEP) GUIDELINES
The Bermuda College will award college credit to students who meet the requirements of a class through CLEP examinations provided they are in good academic standing and are registered in a programme of study. The following conditions apply:

- The student submits an official transcript of the CLEP results to the Student Enrollment, Registration and Records Office (SERR).
- The student received a score of 50 or above on the course exam.
- The CLEP course aligns with an equivalent course currently offered at Bermuda College.
- A maximum of five (5) courses may be awarded credit.

ACADEMIC FRESH START POLICY

Bermuda College recognises that students who have previously enrolled at the institution may not have performed at a level that reflects their true academic ability. In recognition of this, the College has adopted an Academic Fresh Start policy which is offered to students who re-enrol at the institution to complete a programme of study after two (2) years’ absence.

Prior to applying for Academic Fresh Start, students should review the following terms and conditions:

- Students must apply for the Academic Fresh Start through the Student Enrolment, Registration and Records (SERR) Office at the commencement of re-admission but no later than the mid-term break of the first semester of re-enrolment. The student must be in good financial standing with Bermuda College when he/she applies for Academic Fresh Start.

- Prior to applying for Academic Fresh Start, students should meet with a counsellor to discuss his or her academic goals.

- Students must appear before a committee consisting of the Dean, the student’s counsellor and advisor to review first semester grades and the application form. This committee will approve or decline the application and forward the decision to the SERR Office.

- The original GPA will not be included in any subsequent computation of the new GPA. If the Academic Fresh Start option is approved, the student will receive credit for courses in line with the current transfer credit policy. Students must understand that all grades earned at Bermuda College will remain on the official transcript. Their transcripts will also be annotated such that it is clear that an Academic Fresh Start has been granted.

- An Academic Fresh Start will be granted only once and is not automatic or guaranteed. An Academic Fresh Start does not apply to any completed degree or certificate.

- An Academic Fresh Start is irreversible; once applied it cannot be reversed.

- Students granted Academic Fresh Start will fall under the Bermuda College Catalogue in effect at the time his or her Fresh Start was granted.

- Appeal Process: If students wish to appeal the decision of the committee, the appeal must be made in writing to the Vice President, Academic and Student Affairs, within 10 business days. This decision will be final.

NOTE: Academic Fresh Start Forms can be downloaded from www.college.bm

* FALL COMMENCEMENT EXERCISES IS CONTINGENT ON A MINIMUM OF 25 GRADUANDS.
ACADEMIC REGULATIONS

Bermuda College, like other institutions, has guidelines that govern operational procedures. There are several kinds of College guidelines - those that apply to academics, called Academic Regulations, and those that apply to conduct, called the Student Code of Conduct. This section outlines academic guidelines and provides valuable information about everything from determining your Grade Point Average (GPA) to getting a copy of your transcript.

It is important that you are familiar with these guidelines so that you know what is required of you and what you can expect of the College.

FULL-TIME STUDENT

A full-time student will ordinarily carry 12 or more credit hours in a Fall or Spring semester. Under certain circumstances, students may receive authorisation for a Reduced Course Load (RCL), which gives them permission to enroll in less than 12 credit hours and still maintain valid full-time status.

Acceptable Reasons for a Reduced Course Load:

- Illness or medical condition (up to 12 months with appropriate documentation)*
- Initial difficulty with English language (1st and 2nd semester) reflected in CPT scores:
  - Reading comprehension - 249 or lower
  - Writing - 2 or lower
- Initial difficulty with reading requirements (1st and 2nd semester) reflected in CPT scores:
  - Reading comprehension - 249 or lower
- Improper course level placement
- To complete course of study in current term
- Institutionally mandated course reduction
- Students with documented disabilities*

*Requests must be submitted to the attention of the Director of the Academic Resource Centre prior to the registration period. The credit threshold will be determined on a case-by-case basis according to student needs.

TRANSFER OF CREDIT FROM ANOTHER SCHOOL

Bermuda College will grant transfer credit for course work successfully completed at an accredited institution of higher education. When applying to receive credit for work completed at another institution, the following standards and guidelines will apply:

1. Official transcripts are required.
2. Credit is awarded for college level courses in which a grade of “C” or better (4.00 = A) is earned.
3. Coursework considered for transfer must have been completed within the last 7 years (4 years for subjects in IT).
4. A maximum of 50% of the credit hours required for graduation will be accepted.
5. Academic credits earned at institutions based on a unit of credit other than the one prescribed by Bermuda College are subject to conversion before being transferred.
6. Credit will not be granted for duplication of existing courses.
7. Coursework successfully completed at other colleges and universities recognised by NECHE or similar accrediting associations will be considered for transfer credit. Other colleges and universities will be evaluated on a case by case basis.
8. Students may obtain credit through the Challenge for Credit/Admission by Credit Policy. For alternative methods of earning credit, see Advanced Placement and International Baccalaureate Guidelines.

To apply for transfer credit:

1. To obtain a Transfer Credit Application, contact the Student Enrolment, Registration and Records (SERR) Office.
Challenge for Credit/Admission by Credit
Students who have previously acquired knowledge in areas closely related to courses offered at Bermuda College may apply to earn credit by means of course challenge, provided that they are in good academic standing and are registered in a full-time programme of study. The following conditions apply:

1. Within the first semester of attendance, written application providing evidence and grounds for the course challenge must be submitted for approval to the Division Dean;
2. If the application is successful, the Division will establish the most appropriate means of challenge (written, oral, laboratory or practical examinations, essays, or any combination thereof) as well as the time, place and condition of the challenge;
3. A course may be challenged only once by the applicant, and the applicant cannot previously have been enrolled in the course;
4. A grade of at least “C” must be obtained to earn credit, but no grade will be recorded in the academic record; the notation CR will be entered and the GPA is not affected (please note that some programmes may require a grade higher than “C” when used as a prerequisite);
5. A maximum of 15 credits may be earned by challenge;
6. The requisite fee must be paid.

NOTE: Admission by Credit is determined by the Division Dean and confirmed by the Registrar after official transcripts are reviewed.

Audit
Auditing a course means you attend the course and have the OPTION of completing assignments and writing the exams. An audited course is not given credit but is recorded on the transcript as “AU”. Within the normal time period for changing courses, a student may change a course from credit to audit status or vice versa. A student may register to audit a course if space is available.

Withdrawal from a Course
Students who wish to withdraw from a course must do so formally through his or her academic advisor or Division Dean before the date specified under the section headed Sessional Dates in this Bulletin.

The academic record will show a course status of “W”. This indicates Withdrawal without penalty. No grade point is assigned and the GPA is not affected.

Students withdrawing after the specified date, except for medical or other legitimate reasons acceptable to the Division Dean, are deemed to have failed. Petitions for such exception should be made to the Division Dean.

Students wishing to withdraw from a course in the Division of Professional and Career Education (PACE) must do so before the FOURTH scheduled class. After the fourth scheduled class there is no refund. A NON-REFUNDABLE fee of $75.00 will accompany all requests for withdrawal.

NOTE: Fees for courses with 21 hours or less of instruction are NON-REFUNDABLE.

Withdrawal from the College and Re-admission
Students withdrawing from all courses are deemed to have withdrawn from the College unless leave of absence has been granted. Students who do not return to the College within two years are deemed to have withdrawn from the College and an application for re-admission is required from students who wish to re-enrol. Re-admitted students are bound by the academic regulations current at the time of re-admission.

Leave of Absence
Students may apply for a leave of absence from studies for a period not exceeding one academic year in the first instance. Such application, detailing the circumstances, must be made in writing to the Registrar.

Attendance Regulations Policy
To obtain maximum benefit from each class, regular and punctual attendance is expected of all students. Lack of punctuality may result in students being deemed absent. Insufficient attendance may result in the application of sanctions. Attendance is monitored and reviewed. Students with insufficient attendance may be called for counselling at any time by the Division Dean or designate. Students with repeated attendance lapses subsequent to counselling by the Division Dean or designate may be suspended or required to withdraw from any course or programme at any time. In arriving at the decision, the Division Dean will entertain petitions or information submitted by students and will review all information pertinent to the attendance record. Students who have been suspended or required to withdraw from a course or programme on grounds of insufficient attendance may appeal to the Vice President, Academic and Student Affairs, whose decision shall be final.
Academic Regulations

Attendance guidelines for developmental and preparatory courses:
Students will be automatically withdrawn from a developmental or college preparatory course under the following conditions:

If students miss:
- Four 50 - minute classes
- Two 80 - minute classes
- Two evening classes

Distance Education Course Attendance Policy
Courses are presented in weekly units. The weekly attendance period begins on Monday at 12:00 am and ends on the following Sunday at 11:59 pm.

The specific requirements for online attendance are as follows:

- Any first-term student or any student seeking re-entry who does not register attendance within the first five (5) days online will be administratively withdrawn from the course.
- Students who have not participated in class by failing to log in for seven (7) consecutive days (excluding scheduled breaks) will be administratively withdrawn from the course.
- Students may appeal to their Dean/Director if they feel an error has been made in their attendance calculations.

Duration of Studies
Requirements for associate degree programmes must be completed within five years of initial registration.

Requirements for modular certificate programmes must be completed within five years of initial registration.

Requirements for all other certificate programmes must be completed at the rate of 15 academic credits per year from initial registration.

Students who are unable to complete the requirements for a programme within the stated time may apply for the grant of an extension. Such application, detailing the circumstances, must be made in writing to the Registrar. If an extension is granted, students will be subject to the academic regulations current at the time of the extension.

Programme Selections (Refer to pg. 31)

Associate of Arts Degree (AA)
The AA degree is designed to prepare students for entry into the junior (3rd) year of a four-year institution. The AA degree is a university parallel, college transfer degree comprised of at least sixty (60) college credits of which thirty-six (36) are general education credits.

Associate in Science Degree (AS)
The AS degree is designed to prepare students for entry into the junior (3rd) year of a four-year degree in the science disciplines. The AS degree is a university parallel, college transfer degree comprised of at least sixty (60) college credits of which thirty-six (36) are general education credits.

Associate of Applied Science Degree (AAS)
The AAS degree is designed to prepare students for immediate entry or advancement into employment requiring specialised skills. The degree consists of at least sixty (60) college credits of which at least twenty (20) credits must be general education. An AAS degree programme does not necessarily prepare an individual for entry into the junior (3rd) year of a four-year institution. The goal of an AAS is to earn a degree, which should lead to a productive career in a field requiring specialised training. Some AAS degrees may articulate into upper level programmes. If a decision is made at a later date to attend a university, additional course work may be required at the freshman or sophomore level.

Undeclared Programme (UND)
The undeclared programme is designated for students who have not selected a programme. After completion of 12 credits, a student must declare a programme; students must declare a programme in order to graduate.

Declaring a Programme
Students without a programme are strongly encouraged to explore their options through the Career & Counselling Centre in their first semester. All students intending to graduate from Bermuda College are required to select a programme before or upon completion of 12 credits. Registration holds will be placed on the record of undecided students who reach 12 credits. In order to have this hold removed and the registration process completed, undecided students are required to meet with a counsellor in the Career & Counselling Centre.
GRADING

Assessment and Grades
It is the policy of Bermuda College to provide continuous assessment of the student’s performance, rather than to rely on final examinations alone. Performance is assessed every half semester for each course separately, and grades are awarded on the following basis:

Unit of Credit
A credit hour is the unit of credit students earn at Bermuda College. It is based on the number of in-class (online or physical) contact hours per week for the duration of one semester. One credit hour generally corresponds with a session of instruction lasting for a minimum of 50 minutes. Please note that lab hours are calculated differently.

<table>
<thead>
<tr>
<th>Grade Symbol and Numerical Range</th>
<th>Grade Point</th>
<th>Description</th>

</tr>
<tr>
<td>F &lt;60%</td>
<td>0.00</td>
<td>FAIL Does not demonstrate the required minimal competence to achieve course completion.</td>
</tr>
</tbody>
</table>

Diploma Programmes
A diploma programme is designed to provide the graduate with skills and competencies for immediate employment in the particular occupational field, but to a higher-level training standard than attained in a certificate programme. Diploma programmes consist of courses that are part of an associate degree programme. Students in this programme may be able to transfer some of these credits into an associate degree programme at a later time depending on the programme of study. These programmes may be more appropriate for non-traditional students, who have two or more years of related work experience. The required years of experience will depend upon the programme or discipline.

Certificate Programmes
The certificate programme is designed to provide the graduate with the opportunity for immediate employment in a particular occupational field and not generally designed for transfer. The certificate documents that the student has attained job entry competence and is ready at an entry level employment standard. These programmes may be more appropriate for traditional students (between 17-24 years of age).

All certificate programmes will require at least one course in English and in mathematics at the certificate level, but may include more than one of each, depending upon the discipline and the student’s performance on the Computerised Placement Test (CPT). Any course may be challenged to obtain the credit required.

MAKING CHANGES TO YOUR PROGRAMME

Change of Programme
Students may seek to transfer to another equivalent programme by application to the programme’s Division office. If your application to change programmes is successful, you will be bound by the requirements stated in the catalogue for the academic year in which you make the change.

Adding and Dropping Courses
Admitted students may make changes in their class schedules by dropping or adding a course(s) during the official Add/Drop Period. The Add/Drop Period is the first five class days of each semester. All course changes are the responsibility of the student and filled on a first come, first served basis, space permitting.

(Refer to pg. 23 for Financial Penalty)
**GPA Calculations**
The grade point average (GPA) is computed by multiplying the point value of each grade earned by the number of credit hours of the course for which the grade is received, and then dividing by the total number of hours of work attempted.

- Only grades achieved for college level courses, courses numbered with 1000 and above, should be used to calculate a student’s programme GPA.
- The Financial Aid Office calculates a “financial” GPA which includes preparatory and college level course work completed in the semester.

Students can access grade reports by logging on to the student portal. Only final grades, grades issued at the completion of a module or at the end of the semester, are recorded on the student’s permanent record.

**Consolidated Grade**
The grade points are averaged after each assessment to produce a consolidated grade for each course.

**Semester Average**
Performance in each course can, at the end of a semester, be represented by a numerical value. The average of these numerical values for all active courses produces the semester average. This figure is of value in determining whether students are in good academic standing. *(see Academic Standing on pg.16)*

**Incomplete Work**
An Incomplete Grade (I) indicates that a student has not completed a major course assignment (usually a final exam or culminating final assessment) due to extraordinary circumstances, such as serious illness, death in the family, etc. The grade is applied only in those instances where the student has a reasonable chance of passing. It is not used to give an extension of time for a student delinquent in meeting course responsibilities.

The work must be completed by the student through formal arrangement with the faculty member no later than:

- The end of the third week in the Spring semester for a grade issued in the Fall semester,
- The end of the Fall registration period for a grade issued in the Spring semester,
- The end of the first week of classes in the Fall semester for a grade issued in the Summer session.

Should the student fail to complete the work within the designated period, the grade will automatically become an “F”. A grade of ‘I’ will not be included in the computation of the Grade Point Average.

**Grade Appeals**
Students wishing to appeal a grade awarded by the lecturer should first approach the lecturer. If the matter is not resolved at this level, the student may refer the matter to the Division Dean who can assign another lecturer to review the work submitted. The final decision on this matter rests with the Division Dean. Under no circumstances will grades be changed after two consecutive semesters.

**Grade Point Averages**
The grade point values of all final grades are weighted according to the number of credits assigned to the courses to which they refer. The weighted average of all courses at the programme level is the Grade Point Average (GPA). For students registered in a second or higher semester, two GPAs are recorded: the Semester Grade Point Average, which averages only the courses completed in the current semester, and the Cumulative Grade Point Average, which averages all the courses, whenever these may have been taken.

The following is a hypothetical example:

<table>
<thead>
<tr>
<th>GRADES</th>
<th>GRADE POINT VALUE</th>
<th>ATTEMPTED HOURS</th>
<th>GRADE POINT HOURS</th>
</tr>
</thead>
<tbody>
<tr>
<td>C+</td>
<td>2.33</td>
<td>x 3</td>
<td>= 6.99</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
<td>x 3</td>
<td>= 3.0</td>
</tr>
<tr>
<td>A</td>
<td>4.0</td>
<td>x 4</td>
<td>= 16.0</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
<td>x 3</td>
<td>= 0.0</td>
</tr>
<tr>
<td>B-</td>
<td>2.67</td>
<td>x 3</td>
<td>= 8.01</td>
</tr>
</tbody>
</table>

Total: 34.0 grade points 16 attempted hours = 2.125 GPA.
ACADEMIC INTEGRITY

Plagiarism and Cheating
Plagiarism is the act of presenting another’s ideas or words as one’s own. This may include, but not be limited to, the use by paraphrase or direct quotation of the published or unpublished work of another person without full and clear acknowledgement and the unacknowledged use of materials prepared by another person or agency engaged in the sale of term papers or other academic materials.

Cheating may include, but not be limited to, the intentional falsification or fabrication of any academic activity, unauthorised copying of another person’s work, copying an exam or use of prohibited devices or materials during exams.

Any person who plagiarises, cheats, or who aids or abets an act of plagiarism or cheating will be penalised. These are serious academic offences. Depending upon the offence, penalties may range from re-assignment and re-submission of work to expulsion from the College.

ACADEMIC STANDING

Bermuda College (BC) requires that all students achieve Satisfactory Academic Progress (SAP) by maintaining a minimum cumulative grade point average (GPA) of 2.00. The academic standing of each student is assessed at the end of each semester/session of enrolment. This policy applies to all credit students at BC regardless of his/her programme (associate, diploma, certificate, or undeclared). Students in specific programmes, and students receiving financial aid, must also meet the specific academic requirements that determine continuation for these programmes. Students who have attempted at least 12 (cumulative) credit hours and fail to achieve SAP will be placed on academic probation.

Academic Warning
Students will receive an academic warning when they have attempted 11 credit hours or less at BC and have failed to achieve SAP (minimum cumulative GPA of 2.00). These students will be notified of the following via the College communication systems:

- Students must achieve the minimum SAP standard by the end of the warning period.
- Students who do not meet the minimum SAP standard will have a status of Academic Probation.

ACADEMIC PROBATION

Students are placed on Academic Probation when they have attempted at least 12 credit hours at BC and have failed to meet the minimum SAP standard. As a part of the assessment process the Probation Committee reviews the student’s contact history with his/her academic advisor/counsellor for relevant information and can exercise discretion with respect to the application of this policy. When the assessment results in academic probation, the student will be notified of his/her probation status via the College communication systems.

Students on Academic Probation are required:

- To meet with an academic advisor/counsellor prior to the financial penalty deadline of the semester/session during which the probation status has been applied. A registration hold will be placed on his/her account until s/he has met with an academic advisor/counsellor.
- To complete a Contract for Improved Academic Performance (located on the student portal/college website) in collaboration with the academic advisor/counsellor. It should detail his/her academic goals for the semester, identify potential challenges as well as possible resources to address potential challenges. The plan may also include limitations on enrolment and other mandated forms of academic assistance such as academic support via the Academic Resource Centre (ARC).
- To achieve a minimum semester GPA of 2.00 for each semester going forward. Failure to achieve SAP in the subsequent Fall or Spring semester will result in being Required to Withdraw. Academic Probation is removed when the minimum SAP standard is met.

Required to Withdraw
A student on Academic Probation who does not achieve a minimum semester GPA of 2.00 in the subsequent Fall or Spring semester will be required to withdraw. S/he is not permitted to enrol in credit classes at BC for one subsequent Fall or Spring semester upon suspension from the College.

Petitions
Students should note that the regulations governing academic standing are designed to ensure that the standards of the College are maintained at a level appropriate to each of its programmes and that the regulations are applied equitably to all students.
A student who believes s/he has an extenuating set of circumstances may petition the withdrawal using the Petition Probation Status form (located on the student portal/college website) to his/her Dean without waiting one semester. Extenuating circumstances may include, but are not limited to:
- Serious Illness
- Unexpected Economic Hardship
- Death in the Family

Acceptance of a student’s petition is not automatically guaranteed and may in fact be denied if the Dean determines insufficient grounds to lift the Academic Probation status.

**Appeals**
In any case where students are required to withdraw, they may complete and submit the Required to Withdraw Appeal form (located on the student portal/college website) which will be reviewed and processed by the Vice-President, Academic & Student Affairs, whose decision shall be final.

**Return from Required to Withdraw**
Students may request a return to active status after being required to withdraw following one semester (Fall or Spring) of non-attendance at the College. As a condition of return, students must meet with an academic advisor/counsellor prior to initiating registration and follow these guidelines:
- Enrolment limit of 9 total credits for the return semester
- Participate in at least two meetings with an academic advisor/counsellor or designate from the Academic Resource Centre for the provision of academic support within the semester of return:
  - Initial meeting to complete an assessment: course planning and resource needs
  - Mid-semester check-in
  - Additional meetings/workshops/mandated resource use as necessary

Additionally, students returning from being required to withdraw will be placed on Academic Probation and will be expected to maintain a semester GPA of 2.00 or higher for subsequent semesters/sessions.

**Course Repeat Policy**
Students at Bermuda College will be permitted to repeat a course, which they have failed, or to earn a higher grade, once*. The Dean of the respective Division, may grant special permission for a third attempt upon the student submitting a petition articulating extenuating circumstances or other compelling rationale and a plan for successfully completing the course. It is strongly recommended that students seek academic advice before deciding to repeat any course.

Only the highest grade earned will be used in calculating the grade point average and credit may be earned only once for a particular course. For purposes of this policy, courses for which a student has not received a final grade (e.g. “W” or “I”) are not considered repeats and will not be included in the course repeat count. Students may not apply the course repeat policy to courses once they have graduated.

*Dual Enrolment students, who fail or wish to earn a higher grade, should consult the Director of the Academic Resource Centre as permission must be granted by the Ministry of Education.

**EXAMINATIONS**
An examination shall be held for each course upon its conclusion under authority of the Registrar. Students who fail to write the final exam are deemed to have not completed the course and therefore will receive a grade of “F”; as such, it is the student’s responsibility to report exam conflicts. Exam conflicts must be reported to the Registrar before the end of mid-semester break.

The minimum weighting for final exams shall be 30% of the total grade. The examination shall be sat at such time and place as shall be determined by the Registrar and published on official notice boards. A current Bermuda College ID card will be required in order for students to sit a final exam.

**Early Exit Exam Policies**
1. Complete early exit examination application.
2. Submit completed application to respective Division under which the course resides.
3. The examination cannot be written later than the first day of classes after the mid-semester break.
4. Division will contact student with necessary exam details.
5. Lecturers will submit grade to Division Dean.
6. Division Dean will forward grade to SERR.
The following conditions pertain to this examination process:

- Student must be officially registered in the course.
- There is no refund given for the course.
- An early examination for a course can be written only once during a semester.
- Once the examination is written, the grade is final, and the student does not have the option of remaining in the course.
- If the application is successful, the Division Dean and lecturer will establish the most appropriate means of examination (written, oral, lab or practical examinations, essays or any combination thereof) and will notify the student.

The grade will be calculated in the student's GPA.

Deferred Examinations
Students may be allowed to take an examination at other than the scheduled time if one of the following reasons applies:

- Incapacity due to illness or accident;
- Death in the immediate family;
- Absence in the public interest.

Application, with supporting documents, must be made to the Registrar
If the application is approved, an “I” will be assigned under the conditions set out under Incomplete Work.

Examination Grades
Examination Grades are awarded on the same scale as those under Assessments and Grades. (see pg. 14)

Re-sit Examinations
The Division Dean, upon petition in writing by a lecturer or student, may grant permission to a student who is in good academic standing to re-sit a final examination in a course for which a student has:

- Successfully completed/passed the course work;
- Attempted and failed in the final examination.

When it is in the Division Dean's judgment, in consultation with the lecturer, that the student’s performance has been affected by illness or other adverse influence, the student will be formally notified.

The result of a Re-sit Examination supersedes the original examination grade and is considered with the Consolidated Grade to provide the Final Grade.

ACADEMIC RECORDS
A student's academic record is released by the Bermuda College Registrar only upon written request from the student or other persons authorised by the student. Exceptions may be made in response to a subpoena, court order, or as indicated during the admissions process.

Transcripts of Academic Records
Official transcripts of academic records may be requested online through https://www.college.bm/index.php/alumni. Official transcripts will not be issued for students who have a financial obligation or other outstanding commitment to Bermuda College until the obligation is cleared.

Transcripts from other institutions submitted to Bermuda College become property of Bermuda College and cannot be reproduced or mailed to other institutions, agencies or individuals as an unofficial or official transcript.

Report of Grades
After each assessment, the student may access grades via the Bermuda College portal.

The following notations may appear:

- CR (Credit Granted);
- EX (Exemption but no credit granted);
- P (Pass)
- NP (No Pass)
- TR (Transfer Credit Granted)
- W (Withdrawal without Penalty);
- RW (Required Withdrawal).

The Report of Grades on the Bermuda College portal is unofficial, and may not be used as an official transcript of the student's academic record.

ACADEMIC RECORDS POLICY
For those applicants who become students, copies of applications for admission, along with related information, are kept in the Student Enrollment, Registration and Records (SERR) Office for a period of five years after the student has left and/or graduated from the College. Pertinent admission information and all college courses taken and/or registered for are maintained in the student records database indefinitely.
PRESIDENT’S/VICE PRESIDENT’S LIST
In order to be named to the President’s or Vice President’s list, a student must be admitted and enrolled in an associate degree, certificate, or diploma programme. The student must have completed during his or her first year of study at least 24 credits of the programme with a cumulative GPA of 3.50 - 4.00 for the President’s List or 3.00 - 3.49 for the Vice President’s List.

GRADUATION
1. Graduation is not automatic. Students must submit an Application for Graduation to the Registrar in anticipation of graduating from a programme of study in the ensuing commencement. This application, along with a non-refundable graduation fee ($90.00), must be submitted by the date indicated in the Sessional Dates in the year in which they expect to graduate. This application ensures that the applicant’s academic record will be reviewed by the Division responsible for the programme of study to determine that all requirements have been completed.

2. To graduate, students must:
   a) Follow the catalogue in effect when s/he enrolled in a programme of study. If a student changes their programme of study, he/she will be required to follow the catalogue for the year in which one made the change. If programme requirements change during a student’s course of study then s/he may opt to complete the new requirements.
   b) Students who have returned to the College after two or more academic years of absence must follow the programme requirements at the time of re-admission to the College.
   c) Notify the Registrar if completing requirements at another institution.
   d) Submit official transcripts from other institutions to the Admissions Office for transfer of credit.
   e) Successfully complete each of the requirements described under the Programme Requirements for the particular associate degree, certificate, or diploma programme;
   f) Obtain a final programme GPA of at least 2.00;
   g) Graduation requirements in professional programmes (such as Nursing) will be determined by the course requirements stated in the catalogue under which the student was officially admitted into the professional programme of study.
   h) Discharge all financial obligations to the College.
   i) Discharge all library obligations to the College.

3. Students are responsible for ensuring that they meet all academic requirements to graduate from a programme of the College.
   a) The List of Graduates, comprising the names of all students determined to have successfully completed all requirements of a programme, will be posted by the Registrar on official College notice boards at the date listed in the Sessional Dates and will be presented by the Registrar for approval by Council.
   b) The Commencement ceremony signifies the successful fulfilment by students of the College’s requirements and standards. Students have not complied with all requirements of a programme of the College until they have been conferred with an associate degree, certificate or diploma from the College at Commencement.
   c) Conferring of degrees is held each year in May and January (pending sufficient numbers). Students completing programme requirements as under Section 2 above thereafter will normally apply to graduate at the ensuing Commencement. In the interim, students may secure a statement from the Registrar testifying to their completion of requirements and their having filed an Application for Graduation.
   d) Students may elect to graduate in absentia, provided that they have notified the Registrar in writing not later than two days after the Registrar has posted the List of Graduates that they will not be participating in Commencement.

4. Students graduating with a Programme GPA in the range of 3.00 to 3.49 will be designated as having Graduated with Merit. Those with a Programme GPA of 3.50 or greater will be designated as having Graduated with Distinction. These designations will appear on the official signed and embossed associate degrees and certificates of the College.

5. Late applications for graduation will be accepted up to 48 hours after the graduation list has been posted. Applications submitted and/or accepted after that time will be confirmed for graduation at a meeting of Academic Council. Those persons will be included on the next graduation list and their academic transcript will show that their degree will be conferred at the following Commencement.
AWARDING MULTIPLE DEGREES
A student who already holds a Bermuda College degree may earn additional degrees in a different programme. The student will be required to meet all the programme requirements and earn at least 24 credits under the new programme.

NOTE: Completion of the requirements of an additional degree does not automatically constitute conferral of such degree, students must submit an Application to Graduate.

GENERAL REGULATIONS
Students will be expected to follow the rules and regulations set forth in the Student Code of Conduct. The Student Code of Conduct is available on the Bermuda College website www.college.bm, or from the Counselling & Career Centre.

MINOR STUDENTS AND PARENTS/GUARDIANS AT BERMUDA COLLEGE
Students under the age of 18 who are enrolled in courses with Bermuda College are classified as minor students. This includes those students formally enrolled in the Dual Enrolment programme. When a minor student registers for courses or accepts admission into a programme of study at Bermuda College he or she elects to enter an environment designed for adult learners.

Minor Student Responsibilities
- Dual enrolment students should work with the Dual Enrolment Coordinator to develop an approved course plan to support registration for classes. All other minor students should work with his or her academic advisor, their Division Dean, or a representative from SERR for this purpose.
- Minor students shall conform to the College’s Academic Rules and Regulations and the Code of Conduct expected of all College students.
- Minor students are responsible for reviewing and abiding by all academic policies as listed in Bermuda College Catalogue, Student Handbook, all other College publications, and the College website.

PARENT/GUARDIAN INFORMATION
Minor students are treated like every other Bermuda College student. This includes the application of privacy with respect to his/her student record. Please note that academic information is only released with the written consent of the student.

The college environment is designed for adult learners and as such:
- Your son/daughter will be exposed to a diverse population in education programmes which may also involve sensitive topics that might be considered controversial or offensive to some.
- College-level course work is much more rigorous and much less guided than secondary education course work.
- Instructors cannot discuss students’ attendance, grades or progress with parents over the phone and/or in person without written consent of the student.
- Parents will not be included in the initial meetings held by faculty and/or a counselor with a student.
- Instructors will not inform parents when classes are cancelled at the last minute or when class ends prior to the scheduled time.
- In the case of grade appeal, students must adhere to the general policy published in Bermuda College Catalogue and/or Student Handbook.

LABORATORY FEES
Some courses with labs at Bermuda College have lab fees attached to them. (Please refer to pg. 23 for details.)

I.T. HELPDESK SUPPORT
GET CONNECTED
- BC username & password – This will be received when your registration is complete. Please refer to your acceptance letter for the format. You will be prompted to change your password the first time you login. 
  NOTE: Login to your email FIRST to change your password. Your username and password is required when accessing ALL BC network services (noted below).
- Email - All students are assigned a BC email address (username@college.bm). Once you are registered you MUST use this e-mail address for ALL BC correspondence, particularly with your lecturers.
- Printing – The student colour printer is PR-G328 directly across from the IT Helpdesk. There are also printers (B/W) in the computer lab. Printing is also available via https://print.college.bm. Just login with your username and password. The print quota is 100 pages per month.
- Moodle – The majority of your classes will be offered through the Learning Management System (LMS) Moodle. Your lecturer will provide you with all information relating to your class in Moodle. Moodle is available 24/7. Additional campus guidelines and useful information, technical tutorials, etc. are also available in Moodle. Consider Moodle your one-stop-shop.
Academic Regulations

- **Wireless access** – To access the BC wireless network you must authenticate with your username and password on any device – i.e. phone, tablet, laptop, computer lab, etc.

**Computer Lab Locations**
North Hall (G): G305, G306, G307, G223, G323
Mac Lab: G206
Tech Hall (T): T224 & T226
Brock Hall (B): B266 (Open lab)
The College Library – there are several workstations available for use

**Laptop Policy**
- Laptops are available only to BC registered students for $250 per semester. *(see pg. 23 for fees)*
- Students can also apply for a laptop through the Career & Counselling Centre (CCC) based on need.
- Technical support is NOT provided for personal devices.

**IT Policies & Guidelines**
- All users of BC computers facilities and information must comply with the BC Information Technology policies.
- These policies protect BC’s computer systems, networks, data and other information resources.
- It is the responsibility of students and employees of Bermuda College to familiarise themselves with the IT policies and procedures.
- The IT policies are located on the BC website *(www.college.bm)* and in Moodle *(https://moodle.college.bm)*.

**IT Help and Support**
- The IT Helpdesk is located in North Hall (G328) on the third floor.
- To create a ticket for support login to *(https://helpdesk.college.bm)*
- Helpdesk support is also available via telephone, email or in person.
- The Helpdesk is the central point of contact for campus computing.

**Contact Information:**
- Telephone: (441) 239-4357 *(help)*
- Email: support@college.bm

**Hours of Operation:**
- Monday-Friday 8:30am-7:30pm
- Friday 8:30am-5:30pm
- Closed Weekends

**NOTE:** Hours of operations are reduced during semester breaks.

**STUDENT EMPLOYMENT**
- Student employment is available and encouraged at the IT Helpdesk.
- Key skills are developed at the Helpdesk that can be beneficial for future employment.
- Students are allowed to work 20 hours per week when classes are in and more during breaks depending upon need.
- All applications must go through the Career & Counselling Centre (CCC)
TUITION AND FEES

PAYMENT INFORMATION

- All tuition is payable in advance. Students whose accounts are in arrears for any reason, will be denied grade reports, transcripts, personal recommendations, withdrawal in good standing, permission to register for further courses and the right to graduate, until all obligations have been settled.
- If your fees change for any reason after your initial payment is made (i.e. lab fees, change in schedule, etc.), it is the student’s responsibility to ensure prompt payment of the balance.
- All statements are available through the Student Portal. Students can login using their user ID and password. The online bill reflects the student’s current registration and billing information. The statement system is ‘live’ and students can verify that all fees are satisfied before the payment deadline.

PAYMENT METHODS

- **Bermuda College Online Payments** (using credit cards) (American Express not accepted)
  - On the College website (https://www.college.bm), under Quicklinks.
  - On the portal (https://campus.college.bm), under My Account
  - On the College App

- **Local Banks Bill Payments** through (HSBC, Butterfield Bank and Clarien Bank).

- **Business Office Front Desk**, College Centre 2nd floor.
  - All major credit cards are accepted. *(American Express not accepted)*
  - Cheques should be made payable in Bermuda or US funds to Bermuda College.

Tuition and Lab Fees

PAYMENT AGREEMENTS
Payment agreements are available to Bermuda College students. Please visit or email the Business Office for details: b-services@college.bm

FINANCIAL AID
Bermuda College Financial Aid (BCFA) is a financial needs-based programme that provides support for enrolment during the Fall and Spring semesters. A successful applicant may receive up to 80% of his/her educational costs (tuition and lab fees).

APPLICANTS MUST:
1. Hold Bermuda Status (“Citizen” in CampusNexus the College Database)
2. Be enrolled in a programme of study offered by the Division of Arts & Science, the Division of Business, Hospitality & Technical Education, or the Division of Nursing & Allied Health
3. Be registered for a minimum of six (6) credit hours
4. Have a minimum semester GPA of 2.00 (current students)

NOTE: Textbooks and other instructional supplies and materials are to be paid separately.

MISCELLANEOUS FEES (non-refundable)
- Application fee $50.00*
- International application fee $100.00
- Late application fee $75.00
- Graduation fee $90.00
- Laptop rental fee $250.00
- Admissions deposit fee $200.00

* The application fee is valid for two academic years (four semesters) only, student must reapply after two years.

COURSE AUDIT FEES
50% of full cost per credit course

LATE REGISTRATION FEES
Applied after last day of registration as follows:
1 COURSE $100.00
2 COURSES $150.00
3+ COURSES $200.00

LATE PAYMENT FEE
A late payment fee of $100 applies to all outstanding balances after the agreed payment deadline dates. Holds will be applied after deadlines have passed.

TRANSCRIPT FEES
https://www.college.bm/index.php/alumni/transcripts
- ELECTRONIC FEES $15.00 (Free transcript with graduation packet)
- MAILED
  - (inside USA) $17.50
  - (outside USA) $20.00
- PICK UP $25.00
- COURIER FEES* $40.00 (inside USA) $62.50 (outside USA)
  *(Courier option available only online.)

I.D. REPLACEMENT LOST/Stolen
In the event that one’s ID Card is lost or damaged as a result of personal neglect, the following fees shall apply for replacement of the card:

- ID REPLACEMENT $10.00 (Student without Access Function)
- LOST/Stolen $15.00 (Student with Access Function)
- $20.00 (Faculty & Staff Without Access Function)
- $25.00 (Faculty & Staff With Access Function)

Any ID card that may require replacement as a result of normal wear and tear will be replaced at no cost to the bearer. NOTE: The Security Office will be the sole judge of ‘normal’.

* The application fee is valid for two academic years (four semesters) only, student must reapply after two years.
Tuition

DROPPING, WITHDRAWAL & REFUND POLICY
Students are responsible for any fees incurred. Dropping or withdrawing from a class(es) is not an automatic process. It is the student’s responsibility to officially drop the classes he/she is not attending or no longer wishes to be enrolled. Unwanted classes should be dropped as early as possible before the start of the term in order to receive a full refund and release seats for students on the wait lists. The Drop and Withdrawal Form must be submitted to Student Enrolment Registration and Records (SERR).

WITHDRAWALS & REFUNDS
FULL REFUND prior to the first day of class for each semester.

PARTIAL TUITION REFUND of 30% on or before the financial penalty date.

NO REFUND after the tenth day of class for each semester.

Students are responsible for fees if courses are dropped after the financial penalty date.

NOTE: Non-attendance of class does not constitute an official withdrawal.

OTHER
Students will be charged for damages occurring to Bermuda College property.

As a member of the Bermuda Credit Association (BCA), all overdue accounts are referred to the BCA. The student will agree to pay all agency charges, legal costs and other expenses incurred by Bermuda College in attempting to recover overdue amounts.

BERMUDIAN STUDENTS

TUITION SCHEDULE (per semester): The tuition total is based on the number of credits to which students are registered. Most courses are 3 credits, however, there are some exceptions, e.g.: CSC, PED and lab courses.

The below fees also apply to non-Bermudians who have resided in Bermuda for at least 5 consecutive years.

Bermuda College Instructional Formats

Bermuda College subscribes to the notion that not all learning does or needs to occur within a brick-and-mortar classroom environment. Bermuda College affords students flexible approaches to course completion including the use of twenty-first century technologies via the Internet and e-learning adaptive learning support. Students who enrol in courses at Bermuda College can expect course formats to be offered using a variety of methodologies and instructional delivery approaches. Bermuda College acknowledges as well that students process information in a variety of ways and that they should expect varied learning modalities to be addressed via course delivery methodologies utilised by faculty in teaching their respective courses. Therefore, instructional approaches that address students’ auditory, tactile/kinesthetic, sensory, and visual modalities are emphasised in the delivery of course content. Course descriptions listed within the College Catalogue and Course Schedule indicate the instructional delivery approach(es) that will be utilised in the course.

FACE TO FACE INSTRUCTION
Traditional face-to-face classroom time is the dominant form of instruction. Some course content is accessible online. A course management system may serve as a repository for accessing online course content.

BLENDED/HYBRID INSTRUCTION
These are face-to-face class formats with more online instruction substituting traditional lecture time. Faculty will designate face-to-face lecture hours and online instructional time periods to be specified in the course syllabus. A notation blended/hybrid will be listed under the lecturer’s name.

DISTANCE INSTRUCTION
Most of the instructional content is delivered online. Such courses have the designation D (Distance) in their section code. Face-to-face campus meetings may vary from three per semester to zero for fully online formats. Fully online course formats will conduct a traditional face-to-face Final Exam to be held on campus upon completion of the course content.
Associate Degree Programmes provide the first two years of College that can be transferred to overseas universities or used to go directly into the workforce.

**GENERAL EDUCATION COMPONENTS:**

**Humanities**
- Art and Design
- Art History
- Education
- Film
- History
- Music
- Philosophy
- Spanish
- Religious Studies
- English Literature at 2000-level (excluding ENG 2212)

**Social Sciences**
- Economics
- Political Science
- Sociology
- Psychology
- Social Work
- Earth & Environmental Studies at 2000-level

**Natural Sciences**
- Biology
- Chemistry
- Earth & Environmental Studies
- Physics

**NOTE:** The following are the suggested pathways for completing the programmes in two years; the actual time to completion may vary according to the student’s individual needs.
PROGRAMME OVERVIEW

The Associate of Arts (Art and Design) is structured to provide students with the foundation for careers in Fine Arts and Graphic Design, while keeping pace with current career trends. Without limiting students to the traditional components, such as drawing and painting, the programme includes courses in colour, graphic design, and media arts. Traditional courses, such as Introduction to Drawing and Two- and Three-Dimensional Design, now include computer components.

## PROGRAMME OVERVIEW

In the academic world, Arts refer mainly to the disciplines of Humanities and Social Sciences.

In the first year of Bermuda College’s Associate of Arts programme, students are given the opportunity to explore courses in the arts disciplines, as well as the science disciplines of mathematics and the natural sciences. In the programme’s second year, students choose a subject of concentration from among the Arts disciplines.

The Associate of Arts provides the foundation for careers in teaching, psychology, law, and writing, to name a few.

Students choosing this option will be able to transfer to universities abroad to further their studies in the arts as well as specialised non-arts degrees, such as Georgia State University’s articulated Bachelor of Business Administration degree.

### PROGRAMME OVERVIEW

The Associate of Arts and Science exposes students to many disciplines which provide the foundation for a well-rounded education. It is ideal for those students who are uncertain about their career path. It is also suited to those students who are looking for a broad-based liberal arts education.

In this programme, students do not concentrate on one subject. Rather, they take a variety of courses in the Humanities, Social Sciences, mathematics and Sciences. Students choosing this option will be able to transfer to colleges or universities abroad to further their studies in Arts and Science as well as specialised non-arts degrees, such as Georgia State University’s articulated Bachelor of Business Administration degree.

PROGRAMME OVERVIEW

This two-year programme prepares students for transfer into a Bachelor of Business Administration (BBA) degree, which may be obtained either locally or overseas. It provides the foundation for a variety of interests in the fields of business administration, including accounting, banking, economics, finance, insurance, international business, human resources, marketing, and management. The majority of the classes are in the business field, but these are supplemented with liberal arts courses which will provide students with a well-rounded education as well as meet transferability requirements to BBA programmes. This programme, offered through the Division of Business Administration, Hospitality and Technical Education, can start students on their way to becoming key players in Bermuda’s thriving business environment!

The following mathematics course selections are recommended for students transferring to:

**Mount Saint Vincent University:**
- 2 MAT Courses required in the first two years BBA
- MAT 1105 College Algebra or MAT 1131 Finite Mathematics or MAT 1152 Calculus I
- MAT 2233 Statistics I

**Georgia State University:**
- 2 MAT courses required in the first two years of BBA: Risk Management and Accounting
- MAT 1132 Business Calculus (requires at BC MAT 1131 as pre-req.)
- or MAT 1152 Calculus I (or higher), MAT 2233 Statistics I

**Georgia State University:**
- 2 MAT courses required in the first two years of BBA: Accounting
- MAT 1105 College Algebra (or higher)
- MAT 2233 Statistics I

TOTAL CREDITS: 61-66
PROGRAMME OVERVIEW

This programme is designed for those students who wish to pursue a career in Early Childhood Education, in addition to teaching as a paraprofessional. Students graduating with an Associate of Arts (Early Childhood Education) may transfer to a university abroad to pursue a baccalaureate degree in Early Childhood Education.

As the programme includes opportunities for observations in private and public educational settings, students must submit the following:

- SCARS Certification
- Police Record Check
- Proof of Health Insurance
- Completed Medical Form
- Completed Ministry of Education Staff in Confidence Form

**Application deadline for EDU2265 is at the Second Semester break for Fall Semester and First Semester break for Spring Semester.

(For a list of Humanities and Natural Science options, see page 31.)
PROGRAMME OVERVIEW

Actuarial science, in the insurance and re-insurance industries, is the practice of using statistical information to determine rates and rating methods, and evaluating insurance company reserves. Actuaries, particularly Bermudian actuaries, are very much in demand in Bermuda’s insurance and reinsurance industries.

Bermuda College, with the support of Chubb and the Chubb Foundation, has developed this programme for students wishing to enter the actuarial field. The programme provides a solid foundation for further study abroad in preparation for the rigorous series of examinations that lead to membership in the profession. The programme has a strong mathematical base, and includes an introductory course in Actuarial Science.

Students wishing to complete this degree in two years should expect to take MAT 1105/MAT 1141 during the Summer prior to their freshman year.

Since the requirements of four-year institutions vary widely, it is essential that the programme outlined in the catalogue of the student’s college of choice, be followed as closely as possible.

CURRICULUM

YEAR 1
First Semester – 16 credits
CIS 1125 Introduction to Computers and Information Technology 3
CSC 1110 Learning Strategies for Student Success 1
ECO 1101 Principles of Microeconomics 3
ENG 1111 Freshman Composition 3

MAT 2234 Statistics II 3

*Before one can be enrolled in any course one must satisfy the prerequisites.
†CIS 1125 cannot be used to fulfill this requirement.

(For a list of Humanities options, see page 31.)
**PROGRAMME OVERVIEW**

Computer technology is updated and improved upon on a daily, even hourly, basis in the 21st century. Bermuda College’s Associate of Science (Computer Information Systems) is reviewed regularly to incorporate the changes and updates in the technology field. IT specialisation and e-commerce courses have been added to the core curriculum. Further, the programme’s curriculum equips students with the same level of competency as demonstrated by the internationally recognised certifications of A+, Network+, iNet+, CCNA, GIAC/GSEC, MCP and MOUS.

The foundation of the programme is the study of computer applications in the business environment. It also includes a mandatory internship between the first and second years of study, providing hands-on experience in local and international companies.

PROGRAMME OVERVIEW

This programme is intended for students wishing to pursue a baccalaureate degree in elementary, middle or senior-level education at a recognised teacher education institution.

The programme features a common liberal arts core that spans the humanities, mathematics, social sciences, and natural sciences disciplines. In the second year of the programme, the core courses are supplemented with courses in the foundations of education, in human growth and development, and in the application of psychological principles to the teaching profession. In addition through the twelve elective credits, students intending to teach at the senior level are able to complete a concentration in one of the disciplines noted above.

As the programme includes opportunities for observations in private and public educational settings, students must submit the following:

- SCARS Certification
- Police Record Check
- Proof of Health Insurance
- Completed Medical Form
- Completed Ministry of Education Staff in Confidence Form

TOTAL CREDITS: 61-63

*Before one can be enrolled in any course one must satisfy the prerequisites.
**Students intending to teach at the elementary school level are recommended to take Music 1103

(For a list of Natural Science options, see page 31.)
PROGRAMME OVERVIEW

The Sciences – which include the natural sciences of biology, earth and environmental science, chemistry and physics – provide the foundation for a variety of careers including medicine, nursing, veterinary medicine, lab technology, environmental health, conservation, education and nutrition.

While the first year of this programme includes courses from the arts as well as the sciences, in the second year, students will have the opportunity to concentrate in biology, chemistry, earth and environmental science, or physics.

This two-year degree is designed for students who want to transfer abroad to obtain baccalaureate degrees in the science disciplines.

CURRICULUM

TOTAL CREDITS: 68-70

YEAR 1

First Semester - 15 credits
CSC 1110 Learning Strategies for Student Success 1
ENG 1111 Freshman Composition 3
MAT 1105 College Algebra 3
Natural Sciences (1100-level) 2 courses in BIO, CHM, EES or PHY 8

Second Semester - 18 credits
ENG 1112 Literary Analysis 3
MAT 1141 Pre-Calculus 3
Natural Sciences (1100-level) 2 courses in BIO, CHM, EES or PHY 8
Natural Sciences (1100-level) 1 course of your choice.* 4

YEAR 2

First Semester - 18 credits
MAT 1152 or Calculus I 3
MAT 2233 Statistics I 3
Natural Sciences (2000-level) 2 course in area of concentration** 8
Natural Sciences (2000-level) 1 course of your choice 4
Humanities (1100 or higher) 3

Second Semester - 17-19 credits
Natural Sciences (2000-level) 1 course in area of concentration 4
Natural Sciences (2000-level) 1 course of your choice (not in your area of concentration) 4
Elective (1100 or higher) 1 course of your choice.*** 3 or 4
Elective (2000) 1 course of your choice.*** 3 or 4
Social Science (1100 or higher) 3

*EES as an area of concentration is not recommended for students intending to enter into health professions.
**See the notes for area of concentration page 70.
***Prerequisites must be met for all courses.

(For a list of Humanities, Social Science and Natural Science options, see page 31.)
PROGRAMME OVERVIEW

The Associate of Science in Nursing will deliver quality, innovative, nursing education, and typify excellence in nursing practice. It has been developed and endorsed in collaboration with the Ministry of Health, the Bermuda Hospitals Board, and other key stakeholders in nursing throughout the Island. The curriculum was developed utilising the American Nurses Association standards and the Accreditation Commission for Education in Nursing (ACEN) standards. It integrates a strong liberal arts core, and a nursing core alongside sound clinical practice, ensuring graduates receive superior instruction and deliver high quality care, along with critical palliative skills that respect the dignity of all patients.

The programme includes clinical opportunities both locally and overseas, hence students must commit to traveling to obtain clinical exposure with key clinical partners overseas. Students must possess the appropriate travel documents and identification required for the overseas clinical experience.

Students will be admitted into the first nursing course Introduction to Professional Nursing (NUR 1101) upon completion of the Arts and Science requirements for the nursing programme if they have met the following:

- Programme (Enrolment) GPA of not less than 2.67 or higher in the Arts and Science prerequisites.

Once accepted into the nursing programme students must submit the following:

- Current Health Insurance and Travel Insurance
- Current American Heart Association Basic Life Support (CPR & AED)
- SCARS Certification
- Moving and Handling completion card
- Hair Follicle Drug Screening results (to be provided annually)
- Current Immunisation Record
- Bermuda Police Record Check
- Completed Medical Form

To satisfy requirements for graduation students must achieve a final programme (enrolment) GPA of at least 2.67 in the nursing programme. Upon successful completion, graduates will be competitively equipped with the knowledge and competencies to function as a professional nurse, and have the ability to apply for licensure through examination.

CURRICULUM

Please note: Admission to the nursing programme requires successful completion of CIS 1120, CSC 1110, ENG 1111, ENG 1112, MATH at 1100-level or higher+, PSY 1101, BIO 1121 AND BIO 1122 under the AA-ARTSC programme.

YEAR 1

Summer semester – 2 credits

NUR 1101 Introduction to Professional Nursing 2

First semester – 15 credits

NUR 1150 Nursing Fundamentals 8
SOC 1101 Introduction to Sociology I or SOC 1102 Introduction to Sociology II 3
BIO 2211 Anatomy and Physiology I* 4

Second semester – 16 credits

NUR 2200 Psychiatric Nursing 5
NUR 2201 Medical Surgical Nursing 7
BIO 2212 Anatomy and Physiology II* 4

SUMMER SEMESTER

NUR 2235 Pharmacology 2

YEAR 2

First semester – 14 credits

NUR 2240 Family Health Nursing 5
NUR 2250 Adult Health 5
BIO 2222 Medical Microbiology* 4

Second semester – 15 credits

NUR 2251 Adult Health Practicum 8
BIO 2250 Medical Nutrition* 4
Humanities course (1100-level) of your choice 3

TOTAL CREDITS: 62

*Before one can be enrolled in any course one must satisfy the prerequisites.
+MAT 1107 cannot be used to fulfil this requirement
A grade of “C” or better is required in all non-nursing courses to transfer credits to a Bachelor of Science Degree in Nursing.

A grade of “B-” or better is required in nursing courses (NUR). Nursing (NUR) courses can only be repeated once.
**PROGRAMME OVERVIEW**

This two-year programme is designed to prepare students to meet the needs of the food service industry. Course offerings emphasise practical application, a strong theoretical knowledge base and provides the critical competencies to successfully meet industry demands. The programme is accredited by the American Culinary Federation (ACF) and includes core courses, electives and general education requirements. Students complete a 12-week internship at a local hotel or restaurant where they will rotate through different sections of a kitchen.

**PROGRAMME OVERVIEW**

Developed with the assistance of employers in this field, this competency-based, modularised programme usually takes two years to complete. Students will experience lectures, practical assignments, and self-directed activities as they proceed through the modules, working with a lecturer and being evaluated on a skills basis. In addition to instruction in the theoretical aspects of heating, ventilating and air conditioning repair, extensive practical experience in an internship is an integral part of the programme. Graduates will be eligible to receive an industry-recognised certificate in HVAC from the National Centre for Construction Education and Research (NCCER), and also meet the Bermuda National Training Board standard for entering the Heating, Ventilating, and Air Conditioning Technology trade.

**Prerequisite:** NCCER Core *(8CR)*  
*(Please see NCCER Courses on pg. 104)*

Associate of Applied Science (Hospitality Management) AAS-HSMGT

PROGRAMME OVERVIEW

Tourism remains a cornerstone of Bermuda’s economy and this two-year programme is designed to prepare students to enter the hospitality industry on a management-training track either locally or overseas. It includes both theoretical and practical components. Courses about front-line hospitality processes are combined with those on facilities management and business practices.

A core part of the programme is the work experience that students acquire during the training component in hospitality organisations either in Bermuda or overseas.

CURRICULUM

YEAR 1

First Semester - 16 Credits

- CSC 1110 Learning Strategies for Student Success 1
- ENG 1111 Freshman Composition 3
- FAB 1100 or Food Service I, or 4
- CKN 1102 Kitchen Theory and Practice 4
- CUL 1104 Sanitation & Safety 2
- HMT 1155 Introduction to the Hospitality Industry 3
- MGN 1114 Introduction to Business 3

Second Semester - 18 Credits

- ACC 1135 Accounting I 3
- HMT 1120 Introduction to Lodging Management 3
- CIS 1120 Introduction to Business Applications of Computers 3
- ENG 1115 Writing for Professionals 3
- FAB 1100 or Food Service I, or 4
- CKN 1102 Kitchen Theory and Practice 4
- CUL 1131 Nutrition 2
- HMT 1175 SUMMER INTERNSHIP 3

YEAR 2

First Semester - 15 Credits

- ACC 1145 Accounting II 3
- MAT 1107 A Survey of Mathematics 3
- HMT 1265 Hospitality and Sales Marketing 3
- Humanities, Social Sciences or Natural Sciences courses of your choice* 3
- Humanities, Social Sciences or Natural Sciences courses of your choice* 3

Second Semester - 15 Credits

- HMT 2255 Hospitality Supervisory Practices 3
- HMT 2260 Food and Beverage Management 3
- MGN 1116 Tourism 3
- Humanities, Social Sciences or Natural Sciences courses of your choice* 3
- Humanities, Social Sciences or Natural Sciences courses of your choice* 3

*Before one can be enrolled in any course one must satisfy the prerequisites.

(For a list of Humanities, Social Science and Natural Science options, see page 31.)

TOTAL CREDITS: 67
The Associate of Applied Science in Motor Vehicle Technology programme at Bermuda College has been developed by the Bermuda College, the National Training Board (NTB), and the automotive industry. The curriculum is designed to meet international and local standards, with the intent that students are competent to sit the Automotive Service Excellence (A.S.E.) and City & Guilds Automotive Technology certifications from the U.S.A. and London, England. This modularised programme takes two years to complete. Students will experience lectures, practical assignments, and self-directed activities. Additionally, industry experience will be a required component of their curriculum as they progress through the modules, working with the lecturer and being evaluated on a skills basis.

Upon completion, students will be eligible to receive an industry-recognised degree in automotive technology from Bermuda College and enter the automotive industry as a second-year apprentice automotive technician.

**Prerequisite:** NCCER Core (8CR)

*Please see NCCER Courses on pg. 104*

PROGRAMME OVERVIEW

The Pre-Health Science Programme was developed in conjunction with key stakeholders. It is designed to provide a foundation for those interested in Allied Health professions thereafter, providing a concentrated education pathway which leads to a specific Allied Health profession. Initial areas of concentration will include, Pre-Medical Science, Medical Laboratory Technician, and Diagnostic Imaging with many other allied health professions evolving.

CURRICULUM

YEAR 1

Bermuda College is committed to setting our students on the path to success.

MANY PATHS. DISCOVER YOURS.
A Diploma Programme consists of courses that are part of an associate degree programme. They are designed to provide the graduate with skills and competencies for immediate employment into a particular occupational field. Students may be able to transfer some of these credits into an associate degree programme at a later time depending on the programme of study.

**DIPLOMAS:**

- Computer Network Administration ................................................................. 52
- Computer Network Technology ........................................................................ 53
- Culinary Arts ..................................................................................................... 54
- Food & Beverage Management .......................................................................... 55
- Heating, Ventilation & Air Conditioning Technology ........................................ 56
- Hospitality Management .................................................................................. 57
- Motor Vehicle Technology ................................................................................ 58
- Plumbing Technology ....................................................................................... 59
- Wood Technology ............................................................................................. 60
PROGRAMME OVERVIEW
This multi-disciplinary diploma is designed for persons wishing to supplement their computer training to include network management or their management/administration training to include computer networks. It is also geared for those presently involved in networking but who do not have formal training, or those seeking international certification (A+, Network+, CCNA or SANS/GSEC).

ENTRY REQUIREMENTS
2 years' full-time work experience in the field or a college degree (2-year or higher).

PROGRAMME OVERVIEW

This diploma is designed for persons who are presently involved in networking but have not received formal training; those seeking international certification (CompTIA, A+, Network+, or iNet); or those wishing to supplement their computer training to formally include networks, for the purpose of career enhancement.

ENTRY REQUIREMENTS

2 years’ full-time work experience in the field or a college degree (2-year or higher).

# Diploma in Culinary Arts (DP-CUART)

## Programme Overview

This programme provides students with basic education and training in culinary arts and is designed for those students who want to enter the workforce directly after graduation. The programme is accredited by the American Culinary Federation (ACF). Course offerings emphasise practical applications and follow the ACF curriculum. Students complete a 12-week internship at a local hotel or restaurant where they will rotate through different sections of a kitchen.

Diploma in Food & Beverage Management  DP-FBMGT

PROGRAMME OVERVIEW

This diploma has been developed to provide persons working in the food and beverage industry the opportunity to receive academic qualifications. It is designed for persons who have joined the industry without any formal certification in the field and requires work experience in the field for a minimum of five (5) years, or approval from the Dean, or that the person possesses an associate degree or higher. This diploma will allow students to formalise their training and experience.

**Diploma Programmes**

**Diploma in Heating, Ventilation & Air Conditioning Technology (DP-HVAC)**

### Programme Overview

The course requires that persons be working in the field continuously for a minimum of five (5) years or possess a relevant associate or higher degree. Graduates will be eligible to receive an industry-recognised certificate in Heating, Ventilation & Air Conditioning (HVAC) from the National Centre for Construction Education and Research (NCCER) and also meet the Bermuda National Training Board standard and receive a Bermuda College Diploma in Heating, Ventilation & Air Conditioning (HVAC) Technology.

**Prerequisite**: NCCER Core (8CR)  
*(Please see NCCER Courses on pg. 104.)*

HMT 2260 Food and Beverage Management 3
CIS 1120 Intro to Business Applications of Computers 3
PROGRAMME OVERVIEW

This programme has been developed by the Bermuda College to provide persons working in the automotive industry the opportunity to receive technical training. The course requires that persons be working in the field for a minimum of five (5) years or possess a relevant associate degree or higher. Persons will be required to attend classes according to the timetable and return to work after classes are completed; the modules are scheduled in the Bermuda College catalogue.

The curriculum is designed to meet industry standards with the intent that students sit the City & Guilds international certification. This Programme is modularised and takes two years to complete. Students will experience lectures, practical assignment and self-directed activities as they progress through the modules, working with the lecturer and being evaluated on a skills basis. Upon completion of the course, students will receive a Bermuda College Diploma in Motor Vehicle Technology.

Prerequisite: NCCER Core (8CR)

(Please see NCCER Courses on pg. 104.)

PROGRAMME OVERVIEW

The course requires that persons be working in the field continuously for a minimum of five (5) years or possess a relevant associate degree or higher. Graduates will be eligible to receive an industry-recognised certificate in plumbing from the National Centre for Construction Education and Research (NCCER), meet the Bermuda National Training Board standard and receive a Bermuda College Diploma in Plumbing Technology. Students will be eligible to sit the City and Guilds Scheme 6129 examination.

Prerequisite: NCCER Core (8CR)  
(Please see NCCER Courses on pg. 104.)

CURRICULUM

YEAR 1

First Semester - 8 credits
PLM 1101 Introduction to the Plumbing Profession, Safety & Tools  4
PLM 1102 Plastic Pipe, Copper, Cast Iron, Steel Piping and Fittings  2
PLM 1103 Fixtures and Faucets, Drains, Waste & Vent Systems, Water Distribution Systems  2

Second Semester - 10 credits
PLM 1104 Commercial Drawings, Hangers and Supports, Installing DWV piping  4
PLM 1105 Types of Valves, Installing Water Supply Piping, Installing Fixtures & Faucets  3
PLM 1106 Installing Water Heaters, Servicing Fixtures, Valves and Faucets  3

YEAR 2

First Semester - 9 credits
PLM 2107 Sizing Water Supply Piping, Potable Water Treatment  3
PLM 2108 Backflow Preventers, Types of Venting, Sizing DWV Systems  4
PLM 2109 Sewage Pumps, Compressed Air  2

Second Semester - 8 credits
PLM 2110 Business Principles for Plumbing, Water Pressure Systems  3
PLM 2111 Codes, Private Water Supply Well systems  3
PLM 2112 Swimming Pools and Hot Tubs, Plumbing for Mobile Homes  2

TOTAL CREDITS: 35

59
**PROGRAMME OVERVIEW**

This programme has been designed to meet both the needs of the local carpentry industry and the requirements for the National Training Board (NTB) and the National Centre for Construction Education and Research (NCCER). This course requires that individuals have five (5) years or more experience in the trade or possess an associate degree or higher. Students in the programme can expect to experience practical assignments, lectures and field trips to local building sites and industries. The self-directed activities and supervised assistance will enable students to progress successfully through this programme. 

*(Please see NCCER Courses on pg. 104)*

The Certificate Programme is designed to provide the graduate with the opportunity for immediate employment in his or her particular occupational field.

The certificate documents that the student has attained job entry competence and is ready for entry level employment.

**NOTE:** Certificate courses will not normally transfer into degree programmes.

**CERTIFICATES:**

Accounting Technician ................................................................. 62
Applied Science Technology .......................................................... 63
Electrical Wiring Technology ......................................................... 64
Heating, Ventilation & Air Conditioning Technology ...................... 65
Motor Vehicle Technology ............................................................. 66
Plumbing Technology .................................................................... 67
Wood Technology ......................................................................... 68
PROGRAMME OVERVIEW

Accounting technicians keep a variety of financial records in businesses. They prepare journal entries, financial statements, bank reconciliations, payroll records, and conduct stock-taking and inventory valuation reports.

This one-year programme is designed to prepare students to enter local businesses as accounting assistants in possession of the latest techniques in the field. It covers a variety of related areas that influence business organisations, such as computing, management, and office skills and provides extensive data entry experience.

**One must be in the final semester of this programme
In an effort to deliver a curriculum which is both current and timely, Bermuda College in collaboration with the Electrical Occupational Advisory Committee (EOAC) and the National Joint Apprenticeship and Training Committee (NJATC) of America has adopted this comprehensive modular programme as the standard for apprenticeship training in Bermuda. The programme will take five years to complete and upon successful completion of the entire course, the student will be certified as a Journeyman Inside Wireman by both the NJATC and Bermuda College. The NJATC certificate is highly regarded in the US, Canada, and around the world wherever US and Canadian electrical standards are in use.

Studying under the guidance of an experienced lecturer, students work through the modules in order, covering theoretical concepts while honing their practical skills. The passing grade for each module is 75%.

The apprenticeship programme is very broad-based, covering all areas of the trade and providing the graduate with the skill, knowledge and confidence to enter a dynamic and exciting industry. Additionally, instructors in the programme bring meaning to a high tech industry that is more rapidly changing than the curriculum can reflect. The experience and understanding that these individuals bring to the classroom make the programme the most unique way to learn to work in the electrical industry.

**TOTAL CREDITS: 60**
**Certificate in Heating, Ventilation & Air Conditioning Technology  CT-HVAC**

**Programme Overview**
Developed with the assistance of employers in this field, this competency-based programme usually takes two years to complete. Students will experience lectures, practical assignments, and self-directed activities as they proceed through the programme working with an instructor and being evaluated on a skills basis. In addition to instruction in the theoretical aspects of Heating, Ventilation and Air Conditioning repair, practical experience is an integral part of the programme. Graduates will be eligible to receive an industry-recognised certificate in HVAC from the National Centre for Construction Education and Research (NCCER) and also meet the Bermuda National Training Board standard for certification. 

**Prerequisite:** NCCER Core (8CR)  
(Please see NCCER Courses on pg. 104)

Certificate in Motor Vehicle Technology CT-MVTEC

PROGRAMME OVERVIEW

The Automotive Technology Certificate Programme at Bermuda College has been developed in partnership with the Automotive Industry and the National Training Board (NTB). The curriculum is designed to meet international and local industry standards with the intent that students be competent to sit the Automotive Service Excellence (A.S.E.) and City & Guilds international certifications. This modularised programme is full-time and takes two years to complete. Students will experience lectures, practical exercises, assignments and self-directed activities as they progress through the modules, working with the lecturer and being evaluated on a skills basis, in addition to industry experience which is compulsory in the second year of the course.

Upon completion, students will be eligible to receive an industry-recognised degree in automotive technology from Bermuda College and enter the automotive industry as a second-year apprentice automotive technician.

Prerequisite: NCCER Core (8CR)
(Please see NCCER Courses on pg. 104)

CURRICULUM

YEAR 1
First Semester - 18 credits
CSC 1100 Learning Strategies for Student Success 1
CSM 1101 Computer Skills Module 2
ENG 0044 Communications for Industry I 3
MAT 0014 or Preparatory College Mathematics I or 3
TMM 1001 Technical Math I 3
MVT 1104 Electrical Systems 3
MVT 1105 Battery/Charging Systems 3
MVT 1106 Starting Systems 3

Second Semester - 12 credits
ENG 0045 Communications for Industry II 3
MAT 0015 or Preparatory College Mathematics II or 3
TMM 1002 Technical Math II 3
MVT 1101 Ignition Systems 2
MVT 1102 Fuel/Exhaust Systems 2
MVT 1103 Exhaust Emissions Systems 2

YEAR 2
First Semester - 7 credits
MVT 2107 Braking Systems 1
MVT 2108 Hydraulic Brake Systems 1
MVT 2109 Anti-Lock Brake Systems 1
TSM 1101 Technical Science I 4

Second Semester - 7 credits
TSM 1102 Technical Science II 4
MVT 2110 Steering Systems 1
MVT 2111 Power Steering Systems 1
MVT 2112 Suspension Systems 1

TOTAL CREDITS: 44
PROGRAMME OVERVIEW

Developed with the assistance of employers in this field, this competency-based, modularised programme usually takes two years to complete. Students will experience lectures, practical assignments and self-directed activities as they progress through the modules, working with an instructor and being evaluated on a skills basis. Graduates will be able to sit the City and Guilds Scheme 6129 examinations and also meet the National Training Board (NTB) and National Centre for Construction Education and Research (NCCER) standards for entering the plumbing trade.

Prerequisite: NCCER Core (BCR)
(Please see NCCER Courses on pg. 104)

CURRICULUM

YEAR 1

First Semester - 17 credits

CSC 1110 Learning Strategies for Student Success 1
CSM 1101 Computer Skill Module 2
ENG 1044 Communications for Industry I 3
MAT 0014 Preparatory College Mathematics I or 3
TMM 1001 Technical Math I 3
PLM 1101 Introduction to the Plumbing Profession, Safety and Tools 4
PLM 1102 Plastic Pipe, Copper, Cast Iron, Steel Pipe and Fittings 2
PLM 1103 Fixtures and Faucets, Drain, Waste and Vent Systems, Water Distribution Systems 2

Second Semester - 16 credits

MAT 0015 Preparatory College Mathematics II or 3
ENG 1045 Communications for Industry II 3
TMM 1002 Technical Math II 3
PLM 1104 Commercial Drawings, Hangers and Supports, Installing DWV Piping 4
PLM 1105 Types of Valves, Installing Water Supply Piping, Installing Fixtures and Faucets 3
PLM 1106 Installing Water Heaters, Servicing Fixtures, Valves, and Faucets 3

YEAR 2

First Semester - 13 credits

PLM 2107 Sizing Water Supply Piping, Potable Water Treatment 3
PLM 2108 Backflow Preventers, Types of Venting, Sizing DWV Systems 4
PLM 2109 Sewage Pumps, Compressed Air 2
TSM 1101 Technical Science I 4

Second Semester - 12 credits

TSM 1102 Technical Science II 4
PLM 2110 Business Principles for Plumbers, Water Pressure Systems 3
PLM 2111 Codes, Private Water Supply Well Systems 3
PLM 2112 Swimming Pools and Hot Tubs, Plumbing for Mobile Homes 2

TOTAL CREDITS: 58
**PROGRAMME OVERVIEW**

This programme has been designed to meet both the needs of the local carpentry industry and the requirements of the National Training Board and the National Centre for Construction Education and Research (NCCER). Students in the programme can expect to experience practical assignments, lecturers and field trips to local building sites and industries. The self-directed activities and supervised assistance will enable students to progress successfully through this programme. (Please see NCCER Courses on pg. 104.)

**TOTAL CREDITS: 61**
Bermuda College has established a number of pathways so that you can earn a bachelor’s degree. You can transfer all your credits from your Bermuda College associate degree, study two additional years at an institution abroad, and complete your bachelor’s degree.
NOTE ON PREPARATION FOR PROFESSIONAL PROGRAMMES

Certain overseas professional associations and institutes recognise specific Bermuda College courses in the areas of accounting and business administration and grant exemptions from courses in their own professional training programmes. Students are advised to contact the organisation.

CONCENTRATIONS AND SUBJECTS OF STUDY

NOTE: Candidates should note that the approved courses indicated under each of the following subjects of study are those described under the heading COURSE DESCRIPTIONS: Associate Degree Courses.

These courses will earn general and elective credits in an associate degree programme, unless otherwise specified.

ACCOUNTING

Approved Courses: all coded ACC.

Concentration in the Associate in Business Administration:
ACC 1135, ACC 1145, ACC 2201, ACC 2202, ACC 2253, ACC 2254.

ART HISTORY

Approved Courses: all coded AHS.

Concentration in the Associate in Arts:
AHS 1126 and AHS 1127, 12 credits in AHS at the 2000-level.

BIOLOGY

Approved Courses: all coded BIO.

Note exclusions in the course descriptions.

Concentration in the Associate in Science:
BIO 1121, BIO 1122, and 3 BIO courses at the 2000-level.

CHEMISTRY

Approved Courses: all coded CHM.

Note exclusions in the course descriptions.

Concentration in the Associate in Science:
CHM 1111, CHM 1112, and 3 CHM courses at the 2000-level.

EARTH & ENVIRONMENTAL STUDIES

Approved Courses: all coded EES.

Note exclusion in the course descriptions.

Environmental Science Concentration in the Associate in Science:
EES 1101, 3 credits from EES 1102 - 1105; BIO 1121, BIO 1122, 6 credits from EES 2211, EES 2298 (not more than 3 credits from EES 2298), CHM at the 2000-level.

ENGLISH

Approved Courses: all coded ENG.

Concentration in the Associate in Arts:
6 credits in ENG 1111 and ENG 1112, 12 credits in ENG at the 2000-level.

FINE ART

Approved Courses: all coded ART.

MANAGEMENT

Approved Courses: all coded MGN.

Concentration in the Associate in Business Administration:
MGN 1114, MGN 2217, 12 credits at the 2000-level from amongst MGN 2110, MGN 2210, MGN 2211, MGN 2222, MGN 2230, MGN 2240, MGN 2241, MGN 2245, MGN 2250 and MGN 2298.

MATHEMATICS

Approved Courses: all coded MAT.

Note exclusions in the course descriptions.

Concentration in the Associate in Arts:
MAT 1141, MAT 1152, 12 credits in MAT at the 2000-level (excluding MAT 2233 and MAT 2234).

PSYCHOLOGY

Approved Courses: all coded PSY.

Note exclusions in the course descriptions.

Concentration in the Associate in Arts:
PSY 1101, PSY 1102, SSC 2200, 9 credits in PSY at the 2000-level.

SOCIOLOGY

Approved Courses: all coded SOC.

Concentration in the Associate in Arts:
SOC 1101, SOC 1102, SSC 2200, 9 credits in SOC at the 2000-level.
Articulation Agreements and Partnerships

TRANSFER CREDIT AGREEMENTS AND PARTNERSHIPS

Bermuda College has established a number of agreements with colleges and universities in Canada, the United Kingdom, the United States of America, and the Caribbean Islands/West Indies. The purpose of these agreements is to formalise the pathways for Bermuda College students to continue their studies abroad. Transfer Credit Agreements facilitate a seamless transfer to baccalaureate programmes for Bermuda College graduates, often with a course-for-course template. Partnerships may indicate that the two institutions have agreed to collaborate, exchange students, faculties, and programmes, and share research. In the case of a partnership, Bermuda College course transfers must be worked out, case by case.

To facilitate a smooth transition to the transfer school, students are encouraged to make an appointment with the Bermuda College Career and Counselling Centre to ensure that the appropriate agreement or partnership has been negotiated with the school they have selected, and that they meet the requirements for transfer.

Visit the Bermuda College website to view the list of schools and to determine whether the proposed course of study is covered by the existing agreements. You can find this information at:

University Programmes Offered in Bermuda

MOUNT SAINT VINCENT UNIVERSITY BACHELOR OF BUSINESS ADMINISTRATION IN ASSOCIATION WITH BERMUDA COLLEGE

The Bachelor of Business Administration (BBA) in association with Bermuda College is an articulated degree arrangement between Bermuda College and Mount Saint Vincent University of Halifax, Nova Scotia. Majors are available in accounting, management, marketing and strategic human resource management.

This accredited BBA degree programme is intended for students who have completed the Associate of Arts (Business Administration) or the Associate of Applied Science (Business Administration) at Bermuda College, but graduates of a two-year Associate Degree or Diploma programme from other accredited institutions may also be eligible to apply.

THE UNIVERSITY OF THE WEST INDIES, Mona, Jamaica

The Postgraduate Diploma in Education for teacher certification is a virtual face-to-face programme that prepares students to teach one of several content areas at middle or secondary school level. The programme is completed within one calendar year. A practicum and a research project are required. Applicants must hold a baccalaureate degree in their chosen teaching discipline.
MIAMI UNIVERSITY
M.Ed Special Education Online Hybrid (SEOH)

Offered in collaboration with the Bermuda Department of Education, this graduate programme offers courses leading to licensure and/or a Master of Education in Special Education. Offered on a cohort basis, each programme runs for two academic years. Students may choose one of three pathways:

- **M.Ed. in Special Education with licensure + initial certification**
  This programme is designed for individuals who do not currently hold a teaching credential and who wish to become licensed in Ohio as a Special Education Intervention Specialist.

- **M.Ed. in Special Education with licensure**
  This programme is designed for individuals who hold a current teaching credential and who wish to add Special Education licensure while pursuing a Master of Education degree.

- **Licensure in Special Education (non-degree)**
  This programme is designed for individuals who hold a current teaching credential and who wish to add Special Education licensure.

### ACCOUNTING

**Practical Accounting Procedures I**

**ACC 1041 3 FA/SP**

This course is designed as an introduction to analysis, classification, and recording of business transactions in a manual environment with emphasis on the complete accounting cycle for a service business. Includes preparation of financial statements and bank reconciliations. **This course is a certificate course and will not normally transfer into degree programmes.**

**Practical Accounting Procedures II**

**ACC 1042 3 SP**

An advanced practical bookkeeping course that encompasses prepaid assets, uncollectible accounts receivable, plant assets and depreciation, notes payable and receivable, accrued revenues and expenses, bookkeeping for corporations, cost volume profit analysis, and budgeting. The course also gives students real-life experience with accounting business simulation and working papers. **This course is a certificate course and will not normally transfer into degree programmes. Prerequisite:** ACC 1041

### Accounting and Technology

**ACC 1043 3 SM**

This course is a lab-oriented learning course designed especially to empower the student with the skills needed to provide technical support for the financial administration of the organisation. The course is made up of four modules: word processing, spreadsheet, presentation and file management practices. It is strongly focused on the use of spreadsheets in accounting functions. To complete the course, the student will have to demonstrate his or her competency with lab work that addresses the fusion between real-world accounting and current software applications. **This course is a certificate course and will not normally transfer into degree programmes. Prerequisite:** CIS1120, ACC 1041 MGN1017

**Corequisites:** ACC 1042, MGN1015, MGN1016

### Accounting I

**ACC 1135 3 FA/SP/SM**

An introduction to the basic theory and applications of contemporary financial accounting, including recording of transactions, measurement of income and the preparation of financial statements. **Prerequisite:** MAT 0015 or ACC1041 or equivalent.

### Computerised Accounting

**ACC 1140 3 SP**

This course offers an introduction to financial applications that are commonly computerised in today's business environment by providing practical training using theoretical accounting knowledge. This course takes a user perspective by illustrating how accounting information is both created, maintained and used for analysis, problem-solving and decision-making. **Prerequisite:** CIS 1120 **Corequisite:** ACC 1145

### Accounting II

**ACC 1145 3 FA/SP**

An introduction to managerial accounting. Topics include bonds and long-term notes payable, investments, cash flows, analysis of financial statements, cost accounting, cost-volume-profit analysis, budgeting and managerial decision-making. **Prerequisite:** ACC 1135

### Intermediate Accounting I

**ACC 2201 3 FA**

A detailed and in-depth study of accounting principles, practices and concepts with emphasis on their application to income determination and asset valuation. **Prerequisite:** A grade of “C” or better in ACC 1135 and ACC 1145

### Intermediate Accounting II

**ACC 2202 3 SP**

A continuation of ACC 2201 to include the accounting for liabilities, leases, shareholders’ equity accounts, consolidations and equity accounting. **Prerequisite:** ACC 2201
Management Accounting I  
**ACC 2253 3 FA**
A detailed study of cost accounting to include a study of job order accounting, budgeting and standard costing.  
*Prerequisite:* A grade of “C” or better in ACC 1145.

Management Accounting II  
**ACC 2254 3 SP**
A continuation of ACC 2253 to include the study of inventory control, cost allocation and process costing.  
*Prerequisite:* ACC 2253

**ACTUARIAL SCIENCE**

Introduction to Actuarial Science  
**ASC 1101 3**
An introduction to various operational aspects of the insurance and reinsurance industry in the sectors of property, casualty and life. The various roles of the actuary within the insurance organisation as well as the basic methodologies of actuarial pricing and reserving are emphasised.  
*Prerequisite:* Six credits of mathematics, including MAT 2233

**ALLIED HEALTH**

Introduction to Healthcare  
**ALH 1101 2 FA**
This course is designed to give students interested in allied health professions an overview of the healthcare industry and related courses. Students will explore personal values, and academic goals. Individual and group projects, case studies, and presentations will be utilised as students learn about the educational requirements of specific healthcare degrees and develop the baseline skills necessary for working in healthcare. Critical thinking, ethical reasoning, effective communication and self-directed life-long learning will also be explored. This is a required course for all students in the Pre-Health Science Programme.  
*Prerequisite:* A grade of “C” or better in ENG 0012 or satisfactory performance on the College Placement Test.

Medical Terminology  
**ALH 1102 2 SM**
This course is designed to give students interested in healthcare professions an overview of the principles of medical wording that would assist the student in developing the extensive medical vocabulary used in healthcare occupations. Students will receive a medical terminology foundation through the use of root words, prefixes and suffixes. This course will focus on correct pronunciations, spelling and use of medical terms while providing the students with the knowledge needed to excel at their chosen healthcare profession. It is a required course for all students in the Pre-Health Science Programme.  
*Prerequisite:* A grade of “C” or better in ENG 0012 or satisfactory performance on the College Placement Test.

**ART & DESIGN**

Introductory Drawing  
**ART 1101 3 FA/SP**
A foundation course in drawing. Focuses on the development of the student’s awareness of line, tone, proportion, spatial relationships and rhythm. Subject matter will include still life, man-made and natural objects, landscape and non-figurative themes.

Introductory Painting  
**ART 1102 3 SP**
A foundation course in painting. Focuses on the development of the student’s awareness of tone, colour, composition, and spatial relationships. Subject matter will include still life, natural objects, landscape and non-figurative themes. ART 1101 is highly recommended.

Two-dimensional Design  
**ART 1120 3 FA**
A theoretical and practical exploration of the principles of two-dimensional design (line, shape, form, and composition) along with the investigation of various materials and tools, including the computer, so as to establish a framework in which students can solve various design problems.

Introduction to Colour and Composition  
**ART 1135 3 FA**
A theoretical and practical study of colour and composition in art and in nature.

Introduction to Media Arts  
**ART 1140 3 SP**
Introduction to media arts, using the video camera to explore the making of film. Emphasis will be placed on the basic principles of using a video camera, lighting and editing, and students will be expected to use the video to make a film presentation.

Introductory Sculpture  
**ART 1122 3 FA**
A theoretical and practical exploration of the principles of three-dimensional design (line, shape, form, mass, space and composition) focusing on traditional sculpting methods (clay, carving, mould making, assemblage, etc.). The investigation of various materials and tools, including the computer, so as to establish a framework in which students can solve various design problems, also occurs.  
*Prerequisite:* ART 1120

Intermediate Drawing  
**ART 2211 3 SP**
Drawing as a means to express and explore form, space, tone, texture and composition in a variety of drawing media, with opportunity for individual expression and refinement.  
*Prerequisite:* ART 1101

Intermediate Sculpture  
**ART 2221 3 FA**
A continuation of ART 1122 Introductory Sculpture with opportunity for more individual expression and refinement while focusing on contemporary sculpting practices (fabrication, installation art, public art,
performance art, etc.). The investigation of various materials and tools, including the computer, so as to establish a framework in which students can solve various design problems also occurs. **Prerequisite:** ART 1122

**Intermediate Painting**   ART 2230 3  **FA**
A more detailed study in painting, using acrylics, oils, or watercolour to explore inherent qualities in each medium. Emphasis will be placed on tone, colour and composition. **Prerequisite:** ART 1102

**Intermediate Colour and Composition**   ART 2235 3  **SP**
A more detailed study of colour phenomena and its application to art, such as transparency, translucency, iridescence and luminescence. Students will be expected to apply this information to their own works of art. **Prerequisite:** ART 1135

**Introduction to Graphic Design**   ART 2250 3  **FA**
Introduction to graphic design with emphasis on layout and design, colour in graphics, typography, the printing process and the application of the computer to these processes. **Prerequisites:** ART 1120 and 1135

**Figure Drawing**   ART 2278 3  **SP**
A study of the proportions and anatomy of the human form from the model. Emphasis on line and contour in short poses. **Prerequisite:** ART 1101

**Special Topics in Art**   ART 2298 3
Designed to allow the interested student an opportunity either for in-depth inquiry into a topic covered in another 2000-level course or for the study of a special topic or theme in Art History. The topics will vary from time to time. **Prerequisite:** Appropriate 1000-level courses and/or a 2000-level course relevant to the topic.

**Postcolonial Visual Art**   ART 2290 3
This is a course of study on contemporary cross-cultural visual art in relation to its colonial heritage. Responses to the colonial archive are a significant current in late 20th and early 21st century culture. In many different contexts visual artists have critiqued and deconstructed dominant Western myths and stereotypes. In this course we will address such responses, and the issues that they raise about relationships between cultures.

**BIOLOGY**

Exclusions: Students cannot receive credit for both BIO 1102, BIO 1121. Students that receive credit for BIO 2211 and/or BIO 2212, cannot receive credit for BIO 1104.

**Preparatory Biology**   BIO 0013 0  **FA/SP**
General concepts and principles in biology. Topics include characteristics of life, introductory chemistry and biochemistry, cell structure and function, photosynthesis, cell respiration, patterns of inheritance, human genetics and mutations. Laboratory. A grade of “C” or better will be required to advance to the 1000-level courses. **Corequisite:** MAT 0014

**Introduction to the Life Sciences**   BIO 1102 4  **FA**
The focus initially is on methodology and major concepts in the life sciences. Elementary studies at the cell level for animals and plants will involve some related basic chemistry and physics. Laboratory techniques
will be developed. This survey course is appropriate for those students who do not plan to specialise in the biological sciences. (It is also appropriate for mature students or persons with post-secondary or broad general experience but without formal science preparation).

**Prerequisite:** A grade of “C” or better in BIO 0013.

**General Human Biology**

BIO 1104 4 SP
The second half of two courses for non-biology majors needing to fulfil a natural science requirement. This course will focus on basic human gross anatomy, basic physiology and some basic pathology.

**Prerequisite:** A grade of “C” or better in BIO 0013.

**Principles of Biology I**

BIO 1121 4 FA/SP
Designed for students intending to pursue further studies in the biological sciences, this course is the first of two providing a comprehensive introduction to biology. The aim is to foster a realisation of the underlying similarities of organisms and an appreciation of their diversity. Topics include cellular processes with a focus on biochemistry, histology, evolution, genetics, and taxonomy. A sound background in chemistry, physics and mathematics is essential. Laboratory.

**Prerequisites:** A grade of “C” or better in BIO 0013 and MAT 0015, or alternative in Biology (with Lab); **Corequisite:** MAT 1105.

**Principles of Biology II**

BIO 1122 4 FA/SP
A continuation of BIO 1121. This course will further explore variation and biological continuity through genetics, development and ecology as well as provide an introduction to basic physiological systems. Laboratory.

**Prerequisite:** BIO 1121

**Cellular Biology**

BIO 2210 4
A comprehensive survey of the structure and function of the unit of life. Emphasis is placed on molecular constituents and inter-cellular components. Cellular modifications and the cellular nature of organisms will be examined. Laboratory. **Prerequisites:** BIO 1122 and CHM 0013; **Corequisite:** MAT 1141

**Anatomy and Physiology I**

BIO 2211 4 FA
Exploration of the intricate functions of the human body with emphasis on the physiological functions of the integumentary, skeletal, muscular, nervous and the endocrine systems. Integration of the human body will be studied as a whole focusing on the major theme of homeostasis. Laboratory. **Prerequisite:** BIO 1122

**Anatomy and Physiology II**

BIO 2212 4 SP
A continuation of Anatomy and Physiology I, with emphasis on the cardiovascular system, the lymphatic system and immunity, the respiratory system, the digestive system and metabolism, the urinary system, fluid/electrolyte and acid/base balance, and the reproductive systems. Integration of the human body will be studied as a whole focusing on the major theme of homeostasis. Case study investigations will be explored. Laboratory. **Prerequisite:** BIO 2211

**Medical Microbiology**

BIO 2222 4 FA
A course designed for students intending to pursue further studies in the biological sciences. This course is structured to provide a comprehensive introduction to medical microbiology. The aim is to foster in-depth knowledge of infectious microorganisms, their biochemistry and how they infect the organ systems of the human body. Basic microbiological principles with a focus on taxonomy, cell morphology and human pathologies caused by microorganisms. **Prerequisite:** BIO 1122

**Medical Nutrition**

BIO 2250 4 SP
This course offers an introduction to the foundations of nutritional medicine. It is designed for students interested in health science. In this course the introduction and discussion of current trends in clinical nutrition as well as nutritional analysis and assessment are explored. Also covered are the general biochemistry and function of nutrients. Selected diseases prevented or managed by nutrition will be explored as well. Course topics in nutritional medicine include weight management, cancer support, cardiovascular disease, diabetes mellitus, food intolerances and allergies. This course is highly recommended for students that are registered in the nursing programme. Laboratory. **Prerequisite:** BIO1122

**Special Topics in Biology**

BIO 2298 3
Provides an opportunity for in-depth study at the 2000-level of a topic available as a special offering. This may be material that has been initially explored at the 1000-level or new material for whose development and exploration there has been provided an appropriate base via a 1000-level course. **Prerequisites:** Appropriate 1000-level courses and/or a 2000-level course relevant to the topic.

**CHEMISTRY**

**Preparatory Chemistry**

CHM 0013 0 FA/SP
A one semester course designed to introduce students to the language, tools and theories of chemistry. Topics included in this course are as follows: elements, compounds, mixtures, atoms, matter, bonding, introductory organic chemistry and biological chemistry. Laboratory. A grade of “C” or better will be required to advance to the 1000-level courses. **Corequisite:** MAT 0014
Principles of Chemistry I  
**CHM 1111 4 FA**
A survey of fundamental principles of physical chemistry including atomic structure, chemical bonding, molecular structure and gas laws. Laboratory.  
**Prerequisites:** A grade of “C” or better in CHM 0013 and MAT 0015  
**Corequisite:** MAT 1105

Principles of Chemistry II  
**CHM 1112 4 SP**
A continuation of a survey of fundamental principles of physical chemistry including chemical and phase equilibrium, acid-base equilibrium, precipitation reactions, chemistry of hydrocarbons. Laboratory.  
**Prerequisite:** CHM 1111

Organic Chemistry I  
**CHM 2256 4 FA**
A broad introduction to the behaviour of aliphatic and aromatic carbon compounds, including hydrocarbons, alcohols, aldehydes and ketones, stereo-isomerism, optical activity and spectroscopy. Laboratory.  
**Prerequisite:** CHM 1112

Organic Chemistry II  
**CHM 2257 4 SP**
A continuation of an introduction to the behaviour of aliphatic and aromatic carbon compounds including acids, amines, amino acids, carbohydrates, proteins, nucleic acids and natural products. Laboratory.  
**Prerequisite:** CHM 2256

Special Topics in Chemistry  
**CHM 2298 3**
Provides an opportunity for in-depth study at the 2000-level of a topic available as a special offering. This may be material that has been initially explored at the 1000-level or new material for whose development and exploration there has been provided an appropriate base via a 1000-level course.  
**Prerequisite:** Appropriate 1000-level courses and/or a 2000-level course relevant to the topic.

**COLLEGE SKILLS**

**Learning Strategies for Student Success**  
**CSC 1110 1 FA/SP**
This course is designed to help students improve their college readiness, enhance their college experience, and improve learning skills. Students will master strategies and practical skills that will enable them to learn effectively. Topics include but are not limited to campus resources, time management, emotional intelligence, learning styles, reading strategies, library research, note-taking and study techniques. This course is intended to be completed in the first semester.

**COMPUTER STUDIES**

**Introduction to Business Applications of Computers**  
**CIS 1120 3 FA/SP/SM**
Intended to provide students with an initial exposure to the main areas of software used in business: word processing, spreadsheets and presentation software. Additionally, an introduction to database management will be provided. A consideration of business application software in the context of the overall computer system will also be covered to include an overview of computer design, networking, operating systems and hardware options. This course is also suitable for those students studying programmes in the social sciences or science.

**Introduction to Computers and Information Technology**  
**CIS 1125 3 FA**
This entry-level survey course explores computers and their applications. Students are provided with an appreciation of what computers are, how they work and what tasks can be accomplished using them. Topics include the impact of computers on society; computer hardware including CPU, disks, other storage devices and input and output devices; computer software including data representation, data structures, operating systems, application programmes and database management systems; introduction to programming and programming languages; computer communications including the Internet, the world-wide web and e-mail; a brief history of computing; computer security, privacy and ethics. The coursework will cover the material needed for students to take the CompTIA IT Fundamental Certification.  
**Prerequisite:** A grade of “C” or better in ENG 0012. Fundamental Computer Literacy or CIS 1120 as a corequisite.

**Data Management**  
**CIS 1130 3 SP**
This course will feature the application of the SQL query language for managing and creating databases. A typical report and application generator will also be studied. Provides essential theoretical and practical knowledge required by those who expect to be involved in the storage and retrieval of information. Students will get an introduction to Blockchain Technology and how it is now impacting cryptocurrency, FinTech, RegTech, and overall InfoTech. Data privacy and protection will also be covered in this course, with a focus on General Data Protection Regulation (GDPR) and Bermuda’s Personal Information Protection Act (PIPA). The coursework will cover the material needed for students to take the Oracle Database Certification OCA or OCP.  
**Prerequisites:** CIS 1120 or CIS 1125 and ENG 0012 and MAT 0015.
**Course Descriptions - Credit Courses**

**Programming for Information Systems I**  
**CIS 1155 3  FA**
This course is an introduction to the basic principles of computer programming. It focuses on developing problem solving skills through writing programs in Visual Basic and Java. Students learn to develop graphical user interfaces (GUI's) and use basic programming language structures to develop algorithms for solving various kinds of problems. The coursework will cover the material needed for students to take the Oracle Java Programmer Certification OCA or OCP.  
**Prerequisites:** MAT 0015 and CIS 1125

**Computer Information Systems Internship**  
**CIS 1180 3  FA/SP/SM**
Work experience in a selected local business. The experience will be in a computer-related area of the business. The precise nature of the experience will be agreed upon after discussion between the College and management of the business.  
**Prerequisites:** A minimum GPA 2.0 or higher in all computer information technology programme courses necessary as prerequisites; CIS 1120, CIS 1125, CIS 1130, CIS 2278 and ECM 1101.

**Systems Analysis and Design**  
**CIS 2231 3  FA**
Intended to provide an understanding of the scope and nature of information systems, techniques applied to systems analysis and design, and of the development life-cycle of a computer system project. Topics include the need for information and management systems, the human aspects of system development, fact-finding and structured systems analysis, design for real-time and distributed systems, computer hardware and software acquisition, system implementation techniques, and case studies.  
**Prerequisite:** CIS 1125  
**Corequisites** CIS 1130 and ENG 0012 and MAT 0015

**Programming for Information Systems II**  
**CIS 2255 3  FA**
This course is a continuation of Programming for Information Systems I. It focuses on advance programming techniques in Visual Basic and Java. Students will advance their knowledge of programming and using the graphical user interfaces (GUI's) and use advanced programming language structures to develop algorithms for solving various kinds of problems. The coursework will cover the material needed for students to take the Oracle Java Programmer Certification OCA or OCP.  
**Prerequisite:** CIS 1155

**Microcomputer Hardware and System Software**  
**CIS 2278 3  SP**
Students study the installation, configuration, proper usage and maintenance of common hardware and software components of an IBM compatible microcomputer, including memory, disk drives, expansion cards, power supplies, system level software, diagnostic utilities, operating systems, and major applications. Typical I/o peripherals such as video cameras, microphones, speakers, keyboards, printers and the mouse are studied. The coursework will cover the material needed for students to take the CompTIA A+ Certification.  
**Prerequisite:** CIS 2278

**Networking Technologies**  
**CIS 2290 3  FA**
This course covers the technology underlying data-communications systems such as transmission media, modulation and demodulation, multiplexing, packet switching, hardware, software and network operations. Topics include fibre optics, the Integrated Services Digital Network (ISDN), T-1 and T-3 multiplex, the open system interconnection (OSI) model, and integrated voice-data equipment. The coursework will cover the material needed for students to take the CompTIA Network+ Certification.  
**Prerequisite:** CIS 2278

**Operating Systems & Infrastructure**  
**CIS 2295 3  FA**
This course is an introduction to concepts and algorithms incorporated in operating systems. It examines interrelationships between operating systems and computer hardware. Compares batch, real-time, and time-sharing operating systems, process management techniques, interrupt, handlers, CPU scheduling algorithm, interlocks, resource allocation, deadlocks, paging, and memory systems are studied. It also introduces advanced topics in the design of operating systems, networking, device management and file management techniques, scheduling algorithms, security, queuing theories, and comparison of existing operating systems for client-server. Students will also get exposed to virtualisation and virtual environments. The coursework will cover the material needed for students to take the CompTIA Server+, Linux+, Cloud+, and Cloud Essentials+ Certifications.  
**Prerequisites:** CIS 2278, CIS 2290  
**Corequisites:** CIS 2297

**Security Fundamentals and Policies**  
**CIS 2297 3  SP**
This course offers in-depth coverage of the current risks and threats to an organisation's data together with a structured way of addressing the safeguarding of these critical electronic assets. The course provides a foundation for those responsible for protecting network services, devices, traffic and data. Additionally, the course provides the broad-based knowledge necessary to prepare students for further study in other specialised security fields. The coursework will cover the material needed for students to take the CompTIA Security+ Certification and CompTIA CSA/CySA+ Cyber Security Certification.  
**Prerequisite:** CIS 2290, CIS 2278

**Computer Skills Module**  
**CSM 1101 2  SP**
This course is designed to introduce the student to basic computer software applications in Microsoft Word, Excel and PowerPoint.
### COOKERY & NUTRITION

#### Kitchen Theory and Practice I  
**CKN 1102 4 FA**  
Cuisine and related theory in preparation for hospitality management. Topics include preparation, cooking, presentation, and sanitation management. **Prerequisite:** Satisfactory performance on College Placement Test with a minimum score of 249 in Reading Comprehension.

#### English for Culinary Arts  
**CUL 1020 3 FA**  
The following skills are contained in this module: reviewing of basic English skills; reading and understanding charts and instructions; writing reports, requisitions, orders, invoices, menus, rosters, function sheets/requisitions; writing a résumé and a cover letter; developing interviewing and speaking skills. **This course is a certificate course and will not normally transfer into degree programmes. Prerequisite:** Satisfactory performance on College Placement Test with a minimum score of 249 in Reading Comprehension.

#### Introduction to Culinary Arts  
**CUL 1102 1 FA**  
This course introduces students to the history of culinary arts. Students will study kitchen equipment, organisation, chef’s tools, terminology, sanitation and conform to the industry standard of personal grooming, hygiene and professional presentation. Students must complete first aid and fire safety training. **Prerequisite:** Satisfactory performance on College Placement Test with a minimum score of 249 in Reading Comprehension.

#### Culinary Mathematics  
**CUL 1103 3 FA**  
This course focuses on mathematics procedures and skills that are vital to the food service industry. Topics include units of measure and unit conversions, recipe scaling, yield percent, purchasing and portioning, recipe costing, and kitchen ratios. **Prerequisite:** Satisfactory performance on College Placement Test with a minimum score of 249 in Reading Comprehension.

#### Sanitation & Safety  
**CUL 1104 2 FA**  
An introduction to the fundamentals of food and environmental sanitation. The student will examine the origins of food-borne illness, prevention measures and the implementation of proper sanitation practices. The ServSafe certification test will be offered upon completion of this course.

#### Meat Identification & Fabrication  
**CUL 1105 2 FA**  
Students will identify and fabricate basic meats including primal, sub-primal cuts and kitchen ready cuts, identify USDA inspection stamps, government yield and quality grades for all carcasses. Students will practice methods of tenderising, marinating and cooking techniques for all specific cuts including offal, game and poultry. **Prerequisite:** CUL 1102 **Corequisite:** CUL 1104

#### Sanitation & Safety  
**CUL 1104 2 FA**  
An introduction to the fundamentals of food and environmental sanitation. The student will examine the origins of food-borne illness, prevention measures and the implementation of proper sanitation practices. The ServSafe certification test will be offered upon completion of this course.

#### Purchasing & Product Identification  
**CUL 1106 3 FA**  
Students will learn methods for controlling costs as they apply to the selection and procurement of food, beverages, equipment, contract services and supplies with primary focus on product identification, supplier selection, ordering, receiving, storing and issuing processes. This course prepares students to write an internationally recognised test. **Prerequisite:** Satisfactory performance on College Placement Test with a minimum score of 249 in Reading Comprehension.

#### Introduction to the Preparation of Stocks, Soups & Sauces  
**CUL 1108 2 FA**  
This course introduces classical production methods for the basic stocks used in the production of most soups and sauces. This includes production of the Grand Sauces and various derivatives, basic clear, cream, puree and international soups, as well as emulsified sauces. **Prerequisite:** CUL 1102 **Corequisite:** CUL 1104

#### Introduction to Vegetable & Starch Cookery  
**CUL 1109 2 FA**  
This course introduces students to classification, storage and preparation of the fundamental vegetables and provides the basics of preparing potatoes, starches, legumes and pastas including international starch dishes. Students will learn proper knife cuts and shaping of vegetables. **Prerequisite:** CUL 1102 **Corequisite:** CUL 1104

#### Introduction to Cooking Methods  
**CUL 1110 2 FA**  
The course introduces students to the vast variety of cooking methods, and the various types of heat transfer, including both moist and dry heat. The proper choice of ingredients associated with each cooking method, and the correct choice of tools and equipment will be discussed. Careful attention is placed on the proper application of technique throughout each step from preparation to service. **Prerequisite:** CUL 1102 **Corequisite:** CUL 1104

#### Introduction to Production Cookery  
**CUL 1111 2 SP**  
This course introduces students to production cooking in a real-life restaurant setting. It is designed so the student can utilise all that they have learned in the preceding culinary courses with an emphasis on cleanliness, usage of ingredients, plate presentation, and effective execution of dishes at a service quality standard. **Prerequisites:** CUL 1102 and 1110 **Corequisite:** CUL 1104

#### Breakfast & Short Order Cookery  
**CUL 1112 1 SP**  
This course introduces students to the preparation and presentation of a range of breakfast items; baked goods, egg, fish and meat dishes, teas, coffees and juices, preparation and presentation of fresh fruits. Students will practice short-order cooking using a variety of cooking methods. **Prerequisite:** CUL 1102 **Corequisite:** CUL 1104

| Introduction to the Larder (Garde Manger)                | CUL 1116       | SP      |
| This course introduces students to basic hot and cold hors d’oeuvres, dressings, various forcemeats, chaud-froid decorating and preparation and design of modern buffet presentations including fruit, vegetable, lard and ice carving. **Prerequisite:** CUL 1102 **Corequisite:** CUL 1104 |

| Introduction to Baking and Pastry                        | CUL 1117       | SP      |
| This course introduces students to the fundamental techniques and procedures used in baking and pastry production. Includes study of baking terminology, weighing procedures, ingredients and basic mixing methods to produce a variety of yeast breads, cakes, cookies, and desserts to industry standards. **Prerequisite:** CUL 1102 **Corequisite:** CUL 1104 |

| Culinary Arts Internship                                 | CUL 1119       | FA/SP/SM|
| This twelve-week internship focuses on skills in food production and service through rotation in the kitchen brigade stations including Garde Manger, Breakfast and Short Order, Bakery and Pastry, Saucier, Larder & Butchery and Entremetier. Prior to the internship, students will develop the skills and necessary documentation to prepare for the workplace. **Prerequisites:** A minimum GPA 2.0 or higher in all Culinary Arts programme courses required as prerequisites; CUL 1108, CUL 1109, CUL 1110, CUL 1112, CUL 1117 |

| Introduction to Caribbean and Bermudian Cuisine          | CUL 1122       | FA      |
| Introduction to Caribbean and Bermudian Cuisine will expose the student to various commodities that are indigenous to Bermuda and the Caribbean region. This course begins by explaining the history and characteristics of these cuisines, followed by identifying the ingredients used in preparing traditional meat, seafood and vegetarian dishes. This course also covers the preparation of soups, sauces, breads, pastries, and even special Bermudian and Caribbean holiday dishes. Upon completion of this course, the student should understand the culture and common practices of cooking in Bermuda and the Caribbean. **Prerequisites:** A minimum GPA 2.0 or higher in all culinary arts programme courses required as a prerequisite; CUL 1108, CUL 1109, CUL 1110, CUL 1114 |

| Introduction to Food & Beverage Service                  | CUL 1125       | FA      |
| Through theoretical and practical applications, students are introduced to the front-of-the-house operations and professional dining room service techniques. Quality service, positive guest relations, and effective communication skills are emphasised. Students are prepared for certification through the Federation of Dining Room Professionals. **Prerequisites:** CUL 1102, CUL 1104 |

| Oriental Cuisine                                         | CUL 1127       | SP      |
| The following skills are contained in this module: demonstrating knowledge of the history and characteristics of Chinese cuisine; identifying and preparing dishes from the four main regional Chinese cuisine: Cantonese, Hunan, Peking and Szechuan; using cutting methods associated with oriental cuisine; demonstrating stir-fry and steaming methods; demonstrating Oriental Rice cookery; preparing Japanese dishes; preparing dishes of Malaysia, Indonesia and Vietnam; preparing dishes of Singapore and Thailand. **Prerequisites:** CUL 1108, CUL 1109, CUL 1110, CUL 1114 |

| International Cuisine                                    | CUL 1128       | FA      |
| This course focuses on the main regions of the world noted for regional cuisines including the South American continent, Europe, India, and the Orient. Emphasis is placed on identifying and using ingredients, equipment and utensils, cutting and cooking techniques specific to the various world regions being studied. **Prerequisites:** CUL 1108, CUL 1109, CUL 1110, CUL 1114 |

| Italian Cuisine                                          | CUL 1129       | SP      |
| The following skills are contained in this module: demonstrating knowledge of the history and development of Italian cuisine; preparing antipastos; preparing pasta dishes; preparing specialty soups and sauces; baking Italian breads and rolls; preparing Italian salads; preparing Italian desserts. **Prerequisites:** CUL 1108, CUL 1109, CUL 1110, CUL 1114 |

| American Regional Cuisine                                | CUL 1130       | FA      |
| The following skills are contained in this module: demonstrating knowledge of the history and characteristics of American Regional Cuisine; preparing dishes using regional game; preparing specialty desserts by American region; preparing vegetable dishes by region; preparing seafood dishes specific to American regions. **Prerequisites:** CUL 1108, CUL 1109, CUL 1110, CUL 1114 |

| Nutrition                                                | CUL 1131       | SP      |
| An introduction to the functions of food sources of nutrients and their utilisation in human metabolic processes. Students will be required to list the primary functions and best sources of each of the major vitamins and |
minerals and evaluate diets in terms of the recommended dietary allowances. **Prerequisites:** Satisfactory performance on College Placement Test with a minimum score of 249 in Reading Comprehension.

**Menu Planning**  
**CUL 2118 3 SP**  
This course introduces students to basic menu planning principles, menu terminology and description, food and liquor menu layout and design, menu pricing, mechanics and analysis, nutrition and health concerns, cost control, product mix, average check and impact on profit. **Prerequisite:** CUL 1102

**Techniques in Healthy Cooking**  
**CUL 2124 2 FA**  
This course will study healthy cooking techniques, nutritional guidelines in the selection and preparation of healthy food products including vegetarian and special diet meals. **Prerequisites:** CUL 1108, CUL 1109, CUL 1110, CUL 1114

**Advanced Production Cookery and Innovative Techniques**  
**CUL 2127 2 SP**  
This module incorporates the skills students have developed in the programme and provides execution of food production at a more advanced level. Students will practice innovative culinary techniques and use specialty ingredients. Food techniques include spherification, emulsification, food deconstruction, and molecular gastronomy. **Prerequisites:** CUL 1108, CUL 1109, CUL 1110

**EARTH & ENVIRONMENTAL SCIENCE**

**Environmental Science**  
**EES 1101 4 FA/SP**  
An introduction to environmental interrelationships and ethics; interrelated scientific principles; ecosystems; communities and populations; energy sources; land-use planning; soils and agriculture; water management; pollution; waste management and hazardous materials regulation; environmental policy and decision making. Laboratory.

**Climate and Our Future**  
**EES 1102 4 FA**  
An introduction to the atmosphere and its interaction with Earth’s surface and oceans: understanding the types of weather systems and climatic patterns that are influenced from this interaction. A look at the impacts of human induced climate change on our environment and society and discussion of future patterns and outcomes if climate change persists. Practical and relevant field activities.

**Discover Our World**  
**EES 1103 4 FA**  
An introduction to Earth’s lithospheric formations. Exploration of the ever-shifting face of the Earth focusing on plate tectonics, earthquake activity, volcanic eruptions, mountain building and the succession of complex ecosystems that form around our planet. Practical and field activities around Bermuda help students to understand our formation and our own unique ecosystems.

**Introduction to Oceanography**  
**EES 1105 4 SP**  
An introduction to the history and tools of oceanography and limnology; sea water composition; ocean currents, waves and tides; marine organisms; coastal processes and development; ocean resources; and lake characteristics and processes. Laboratory.

**Environmental Geography**  
**EES 2211 3 SP**  
A study of the environmental framework of the Earth; its ecosystems and bioclimatic, atmospheric, and hydrologic environments; pollution patterns, trends and impacts; hazardous waste production and disposal; biological diversity; land use; and environmental management. **Prerequisites:** 8 credits from EES 1101, 1102, 1103, or 1105 or BIO 1102 and BIO 1104, or BIO 1121 or 1122.

**Human and Cultural Geography**  
**EES 2221 3 FA**  
A study of population, language, religion, culture, agriculture, industry and politics; the impact of trade, transportation and communications on cities and countries; international relations, environmental problems and global social problems. Analysis of thematic and topographic maps. **Prerequisites:** 8 credits from EES 1101, 1102, 1103, or 1105 or 6 credits from SOC 1101 and 1102.

**Special Topics in Earth & Environmental Science**  
**EES 2298 3**  
Provides an opportunity for in-depth study at the 2000-level of a topic available as a special offering. These topics may be materials that have been initially explored at the 1000-level or new materials for which development and exploration was provided as an appropriate base at the 1000-level course. **Prerequisite:** Appropriate 1000-level courses and/or a 2000-level course relevant to the topic.

**E-COMMERCE**

**Generating Web Pages**  
**ECM 1110 3 FA/SP**  
This course covers the universe of generating web pages and/or web sites using contemporary Internet programming commands. Students will learn to use basic (tables, links, images, etc.), intermediate (frames, forms, etc.), and advanced (style sheets, multimedia, etc.) commands and functions. **Prerequisites:** A grade of “C” or better in ENG 0012 and MAT 0015
**Website Development Fundamentals**  
**ECM 1120 3**  
The aim of this course is to equip students with the skills necessary to build a basic website using web authoring software to manipulate images, construct a “mock-up” design and to put it all together. The course will also cover uploading a website to web server using FTP, updating a website and how to acquire a domain name and web hosting. Students will acquire the necessary software knowledge for website development.  
**Prerequisites:** A grade of “C” or better in ENG 0012 and MAT 0015

**E-Commerce Internship**  
**ECM 1180 3**  
Work experience in a selected local business. The experience will be in an e-commerce related area of a business or to assist a local charity in developing a website. The precise nature of the experience will be agreed upon after discussion between the College and management of the business.  
**Prerequisite:** A minimum GPA 2.0 or higher in all E-commerce programme courses necessary as prerequisites; ECM 1101, ECM 1110, MGN 1114, CIS 1120.

**Website Design**  
**ECM 2210 3**  
This course deals with the art as well as the science of generating contemporary websites. Selection of theme, concept and appropriateness to a specific organisation will be considered. Several case study situations will be explored. Other topics to be considered are structural hierarchy, navigational tools, downloads, conveyance of information, as well as psychological and socioeconomic factors inherent in existing websites. Many commercial (.com), government (.gov) and organisational (.org) websites will be critiqued. Evolving website technology will be considered: DHTML (dynamic), VRML (virtual reality = 3 dimensional) and XML (extended).  
**Prerequisite:** ECM 1120

**Web Development**  
**ECM 2215 3**  
Using appropriate software, students will learn the advanced aspects of building a professional HTML website, including pop-up windows, drop down menus, simple Java script functions, layout using CSS layers and advanced site maintenance. This course also prepares students for professional certification.  
**Prerequisite:** ECM 1110 and ECM 1120.

**Multi-Media Environment**  
**ECM 2220 3**  
This course deals with still image processing (digitising) and manipulating (editing). Students will learn to use select computerised image editors and become familiar with select image formats. This course will also deal with audio usage and select attendant formats. Students will study video usage emphasising select formats.  
**Prerequisite:** A grade of “C” or better in ENG 0012 and MAT 0015

**ECONOMICS**

**Principles of Micro-Economics**  
**ECO 1101 3**  
An introduction to economic analysis covering the problems of scarcity and choice, the allocation of resources in market and collective economies, a detailed analysis of the price mechanism, business organisation and the theory of the firm.  
**Corequisite:** One mathematics course at 1100-level.

**Principles of Macro-Economics**  
**ECO 1102 3**  
An introduction to economic analysis covering national income theory, fiscal and monetary policy, international trade, inflation, unemployment and economic growth. Attention is focused on current economic issues facing the United States and Bermuda.  
**Corequisite:** One mathematics course at 1100-level.

**Intermediate Micro-Economics**  
**ECO 2201 3**  
A detailed study of theory concerning supply and demand, consumer demand, and theory of the firm.  
**Prerequisite:** ECO 1101

**Intermediate Macro-Economics**  
**ECO 2202 3**  
A detailed study of national income theory, consumption, investment, international trade, economic growth, fiscal and monetary policy, and their relevance to current economic issues.  
**Prerequisite:** ECO 1102

**Selected Topics in Economics**  
**ECO 2298 3**  
Designed to allow students an opportunity either for in-depth inquiry into a topic covered in another 2000-level course or for the study of a special topic or theme in economics. The course is offered periodically depending upon student interest.  
**Prerequisite:** Appropriate 1000-level courses and/or a 2000-level course relevant to the topic.

**EDUCATION**

**Foundations of Early Childhood Education**  
**EDU 1102 3**  
This introductory course explores the historical, philosophical and social foundations of early childhood education. Theories, conceptual frameworks and supporting research in areas of child development and education are critically evaluated and their implications for practices are assessed. Students are encouraged to examine the forces that shape the future of early childhood education and the roles that the activities of teachers and caregivers play in that future. A minimum grade of “B” is required.  
**Prerequisite:** A grade of “C” or better in ENG 0012.
Introduction to Child Development  
**EDU 1103 3 SP**
A survey of the concepts, theories and various aspects of the development of children and adolescents. Topics include prenatal development, patterns of physical growth, sensation and perception, cognitive development, information processing, intelligence and assessment, language development and personality development. A minimum grade of B is required. **Prerequisite:** A grade of “C” or better in ENG 0012.

Foundations of Education  
**EDU 2201 3 FA**
A study of the historical, philosophical, and social foundations of education. Topics include: educational reform movements; teacher ethics, multiculturalism; the contributions of local educators to the teaching profession. The course will provide an orientation to the teaching profession. **Prerequisite:** 18 credits in Liberal Arts courses.

Children and their Environment  
**EDU 2202 3 SP**
An examination of the environmental issues that shape the lives of children and their families. The course focuses on the experience of children in multicultural, multilingual, and multiracial families. The influence of communities and policies on family functioning is examined. **Prerequisite:** EDU 2201.

Learning, Cognition & Behaviour  
**EDU 2203 3 FA**
An overview of theories of human learning and behaviour. Traditional behavioural approaches will include classical and operant conditioning and discussion of traditional behaviour management techniques (reinforcement, punishment, token economies). Social learning theory will be examined in relation to traditional approaches. Understanding of learning and behaviour to be extended by reviewing theories of memory, perception, attention, cognitive development, concept learning, information processing, metacognition and motivation. An examination will be made of the relevance of these theories to techniques for promoting learning and managing behaviour (e.g. cognitive behaviour modification, mnemonic strategies, self-regulation). **Prerequisites:** EDU 1102 and EDU 1103.

Exceptional Children  
**EDU 2204 3 SP**
The course will provide an overview of special education in relation to the inclusion policy for public schools. The historical development of special education from Roman civilisation to the 1900s will be addressed together with the various exceptionalities of children including etiologies prognosis and educational alternatives. The course includes discussions on the effect of socio-economic status, ethnic group affiliation and parental and community attitudes towards those with disabilities. The benefits of acknowledging and working with cultural diversity and its capacity to enrich and enhance curriculum will be examined. **Prerequisite:** EDU 1102.

Individual Differences in Learning  
**EDU 2205 3 FA**
Understanding of achievement as a function of the interactions between learner characteristics, task and environment. Learner characteristics will be examined in terms of modalities of learning, cognitive processing styles, language, memory, attention, culture and motivation. The nature of tasks will be examined in relation to match with learner characteristics; breakdown; error analysis; and the use of compensatory strategies. The environment will be viewed as existing beyond the immediate setting and extended to learners’ availability for learning. Discussion will focus on “the most facilitative environment” (particularly as it relates to inclusion) and adapting the environment to learner strengths and weaknesses. **Prerequisite:** EDU 1102.

Personal, Social-Emotional Development of Children & Adolescents  
**EDU 2206 3 FA**
An examination of the personal, social-emotional and personality development of children and adolescents. **Prerequisites:** EDU 1102 and EDU 1103.

Interventions and Support Services for Children and Adolescents  
**EDU 2231 3 SP**
A survey of the learning and behaviour difficulties that children and adolescents may experience. Assessment and identification of these difficulties during infancy, early childhood and adolescence will be discussed. Students will learn ways to prevent learning and behaviour problems and diffuse disruptions in the classroom. Recommendations, strategies, techniques and interventions for implementation will be offered. Additionally, students will become familiar with the support services provided in schools and in the community for children and adolescents. **Prerequisite:** EDU 1102.

Classroom Management  
**EDU 2251 3 SP**
Exposes students to a range of evidence-based classroom management strategies and techniques for prevention and intervention of inappropriate behaviours. Course content will explore the theoretical assumptions of various models and, through active learning, explore practical application of their strategies. While many approaches will be studied, the major emphasis in the course will be on creating safe, respectful and culturally reflective learning environments through developmental, academic and constructivist approaches. **Prerequisites:** PSY 1102 and EDU 1102 or EDU 2201.

Early Childhood Education Experience  
**EDU 2265 6 FA/SP**
A practical experience with children and/or youth to be conducted in a Bermuda College approved setting under the guidance of a professional. This practicum is undertaken on the approval of the programme advisor.
Prerequisites: Minimum GPA 2.0 and the completion of EDU 2231, EDU 2251 and EDU 2204 or EDU 2205.

Special Themes and Topics in Child and Youth Studies  EDU 2298 3
Designed to allow students an opportunity either for a more in-depth inquiry of a 2000-level topic or for the study of a special topic or theme in Child and Youth studies. The course is offered periodically depending on student interest. Prerequisite: A 2000-level course in the subject area.

ELECTRICAL WIRING

How to Study This Course and Achieve Your Personal Goals  ELN 1101 1  FA
The following topics are contained in this module: How to study this course and achieve your personal goals; The attributes of an IBEW/NECA apprenticeship; Knowing your apprenticeship and your responsibilities; The IBEW and its history; The structure of NECA and its heritage; Your job and the future it holds for you; Sexual harassment; Electrical safety.

Introduction to Test Instruments and Overcurrent Protection Devices  ELN 1102 1  FA
The following topics are contained in this module: Identifying some basic tools of the trade; The workplace of an electrical worker; The proper care and use of ladders; The installation and use of fastening devices; Reality of electrical shock; Introduction to test instruments; Introduction to overcurrent protection devices; Understanding the design and function of ground fault interrupters.

Building Wire Construction and Insulation Properties  ELN 1103 1  FA
The following topics are contained in this module: Learning to tie basic knots; Using hand signals; Hoisting loads properly; How wire connectors are made and installed; Building wire construction and insulation properties.

Conduit Fabrication – Theory and Practice  ELN 1104 1  FA
The following topics are contained in this module: How building wire is sized; How to work with fractions; Review of basic trigonometric functions; How to fabricate ninety degree stubs, kicks and offsets in electrical conduit; How to fabricate 3 & 4 bend saddles in electrical conduit.

The Metric System and Metrication Changes  ELN 1105 1  FA
The following topics are contained in this module: Working with aluminium conductors; Identifying commonly used electrical materials; Working with prefixes and powers of ten; The Metric System; How to solve basic algebraic equations; How to manually calculate the square root.

Fundamentals of Blueprint Reading and Sketching  ELN 1106 1  FA
The following topics are contained in this module: The fundamentals of blueprint drawing and sketching; Understanding architectural views and how to draw them; Understanding common scales used on blueprints; Working with blueprint specifications, elevations, and schedules; Understanding and drawing electrical and mechanical symbols used on blueprints; Reading and analysing a residential blueprint.

DC Theory: OHM’S Law  ELN 1107 1  SP
This module introduces the student to one of the most fundamental laws in all of electricity and electronics - Ohm’s Law. Other topics include: What is electricity; Electrical units and Ohm’s Law; The properties of power in an electrical circuit; Power in DC circuits; An introduction to electrical and electronic devices; The potential hazards of energised circuits; How to draw basic electrical circuits.

The DC Series Circuit  ELN 1108 1  SP
This module introduces the student to the DC series circuit. The topics covered are: Calculating resistance in a DC series circuit; How current reacts in DC series circuits; How voltage functions in a DC series circuit; Working with ratio and proportion; How voltage dividers work in a DC series circuit; How to calculate power in a DC series circuit. In addition to the DC theory, there are nine lab assignments that give the student hands on experience with actual DC series circuits.

The DC Parallel Circuit  ELN 1109 1  SP
This module introduces the student to the DC parallel circuit. The topics covered are: How voltage functions in a DC parallel circuit; Calculating resistance in a DC parallel circuit; Understanding resistance in a DC parallel circuit; How current reacts in a DC parallel circuit; How current dividers work in a DC parallel circuit; How to calculate power in a DC parallel circuit. This module also includes seven lab assignments that investigate the various characteristics of the DC parallel circuit.

The DC Combination Circuit  ELN 1110 1  SP
This module introduces the student to the DC combination circuit. Topics covered are: Calculating resistance in a DC combination circuit; How to calculate current in a DC combination circuit; How voltage functions in a DC combination circuit; How to calculate power in a DC combination circuit; Understanding voltage polarity and voltage drop; Understanding the design and operation of the three wire single-phase system; Understanding the principles of magnetism and electromagnetism. Eight labs are included in this module which provides the student with a thorough understanding of the DC combination circuit.
### Norton’s and Thevenin’s Theorems and Kirchoff’s Laws

**ELN 1111 1 SP**
This module introduces the student to Norton’s and Thevenin’s Theorems and Kirchoff’s voltage and current laws. Topics include: How electrical generators produce electrical current; Applying the Principles of Superposition to circuit calculations; Using DC theory principles to solve real world problems; Kirchoff’s voltage and current laws; Thevenin’s and Norton’s Theorems. Eight lab assignments provide the student with a thorough understanding of the theory and application of Thevenin’s and Norton’s Theorems and Kirchoff’s voltage and current laws.

### An Introduction to the National Electrical Code

**ELN 1112 1 SP**
This module is the first of twelve powerful and comprehensive courses on the understanding, structure, language and application of the National Electrical Code. Topics include: Introduction to the NEC (National Electrical Code); Understanding and applying article 110 of the NEC; Interpreting the language of NEC article 100; General building wire properties and the NEC; Understanding conductor insulation and NEC specifications; Understanding the NEC process; Introduction to wiring devices; General requirements related to wiring devices; Specific receptacle and switch installation requirements.

### Testing and Measuring with the Analog and Digital Multimeter

**ELN 2113 1 FA**
This module introduces the student to test instruments. In addition, the student is given the training that will enable him or her to measure electrical properties safely and efficiently. Seven intense labs provide the necessary hands on training for this very important module. Topics include: Avoiding the hazards of drug abuse; The IBEW Constitution; Understanding your local union by-laws; Parliamentary procedure and how it works; Introduction to the Comet Programme; Getting acquainted with Electrical Test instruments; Understanding and Using Multimeters.

### Developing NEC Code Book Skills

**ELN 2114 1 FA**
This module continues to build and strengthen the student’s knowledge of the NEC and also requires the student to solve code related job problems in the classroom setting under the guidance of a Code Certified Instructor. Topics include: Developing code book skills; Development of the NEC: The table of contents; The arrangement, structure, and language of the NEC; Codeology fundamentals; NEC article 90 introduction; Applying the NEC’s “General Chapter”. Included are twenty class participation workshops that enable the student to apply this knowledge to solving “on the job” problems.

### Understanding the Design and Function of AC and DC Generators

**ELN 2115 1 FA**
This module introduces the student to the oscilloscope and AC and DC generators. Topics include: Reviewing the applications of DC theory; Comparing direct current to alternating current; Using oscilloscopes to view AC waveforms; Testing and verifying circuit performance; An introduction to three phase systems; Circuit calculations for basic systems; Understanding how the DC generator works; understanding the design and function of AC generators; Becoming familiar with AC resistive circuits. Eleven labs are included which give the student the training, confidence and capability to safely test and measure various electrical quantities.

### Laying-Out Residential Circuits and Basic Estimating

**ELN 2116 1 FA**
This module builds on the introductory blueprint reading skills learned from year one. The following topics are contained in this module: Reviewing the basic fundamentals of blueprints; Analysing and laying out residential circuits; Understanding job costs and how to do an actual quantity takeoff; Understanding, interpreting and evaluating blueprint specifications; Interpreting blueprint schedules and locating components on the print; Becoming familiar with blueprint systems integration; Learning how to effectively use blueprints; Understanding and using ratchet type benders; The fundamentals of segment and concentric bending; Understanding how to install wire and cable.

### AC Theory: Inductance and How it Affects a Circuit

**ELN 2117 1 FA**
This module introduces the student to Inductance and how it affects an AC circuit. It also lays the ground work for solving problems in AC circuits and the operation of transformers and other inductive devices. Topics include: Becoming familiar with inductive reactance; Frequency and inductive reactance; Inductors in series and parallel. Six labs allow the student to gain practical experience with series and parallel circuits.

### AC Theory: Capacitance and How it Affects a Circuit

**ELN 2118 1 FA**
This module introduces the student to the third quantity of an AC circuit-capacitance. Topics include: How capacitance affects a circuit; Becoming familiar with capacitive reactance; Working safely with capacitors; Working with capacitors in series or parallel; Understanding vectors and how to use them effectively. Seven labs provide practical circuits for the student to analyse.
Working with Series and Parallel RL & RC Circuits ELN 2119 1 SP
This module introduces the student to series and parallel RL circuits and series and parallel RC circuits; Topics include: Understanding the basic characteristics of AC circuits; Comprehending the parameters of series RL circuits; Understanding and working with parallel RL circuits; Comprehending the parameters of series RC circuits; Understanding and working with parallel RC circuits. Fifteen lab assignments give the student a thorough knowledge of series and parallel RL and RC circuits.

Analysing and Working with Combination RLC Circuits ELN 2120 1 SP
This series of lessons provides the necessary information, along with twenty-one lab assignments, for the student to solve job problems for both series and parallel circuits containing resistance, inductance and capacitance. Topics include: Identifying and working with LC circuits; Comprehending and analysing series RLC circuits; Resonance in parallel circuits; Comparing series and parallel RLC circuits; Analysing and working with Combination RLC circuits; Series resonance; Parallel resonance; Clearly and accurately describe the characteristics of series and parallel resonant circuits.

Filters, Power Factor and Power Factor Correction ELN 2121 1 SP
This module introduces the student to the theory and operation of various types of filters and their application. In addition, the student will examine power factor and power factor correction. Topics include: An examination of the four classifications for filters; Power factor; Power factor correction. Six labs give the student the training and the confidence to solve problems involving filters and power factor on the job.

Understanding the Principles of Three Phase Systems ELN 2122 1 SP
This module introduces the student to the fundamental design and function of single and three phase transformers. Topics include: Understanding the fundamental design and function of transformers; Learning how to identify and make single-phase transformer connections; Proper transformer installation procedures; Understanding the principles of three-phase systems; Learning how to identify and connect three phase transformers. Six lab assignments give the student practical hands on experience with the various types of transformer connections used in industry.

NEC – Branch Circuits 1 & 2 and Feeders and Services ELN 2123 1 FA
This module allows the student to make use of Table 8 in chapter 9 of the NEC to investigate the properties of various conductor sizes. The student will use his/her knowledge of the NEC to work with branch circuits, services and feeders. Topics include: The principles involved in sizing building wire; Calculating conductor ampacity; Branch circuits 1 & 2; Outside branch circuits and feeders; Services 1; Lighting and receptacles.

NEC – Requirements for Cable Assemblies & Wiring Methods ELN 2124 1 FA
This module focuses on the various wiring methods recognised by the NEC. In addition, the student will become acquainted with many of the terms the NEC uses in conjunction with conduit wiring methods. Topics include: How to correctly apply the NEC’s conduit wiring methods; The NEC’s requirements for cable assemblies; Identifying boxes and fittings as defined by the NEC; Wiring methods - general installation requirements; Wiring methods - specific; Electrical nonmetallic tubing (ENT)

Health and Safety ELN 3125 1 FA
This module introduces the student to Electrical Safety and Electrical Hazard Awareness. After completing this module the student will be able to identify electrical hazards and understand their effects on the human body. The student will have the opportunity to examine many of the actual case studies included in this course. Topics include: American labour history; Electrical safety culture and Electrical hazard awareness; Design and work practice considerations; Layout of NFPA 70E; An overview of 70E concepts; Electrical safety programme and training requirements; Achieving an electrically safe work condition; Working on or near live parts; Approach boundaries to live parts; Personal and other protective equipment and protective clothing; Calculation of fault currents and implementation.

Advanced Blueprint Reading: Industrial Specifications ELN 3126 1 FA
This module builds on all previous blueprint reading lessons. The student works with an actual set of industrial specifications and blueprints. With practice the student will be able to: read and understand general industrial specifications; understand and explain site plans; read and interpret feeder diagrams and panel schedules; comprehend and discuss electrical, power, lighting and communications drawings. Topics include: Review and introduction; Industrial specifications; Industrial prints 1, 2 and 3.

Semiconductor Theory ELN 3127 1 FA
This module introduces the student to semiconductor electronics. Understanding the basics of semiconductors is essential for proper installation and maintenance of today’s electrical systems. Topics include: Semiconductor diodes; Zener, light emitting and other diodes; Understanding the basic functions of diodes and rectifiers; Power supplies. Ten lab assignments give the student the hands-on training and capability to work safely and confidently on a variety of diodes and power supplies.
BJTs, MOSFETs, and Other Transistor Types  ELN 3128 1  FA
This module introduces the student to more complicated electronic circuits involving PNP and NPN transistors along with JFETs, MOSFETs and other transistor types. Fifteen intensive lab assignments give the student the training and capability to apply theoretical principles to actual circuits found in industry. Topics include: JFETs, MOSFETs; VMOS Transistors; Amplifiers 1; Amplifiers 2.

Differential & Operational Amplifiers  ELN 3129 1  FA
This module builds on all previous lessons of the series on Semiconductor Electronics. Thirteen powerful and practical lab assignments give the student hands-on experience with actual circuits and devices found in residential, commercial and industrial applications. Topics include: Differential and operational amplifiers; Oscillators; The IC 555 timer; Electronic applications; Optoelectronics; Fiber optics.

Grounding and Bonding Fundamentals  ELN 3130 1  FA
This is the first of series of twenty-two lessons that focus on the important subject of grounding and bonding as required by the NEC. The course begins with a review of electrical theory as it relates to the grounding of systems. Topics include: Grounding and bonding fundamentals; NEC system grounding; Grounding AC Systems; Grounding electrical services; Service equipment; Main bonding jumpers.

The Grounding Electrode System  ELN 3131 1  SP
This module introduces the student to the Grounding Electrode System. The student will learn the function of grounding electrodes in the electrical system and describe how to install and establish a grounding system. Topics include: The grounding electrode system; The grounding electrode conductor; Bonding enclosures and equipment; Equipment grounding conductors; Enclosure; Equipment grounding.

Personnel Protection and Ground Fault Protection of Equipment  ELN 3132 1  SP
The primary focus of this module is the protection of personnel and equipment. Topics include: Ground faults and short circuits; Separately derived systems; Grounding at separate buildings; Protection of personnel; Protection of equipment; Special location requirements for grounding and bonding.

Grounding and Bonding of Electronic Equipment  ELN 3133 1  SP
This module will familiarise the student with the special grounding and bonding requirements for electronic equipment. Topics include: Requirements for grounding and bonding of electronic equipment; Low voltage intersystem grounding and bonding; Requirements for grounding and bonding systems over 1000 volts; An overview of NEC Article 250; Introduction to Earth Testing; The principles and methods used for earth testing.

Review of the Theory of Three Phase Transformers  ELN 3134 1  SP
This module deals with the technical or theory side of transformer connections. The student will learn how to identify the uses of different WYE and DELTA three-phase systems; list the advantages and disadvantages of three phase transformers; describe how to use a delta connection and when to use a wye connection; how to draw wye and delta connections for three phase transformers. Three lab assignments provide the student with the training and the practical experience to work with actual transformer connections he or she will encounter in the workplace. Topics include: A review of three-phase transformer theory; Review of WYE and DELTA three-phase transformers.

NEC: Overcurrent Protection  ELN 3135 1  SP
This NEC module focuses on the overcurrent protection devices required for branch circuits, feeders and services. In addition, the student will learn about the tap rule requirements for the different types of tap conductors. Topics include: Overloads, short-circuits and ground-faults; Selection of overcurrent protection devices (OPCD); Types of OPCD-Circuit Breakers; Type of OCPD-Fuses; Branch circuits; Feeders and services; Conductor tap rules; Supervised industrial installations.

NEC: Transformer Protection and Ground Fault Protection  ELN 3136 1  SP
This module focuses on three important NEC considerations: (1) Transformer Protection; (2) Ground Fault Protection; (3) Motor Overload Protection. Topics include: Transformer protection - NEC Article 450; Motor branch circuits NEC - Article 430; Ground fault protection; Component protection - NEC Article 119.10; Motor overload and single-phasing protection; Motor and group motor protection and devices - NEC Article 430.

Designing and Installing Lightning Protection Systems  ELN 4137 1  FA
This module introduces the student to lightning protection and the devices used to wire a lightning protection system. In addition, the student will learn how to define the terms associated with lightning protection equipment and installation. Identify the different types of lightning protection systems and the parameters which define them. Follow general installation layout and design details for lightning protection systems. Topics include: Becoming familiar with lightning protection systems; Designing and installing lightning protection systems; Rules, acronyms, glossary and formulas; Magnetism, electromagnetism and induction.
AC Alternators  ELN 4138 1  FA
This module introduces the student to the construction and operation of three-phase alternators and their ratings. The student will study and closely examine three-phase synchronous motors and analyse the various applications of the design and construction of polyphase motors with code letters A through F. Topics include: AC alternators; The rotating field in the polyphase motor; Polyphase motors; Wound-rotor motors; Synchronous motors; Alternating field in a single-phase motor.

The Principles of Electronic Variable Speed-Control  ELN 4139 1  FA
This module provides the student with detailed information about the design, construction and operating characteristics of a single phase motor. The split-phase, capacitor start, capacitor-start and run, shaded pole and repulsion type motors are given detailed attention. In addition, the student will study the principles of electronic variable speed motor control for AC motors and describe voltage-voltage and variable-frequency speed control methods. Topics include: Single-phase motors; DC motors; Principles of electronic variable-speed control; Electronic variable-speed drives; Other motors; Installing motors, pulleys and couplings.

Motor Starters, Contactors and Control Relays  ELN 4140 1  FA
This module will allow the student to explore the construction of starters, their purposes, uses and sizing. Internal components such as contacts and coils are examined in detail. In addition, the student will study contactor construction, operation and uses with focus on electromagnetic contactors and their use in motor starters. Topics include: History of motor control 1 & 2; Motor starters 1, 2 & 3; Contactors and control relays 1, 2 & 3.

Manual and Automatic Operating Devices  ELN 4141 1  FA
This module introduces the student to Manual Operating Devices, Automatic Operating Devices and Control Diagrams and Drawings. Topics include: Manual operating and indicating devices; Automatic operating devices; Control diagrams and drawings.

Timing Devices and DC Motor Controls  ELN 4142 1  FA
This module introduces the student to two and three wire control circuits; he or she will be able to explain automatic vs. semiautomatic control and draw ladder diagrams from a written description of process operation. In addition, the student will examine and study solid state timing devices and describe the special construction, sizing and operation of DC motor starters. Topics include: Control diagrams and drawings 4; Timing devices 1, 2 and 3; Special techniques and components 1, 2 and 3; DC motor controls 1 and 2.

AC Motor Speed Control and Troubleshooting  ELN 4143 1  SP
This module concludes our study of DC motor controls with a close examination of some basic concepts for DC applications that incorporate dynamic braking. The student will explore the basics of variable frequency drives and the physics behind how they control the speed of AC motors. The student will learn how to install, maintain and troubleshoot various types of variable frequency drives. Manufacturing standards and troubleshooting motor control circuits complete this exhaustive study of AC motor speed control. Topics include: AC motor speed control 1, 2 and 3; Manufacturing standards 1 and 2; Troubleshooting 1, 2 and 3.

Introduction to Digital Electronics and Boolean Algebra  ELN 4144 1  SP
This module introduces the student to the interesting and exciting topics-Digital Electronics and Boolean Algebra. The student will learn that Boolean Algebra is a basic tool in understanding digital circuits and incorporates the AND, OR and NOT digital operatives. The student will learn how to: write the Boolean expression for a logic circuit; develop a truth table from a Boolean equation; develop a truth table from a digital circuit; simplify a logic circuit using the laws; operatives and theorems of Boolean Algebra. Topics include: Introduction to digital electronics; Introduction to Boolean Algebra; AND Logic; OR Logic; Buffers and inverter amplifiers; NAND and NOR Logic; XOR and XNOR Logic; Digital switching circuits. Eight comprehensive lab assignments give the student the experience and capability to solve problems involving digital circuits commonly found in the workplace.

The Allen Bradley SLC 500 Family PLC's  ELN 4145 1  SP
In this module, the student will learn about the physical characteristics of Programmable Logic Controllers. Specifically, the Allen Bradley SLC 500 family of PLC's and the SLC 5/03 processor. In addition, the student will learn about the Rockwell RSLogix 500 Programming Software: the binary number system and related number systems; Ladder programming basics using the RSLogix Software; Programmable controller timers; Programmable controller counters; Shift registers and sequencers. Topics include: System components in a SLC 500 Modular PLC System; Programmable controller installation; Programmable controller fundamentals; PLC Programming software; Numbering systems; Introduction to Ladder Programming 1 & 2; Advance Programming Instructions; Timers and counters; Shift registers and sequencers.

Fundamentals of Air Conditioning and Refrigeration  ELN 4146 1  SP
This module introduces the student to the typical mechanical refrigeration components as well as the refrigeration cycle. The student will learn how

<td>ELN 5153</td>
<td>FA</td>
</tr>
<tr>
<td>This module introduces the student to security systems. While there are a number of systems available, this course uses the Sentrol ZX400/ZX410 as its source of information. The student will learn that this particular system is very much like many others and much of the knowledge obtained studying the Sentrol Security System is applicable to other security types as well. In addition, the student will study Telephone Wiring. Topics include: Basic security system; Magnetic contacts; Passive infrared motion detectors; Glassbreak sensors; Basic telephone wiring; Safety codes; TIA/EIA Standards and codes; Structured cabling systems.</td>

<td><strong>Solar Power Generation and Fuel Cell Basics</strong></td>
<td>ELN 5155</td>
<td>SP</td>
</tr>
<tr>
<td>This course focuses on two very important alternative energy topics: Solar Power and Fuel Cell Technology. The student will study the provisions of NEC Article 690 and how they apply to Solar Photovoltaic energy systems and the Array Circuits. Topics include: NEC requirements for solar power generation; Information technology sites and critical loads; Uninterruptible power generation; HVAC-electrical conditioning and refrigeration systems. This module also includes an introduction to cable faults. The student will explore some of the conditions that lead to cable failure, the types of faults along with some of the methods and equipment used to locate the cable fault. Topics include: Electrical controls for AC/R systems; Trouble shooting AC/R systems; Introduction to cable faults; Locating cable faults 1, 2 and 3.</td>

<td><strong>NEC: Hazardous-Locations Wiring Methods and Equipment</strong></td>
<td>ELN 4148</td>
<td>SP</td>
</tr>
<tr>
<td>This module focuses on NEC Article 500-Hazardous Locations. The student will learn about the NEC classification system for hazardous substances and how they are grouped according their potential for hazard. In addition, the student will learn how to use the NEC to answer specific questions about generators, transformers and vaults, capacitors, resistors reactors and storage batteries; identify what the Code considers in special equipment; Locate information applicable to special equipment in NEC chapter 6; Calculate branch circuit conductor ampacities and sizes for special equipment. Topics include: Hazardous Locations-Classifications; Hazardous Location-Wiring Methods and equipment; Special occupancies; Electrical equipment; Special equipment.</td>

<td><strong>Solar Power Generation and Fuel Cell Basics</strong></td>
<td>ELN 5155</td>
<td>SP</td>
</tr>
<tr>
<td>This course focuses on two very important alternative energy topics: Solar Power and Fuel Cell Technology. The student will study the provisions of NEC Article 690 and how they apply to Solar Photovoltaic energy systems and the Array Circuits. Topics include: NEC requirements for solar power generation; Information technology sites and critical loads; Uninterruptible power generation; HVAC-electrical conditioning and refrigeration systems. This module also includes an introduction to cable faults. The student will explore some of the conditions that lead to cable failure, the types of faults along with some of the methods and equipment used to locate the cable fault. Topics include: Electrical controls for AC/R systems; Trouble shooting AC/R systems; Introduction to cable faults; Locating cable faults 1, 2 and 3.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
power supplies; Infrastructure components; Critical UPS systems design configurations; Solar photovoltaic systems-recommended practices (1), (2) and (3); Fuel cell basics; Fuel cell applications (1) and (2).

High Voltage Testing  
**ELN 5156 1 SP**
This module introduces the student to high voltage testing. The student will learn what high voltage testing is and why it is used; list the types of high voltage tests and describe when they are used; describe the types of leakage currents that are present during these tests; describe the advantages of AC and DC testing; describe the different types of test instruments used in conducting high voltage tests. Topics include: Introduction to high voltage testing; High voltage testing safety; Preparing for high voltage testing; Insulation quality testing; Acceptance and maintenance testing; Insulation testing using the megohmmeter.

Harmonics and Power Quality Surveys  
**ELN 5157 1 SP**
This module introduces the student to Power Quality. The student will review the various systems that comprise a modern power distribution system. He or she will learn why Harmonics is considered to be one of the most significant power quality problems found in electrical distribution systems today. Topics include: Power distribution systems; Power quality terminology, Costs and concepts; Types of power problems; Harmonics; Power quality surveys; Power system troubleshooting; Mitigation equipment.

Automation Networks  
**ELN 5158 1 SP**
In this module the student will learn what automation networks are and how they are different from traditional wiring systems in buildings. In addition, the student will study about the advantages of a network infrastructure over dedicated wiring systems. Topics include: Introduction to automation networks; Automation network fundamentals; Installing building automation networks; Intelligent nodes and network devices; Integrating building automation networks.

Understanding Emergency Building Installation Requirements  
**ELN 5159 1 SP**
This module serves as a review of earlier lessons on NEC Article 230 services. In addition, it will cover items like GPPE for Services under 600 volts nominal or less and the installation requirements for services exceeding 600 volts nominal. The student will study NEC Article 725-remote control signalling and examine the significant change to the 2005 Code. Topics include: Installing electrical services; Pools, Fountains and similar locations; Understanding emergency building installation requirements; Over 600 volt installations; Remote control signalling and power limited circuits; NEC 2005 (1) & (2); Determining conductor ampacity.

Electrical Load Calculations as per the NEC  
**ELN 5160 1 SP**
This final Code lesson concentrates on various load calculations for single and multifamily residential units. Topics include: Calculating raceway fill; Box size and fill calculations; Introduction to load calculations; Calculating range loads as per the NEC; Calculating residential loads as per the NEC; Calculating multifamily dwelling loads as per the NEC.

**ELECTRONICS TECHNOLOGY**

Introduction to the Trade  
**ELT 1109 2 FA**
This module introduces the role of the electronics technician in industry with emphasis on health and safety features. Subjects included are as follows: Opportunities in the industry; Integrated building management systems; Rules, regulations and standards; Certification and licensing; Responsibilities as an employee; Professional obligations; Obligations to customers; Courtesy and respect; Communicating as a professional; Teamwork; Conflict resolution; Industry standards and building codes; Documentation and paperwork; The history of apprentice training and modern apprenticeship training; Tools of the trade. The module also introduces: Construction materials and methods; Building materials including engineered wood products; Masonry materials and metal; Residential frame construction; Commercial construction methods; Fire-rated and sound-rated construction; Tools used for running cable; Project schedules.

Pathways and Spaces Fasteners and Anchors  
**ELT 1110 1 FA**
Skills gained in Construction Materials and Methods will be helpful in learning the proper mounting techniques for raceways and electronic equipment. Topics covered will include the following: NEC Articles 250 – Grounding through to the NEC 800 Articles – Communications Systems; Raceways; Types of conduit; Metal conduit fittings; Bushings and locknuts; Sealing fittings; Cable and raceway supports; Surface metal and non-metallic raceways; Cable trays; Storing raceways; Handling raceways; Underground systems; Metallic and non-metallic boxes; Making a conduit-to-box connection; Construction procedures; Overview of cable distribution. This module also covers the hardware and systems used by a low voltage technician to mount and support boxes, receptacles, and other electrical components. Trainees learn the various types of anchors and supports, their applications, and how to install them safely.

Job-Site Safety and Craft-Related Mathematics  
**ELT 1111 1 FA**
This module covers safety rules and regulations for electricians. Trainees learn the necessary precautions to take for various electrical hazards found on the job. It also teaches the OSHA-mandated lockout/tagout procedure. Topics included are as follows: Electrical shock; Reducing your risk; OSHA; Ladders and scaffolds; Lifts, Hoists, Cranes; Lifting; Basic tool safety; Confined space entry procedures; First aid; Solvents and toxic
vapours; Asbestos; Batteries; PCBs; Fall protection. This module expands on the knowledge gained in the Core Curriculum Basic Math Module. Emphasis is placed on the metric system, including conversion between corresponding English and metric system units. Also covered are the use of scientific notation, powers and roots, the basic concepts of algebra, geometry, and right-angle trigonometry.

Hand Bending of Conduit and Low-Voltage Cabling ELT 1112 2 FA
This module provides an introduction to conduit bending and installation. It also covers the techniques for using hand-operated and step conduit benders, as well as cutting, reaming, and threading conduit. Subjects covered are as follows: Cutting conduit with a hacksaw, Cutting conduit with a pipe cutter, Reaming conduit, Threading conduit, Cutting and joining PVC conduit; Hand bending equipment, Geometry required to make a bend, Making a 90 degree bend, Gain, Back-to-back 90-degree bends, Parallel offsets, Saddle bands, Four bend saddles. This module also covers the makeup, identification, and applications of various types of conductors and cables used in telecommunications and security systems. It describes the tools, materials, and procedures for pulling cables through conduits and raceways. Topics covered are as follows: Low-voltage cable conductors & insulation; Low voltage and optical fibre cables; NEC classifications and ratings; Commercial cable installation; Residential low-voltage cable installation; Interior low-voltage cabling installation requirements; Telephone systems; Electromagnetic interference (EMI) considerations.

Fundamentals of Electric Circuits ELT 2113 2 SP
This module offers a general introduction to the electrical concepts used in Ohm’s law as applied to DC series circuits. It includes atomic theory, electromotive force, resistance, and electrical power equations. This module introduces series, parallel, and series-parallel DC circuits and covers Kirchhoff’s voltage and current laws and circuit analysis. The module then introduces AC theory, circuits, and components including inductors, capacitors, and transformers. It covers the calculation of reactance and impedance in RL, RC, LC, and RLC circuits using math and vector analysis. The module also provides an introduction to the principles of electronics and semiconductor theory, components, and applications. Laboratory exercises provide confirmation of theory and practice with test equipment.

Test Equipment Quality, Grounding & Blueprints ELT 2114 2 FA
This module covers selection, inspection, use, and maintenance of analog and digital meters used in the installation and checkout of electronic systems. Topics included are as follows: Meters; Ammeter; Voltmeter; Wattmeters; Frequency meters; Cable testers; RF analysers used in RF analysers. Also introduces the trainee to computer troubleshooting. This module covers: Test devices such as oscilloscopes; Signal generators, meggers, wattmeters, frequency meters, cable testers; RF analysers used in troubleshooting cable systems. Laboratory included.

Ohmmeter; Volt-Ohm-Milliammeter; Digital Meters; Continuity Testers. The module introduces grounding and bounding of electrical systems. National Electrical Code (NEC) regulations pertaining to grounding and bounding are thoroughly covered. Equipment and devices used for grounding and bounding, including their methods of installation, are covered. Also introduced is an explanation of power quality, along with the causes and effects of poor power quality. Equipment and devices used to maintain good power quality are covered. This module introduces electrical prints, drawings, and symbols. Trainees learn the types of information they can find on schematics, one-line drawings, and wiring diagrams. Laboratory included.

Switches, Timers, Cable Terminations, Codes and Standards ELT 2115 3 SP
This module presents the principles of operation and describes the different types and configurations of switches, relays, timers, and photoelectric devices. Guidelines for the selection of appropriate devices using specification sheets are also covered. The module provides information and detailed instructions for selecting, installing, and testing connectors and other terminating devices on the various cables used in low-voltage work, including telecommunications, video and audio, and fibre optics. The module describes the scope and content of the major codes and standards that apply to the telecommunications, life safety, security, and other low-voltage systems. Emphasis is placed on familiarisation with and use of the National Electrical Code (NEC). Laboratory included.

Computer Applications and Advanced Test Equipment ELT 2116 3 SP
This module provides an introduction to computer hardware and software, as well as the types and uses of computer networks. Explains many terms used in conjunction with computers and computer networks. Also introduces the trainee to computer troubleshooting. This module covers: Test devices such as oscilloscopes; Signal generators, meggers, wattmeters, frequency meters, cable testers; RF analysers used in troubleshooting cable systems. Laboratory included.

Cable Selection Busses & Networks Fiber Optics ELT 2117 4 FA
This module introduces the types of cable used for various low-voltage installations. It also covers the methods used to select the proper size and type of cable for a typical installation. This module provides information on connecting computers and components. It includes various methods for connecting computers in a network and connecting controls and equipment in a control system and it provides information on how data is transferred between the nodes in a network. This module introduces the
Course Descriptions - Credit Courses

types of equipment and methods used in fibre-optic installation. Topics covered are as follows: Introduction; Theory and components; Transmitters and receivers; Connectors, couplers and splices; Working with Fibre-Optics; Splicing; Testing; Review; Module examination; Performance testing. Laboratory Included.

Video Systems and Wireless Communication  ELT 2118 2  FA
This module introduces video technology, and it explains uses that include video display for public, educational, and business applications. It identifies new and existing technologies and emphasises integration issues. Topics covered are as follows: Introductions and overviews; Video displays; Video processing and distribution; Laboratories; Review; Module examination; Performance testing. This module introduces the operating principles and equipment used in common types of radio frequency (RF) and infrared (IR) wireless communication systems. The systems covered include RF communications systems, IR-controlled systems, power line carrier (PLC) systems, RF and IR wireless computer networks, and satellite communication systems. The equipment used for testing and troubleshooting wireless communications systems is also covered. Laboratory included.

Site Survey Project Planning Maintenance & Repair  ELT 2119 2  FA
This module covers the tasks involved in planning a job from start to finish, including how to perform site surveys for both new and retrofit construction projects. The different kinds of drawings, specifications, and other documents commonly used while performing these tasks are also covered. This module introduces background information and tasks involved in maintenance and repair of low-voltage systems and equipment. A systematic approach, component-level troubleshooting and methods of identifying common types of repairs. Background information and general guidelines for various preventive maintenance tasks are also covered. Laboratory included.

Introductory Skills for the Crew Leader & Rack Systems  ELT 2120 2  FA
This course introduces the basic leadership skills a crew leader needs in order to supervise a crew. Trainees will learn about the following: The construction industry today; Construction organisation; Team building; gender and minority issues; Communication; Motivation; Problem solving; Decision making; Safety; Project control. This module introduces the trainee to the various types of equipment racks used to house electronic equipment. The module also covers grounding and ventilation requirements for racks and rack mounted equipment. Laboratory required.

Fire Alarm and Intrusion Detection Systems  ELT 3121 4  SP
This module covers the basics of fire alarm and intrusion detection systems, including devices, circuits, system design and installation guidelines, power requirements, control panel programming, testing, and troubleshooting. It is recommended that the trainee shall have successfully completed the Core Curriculum and Electronic Systems Technician Levels one through three. Laboratory required.

Audio and Nurse Call and Signalling Systems  ELT 3122 5  SP
This module covers the various elements of a basic sound reinforcement system, including speakers, microphones, and signal processing equipment, along with their installation and testing requirements. The module also introduces the trainee to the nurse call systems used in various types of health care facilities. Laboratory included.

CCTV Systems and Broadband Systems  ELT 3123 2  SP
This module covers the equipment used in CCTV systems, as well as the methods used to integrate these components into systems that meet surveillance needs of different users. The module also introduces the trainee to the operation, maintenance, and troubleshooting procedures pertaining to broadband systems. The broadband systems covered include cable television (CATV) systems, satellite master antenna television (SMATV) systems, and master antenna television (MATV) systems. Laboratory included.

Access Control Systems and Systems Integration  ELT 3124 3  SP
This module covers the basics of access control systems, including devices, circuits, system design and installation guidelines, power requirements, control panel programming, testing, and troubleshooting. The module also explains the considerations for integration of various automated building systems. It covers communications, network configuration, system performance, programming considerations, and user interface. Laboratory included.

System Commissioning, User Training and Media Management  ELT 3125 1  SP
This module explains the system commissioning process used to verify the correct operation of a system following installation; and provides guidance to technicians who must train user personnel in the operation of a new system. The module also introduces the trainee to the methods used to store and distribute electronic media such as photographs, text, video, audio recordings, and presentations. Laboratory included.
Course Descriptions - Credit Courses

ENGLISH AND COMMUNICATIONS

Preparatory College Writing I  ENG 0011 0  FA/SP
A basic writing course emphasising the development, organisation and revision of paragraphs and short essays. Students receive instruction in grammar, rhetorical strategies and the practices of standard written English. Prerequisite: A grade of “C” or better in ENG 0002 or satisfactory performance on College Placement Test. Successor: ENG 0012.

Preparatory College Writing II  ENG 0012 0  FA/SP
This course focuses on further development of expository writing skills and the introduction of the argumentative research essay. Special attention is given to essay structure, coherence and the practices of standard written English. Research techniques are introduced and practised in the single source essay and in a short researched essay. Prerequisite: A grade of “C” or better in ENG 0011 or satisfactory performance on College Placement Test. Successor: ENG 0016.

Preparatory College Reading I  ENG 0015 0  FA/SP
Development of college-level study and reading skills. Instruction includes outlining, summarising, increasing vocabulary, improving comprehension through reading essays and short fiction, and developing library skills and test-taking strategies. Prerequisite: Satisfactory performance on College Placement Test. Successor: ENG 0016.

Preparatory College Reading II  ENG 0016 0  FA/SP
Reinforces and builds upon skills developed in ENG 0015 through a study of selected readings from textbooks, abstracts, library sources, and different literary genres such as poetry and drama. Prerequisite: A grade of “C” or better in ENG 0015 or satisfactory performance on College Placement Test.

Communications for Industry I  ENG 1044 3  FA
A course emphasising communication skills for industry, including reading and comprehension of printed material used in industry, interpreting graphs and charts, writing short reports, instructions and memos, and giving a short presentation. Students receive reinforcement in the practices of standard written English. This course is a certificate course and will not normally transfer into degree programmes. Prerequisite: A grade of “C” or better in ENG 1044 or CPT scores in Reading Comprehension and Sentence Skills of 80 or higher.

Writing in Business I  ENG 1050 3  FA
A course focusing on the acquisition of skills needed for effective writing in the business world. Students receive reinforcement in the practices of standard written English. Emphasis is placed on specialised forms of written communication commonly used in business with particular attention given to correspondence. This course is a certificate course and will not normally transfer into degree programmes. Prerequisite: A grade of “C” or better in ENG0011 or satisfactory performance on the College Placement Test.

Freshman Composition  ENG 1111 3  FA/SP
A course intended to prepare students for college writing and beyond. There is a focus on composition that includes writings such as essays (exemplification, cause-effect, process analysis, compare and contrast, division and classification etc.) editorials, manifestos, blogs etc. Students develop research and documentation skills (MLA) and apply them to required research papers and assignments. Prerequisites: A grade of “C” or better in ENG 0012 and ENG 0016 or satisfactory performance on the College Placement Test.

Survey of English Literature I  ENG 2203 3
A critical and appreciative study of major British authors and types of literature including poetry, prose and drama from the Anglo-Saxon period to the eighteenth century. The works studied may vary year to year, but the course will look at works by the Beowulf poet, Chaucer, Shakespeare, Donne, Milton, Swift and Fielding. There will be some attention given to the historical context. Prerequisite: ENG 1112
Survey of English Literature II (ENG 2204) 3
A critical and appreciative study of major British authors and types of literature including poetry, prose and drama from the Romantic period to the present. The works studied may vary from year to year. There will be some attention given to the historical context. **Prerequisite:** ENG 1112

Oral Communication (ENG 2212) 3 FA/SP
A study of the theory and practice of public speaking. Levels of communication and their application. The focus is on preparing and delivering oral presentations. **Prerequisite:** ENG 1112 or ENG 1115

Argumentative Writing (ENG 2213) 3
Analysis, development, and application of practical and logical reasoning, essential to all disciplines, are emphasised. The course covers a range of argumentative styles with special focus on organisational techniques and overall principles of writing. **Prerequisite:** ENG 1112 or ENG 1115

Studies in African Literature (ENG 2236) 3
A study of novels, essays, poetry and plays written in English by African and other authors. Selections will be viewed from the perspective of historical and political developments. Works by representative authors such as Achebe, Armah, Ngugi, Soyinka, Ousemende, Lawrence and Lessing are included. **Prerequisite:** ENG 1112

Studies in Caribbean Literature (ENG 2238) 3
A study of novels, short stories and poetry, written in English, reflecting the cultural variety and historical richness of the literature of the Caribbean area. Works by representative authors such as Lovelace, Lamming, Frederick, Patterson, Rhys, Naipaul and Walcott are included. **Prerequisite:** ENG 1112

Women Writers (ENG 2239) 3
A selected study of novels, short stories, drama and poetry, written by women from the mid-19th Century to the present. Works by representative authors from the United States, the Caribbean, Africa, Asia and Bermuda. **Prerequisite:** ENG 1112

American Literature: The Beginnings to 1865 (ENG 2254) 3
An overview of American literary history from its beginnings to the Civil War. While some attention is given to historical context, the course primarily focuses on representative writers of each period, changes in literary style, and major topics such as slave narratives and dynamics leading to the Civil War. **Prerequisite:** ENG 1112

American Literature: 1865 to The Present (ENG 2255) 3
An overview of American literary history from the Civil War to the Present. While some attention is given to historical context, the course primarily focuses on representative works by selected writers of the respective periods, on the growth of literary forms, and on changes in literary tastes. **Prerequisite:** ENG 1112

Studies in Bermudian Literature (ENG 2260) 3 SP
Bermuda's unique cultural and literary landscape will be explored through a study of fiction, poetry and drama by early and contemporary writers. The course will start by looking at the role in world literature played by the discovery of Bermuda and will go on to investigate the realities of the slave society. The complexities of twentieth and twenty-first century Bermuda will be the basis of the rest of the course that will feature the work of Brian Burland. **Prerequisite:** ENG 1112

Special Themes and Topics in English (ENG 2298) 3
Designed to allow students an opportunity either for in-depth inquiry into a topic covered in another 2000-level course or for the study of a special topic or theme in English language and literature. The topics will vary from time to time.

**FILM STUDIES**

Introduction to Film Studies (FLM 1101) 3
This course teaches the fundamental concepts and critical skills involved in interpreting film. Students shall participate in discussing and viewing films and clips. In addition, they are required to produce a series of critical essays and a film project.

Genre Studies (FLM 2201) 3
This course concentrates on the major classifications of film genres and respective iconography through representative films. Classic, contemporary, and international films are considered as they express meanings (themes) to which the audience responds by engaging with cinema in its function as an art, a science, and as a global enterprise. **Prerequisites:** ENG 1111

**FOOD AND BEVERAGE SERVICE**

Food Service I (FAB 1100) 4 FA/SP
Practical food, beverage and wine service skills and knowledge in a dining room, principles of merchandising and salesmanship, customer relations, forecasting and planning workloads and bar technology. Students are
required to obtain the Federation of Dining Room Professionals Certified Dining Room Associate and the Associate Wine Steward certification. **Prerequisite:** CUL 1104

### FOOD SCIENCE

**Nutrition and Sanitation**

**FSC 1100 3 FA**

An introductory study of the science of food nutrition and food sanitation. Nutrition topics include the nutrient composition of foods, recommended allowances, additives and labelling. Sanitation topics include scientific principles underlying good sanitation practices, effects of micro-organisms in food; and in food-borne illness.

### HEATING, VENTILATION & AIR CONDITIONING

**Fundamentals of Heating and Cooling**

**HVA 1101 5 FA**

The following skills are contained in this module: Describe basic principles of HVAC; Complete basic trade calculations; Use Ohm's Law to analyse electrical circuits; Analyse the refrigeration cycle; Describe operation of furnaces.

**Mechanical Maintenance**

**HVA 1102 3 SP**

The following topics are contained in this module: Analyse air properties; Select and install venting systems; Maintain mechanical components; Test AC circuits and components.

**HVAC Controls**

**HVA 1103 3 SP**

The following topics are contained in this module: Test electronic circuits; Test electric furnace controls; Operate electric, electronic and pneumatic control systems; Identify accessories; Install and adjust refrigerant controls.

**Refrigeration System Service**

**HVA 1104 4 SP**

The following topics are contained in this module that will help students: Operate, service and install compressors; Service heat pumps; Use of leak detectors, vacuum pumps, recovery units and charging systems; Recycle refrigerants. During this module students will write the Ministry of Environment Certification exam for CFC Handling in Bermuda.

**Senior Student Project I**

**HVA 1105 2 FA**

This module will consist of a hands-on project in the workshop to develop students' practical application of theory learned in the first two semesters of the programme. The project will vary each year according to grants received from ASHRAE. Requirements include a progress report to be sent to ASHRAE at the end of the semester.

**Troubleshooting Heating**

**HVA 1106 3 FA**

The following topics are contained in this module: Perform preventive maintenance; Apply troubleshooting techniques; Troubleshoot electronic controls, gas, oil and electric heating systems.

**Troubleshooting Cooling**

**HVA 2107 3 FA**

The following topics are contained in this module: Troubleshoot cooling equipment, heat pumps and accessories.

**Hydronics**

**HVA 2108 2 SP**

The following topics are contained in this module: Service commercial hydronic systems; Balance air and water systems; Maintain steam systems.

**Senior Student Project II**

**HVA 2109 2 SP**

This is a continuation of Module 5. Requirements include a final report to be sent to ASHRAE at the completion of the project.

**System Performance**

**HVA 2110 3 SP**

The following topics are contained in this module: Use of blueprints; Test indoor air quality; Identify energy conservation equipment.

**Energy Management**

**HVA 2111 3 FA**

The following topics are contained in this module: Explain energy management; Maintain water quality; Start-up and shutdown commercial systems.

**System Design**

**HVA 2112 3 FA**

The following topics are contained in this module: Calculate heat loads; Identify cold storage equipment.

### HISTORY

**World History I**

**HIS 1140 3 FA/SP**

A survey of world history from the spread of Islam to the era of European global expansion. The course uses primary and secondary material in an attempt to understand the social, political, intellectual and cultural development of civilisations around the world. **Prerequisite:** A grade of “C” or better in ENG 0012

**World History II**

**HIS 1141 3 FA/SP**

This course analyses the development and interaction of world civilisations from the spread of Christianity to the First World War. Topics include the Scientific and Industrial Revolutions, colonialism and imperialism. Coverage also includes development in the Americas, the Caribbean and Bermuda. **Prerequisite:** A grade of “C” or better in ENG 0012
Course Descriptions - Credit Courses

The United States Since the Civil War      HIS 2203  3   FA
An in-depth study of the period of Reconstruction after the Civil War and of the major social and economic forces which transformed the United States from an agrarian republic to an industrial nation at the turn of the 20th Century. Prerequisites: HIS 1140 and HIS 1141.

The United States as a World Power      HIS 2204  3   SP
A study of America’s emergence as a power on the world stage from the First World War to the “Cold War”, the development of her industrial might, as well as social and political trends. Prerequisites: HIS 1140 and HIS 1141. HIS 2203 is highly recommended.

Modern Bermuda 1834-1963      HIS 2230  3   SP
This course focuses on the economic and social changes occurring in Bermuda between the abolition of slavery and the introduction of universal adult suffrage. Topics to be considered include: Social structure of post-emancipation society; Bermuda’s economic development since emancipation; Conflict and change during the inter-war years; Genesis of the labour movement; Universal suffrage. The methodology of family history will also be examined. Prerequisites: HIS 1140 and HIS 1141.

Special Topics in History      HIS 2298  3
Designed to allow students an opportunity either for in-depth inquiry into a topic covered in another 2000-level course or for the study of a special topic in history. The course is offered periodically depending on student interest. Prerequisite: Appropriate 1000-level courses and/or a 2000-level course relevant to the topic.

HOTEL MANAGEMENT

Introduction to Lodging Management      HMT 1120  3   SP
A study of hotel organisation with particular reference to skills required for lodging management. Topics include: Reservations, Reception; Cashiering; Night Audit; Housekeeping. Students are required to gain practical experience shadowing supervisors in the front office, housekeeping and reservation departments at the Coco Reef Resort or another approved establishment.

Introduction to the Hospitality Industry      HMT 1155  3   FA
This course is designed to provide an overview, and a fundamental understanding of the basic principles, practices and concepts of the hospitality industry. Prerequisite: Satisfactory performance on College Placement Test with a minimum score of 50 in Reading Comprehension and 50 in Sentence Skills.

Hotel Management Internship      HMT 1175  3   FA/SP/SM
Work experience in the kitchen, service and management areas of an assigned hotel. Practical experience in culinary preparation, food and beverage management and service, housekeeping, front office reception and reservations, and hotel management is provided. Prerequisites: A minimum GPA 2.0 or higher in all Hospitality Management programme courses required as prerequisite; HMT 1120, CKN 1102 and FAB 1100.

Hospitality Sales and Marketing      HMT 1265  3   FA
A broad perspective of hospitality marketing, placing emphasis on the analysis, structure, and strategy of the hospitality marketing department, allocation of resources, marketing research, and the effectiveness of the marketing plan. It will also take an in-depth study into the promotional tool of personal selling, target marketing, product positioning, with an emphasis on identifying and meeting the sales needs of the customer. Prerequisite: HMT 1175

Hospitality Supervisory Practices      HMT 2255  3   SP
A study of the theory and practices relating to supervision within the hospitality industry including recruitment, motivation, discipline, communications, conflict resolution, effective change. Prerequisite: HMT 1175

Food and Beverage Management      HMT 2260  3   SP
A study of the art and science of managing a profitable food and beverage operation. Management structure and functions, Food and beverage cost controls, Prevention of theft and fraud, and The management of small business operations will be covered. Prerequisite: FAB 1100

INSURANCE

Introduction to Risk and Insurance      INS 1101  3   FA
Key concepts and legal principles in risk management and insurance are taught. Government regulations and the social and economic significance of the insurance industry are also explored. Prerequisite: A grade of “C” or better in ENG 0012.

Property and Casualty Insurance      INS 2201  3
Examines personal and commercial property and liability risks, crime insurance and surety bonds, along with the interpretation of insurance contracts. Prerequisite: INS 1101

Life and Health Insurance      INS 2202  3
The economic principles, mathematical foundations and legal framework underlying life and health insurance are explored. Prerequisite: INS 1101.
Course Descriptions - Credit Courses

Risk Management

Assesses business and personal risk and examines the development of risk control methods, financing techniques for risk exposures and effective risk management alternatives. **Prerequisite**: INS 2201

**LAW**

Business Law

This course gives students a working knowledge of the legal system and the law and how it affects day-to-day operations of business. Emphasis is on the Law of Contract, the Law of Torts and Employment Law. **Prerequisite**: 18 credits at the 1000-level

**MANAGEMENT**

Accounting in Action

This course will draw upon the knowledge and skills students have acquired throughout the Accounting Assistants programme. The use of practical accounting-oriented mini-case studies and simulations will aid in the development of students’ problem-solving and decision-making skills. Students will be required to present their decisions in writing and through oral presentations and discussions. **This course is a certificate course and will not normally transfer into degree programmes.** **Prerequisite**: CIS 1120 **Corequisite**: ACC 1042

Accounting Assistant Work Placement

This course requires the student to demonstrate professional ethics, skills and knowledge required of an accounting assistant in the office environment. This course is a final course preparing the student for immediate employment. This course is a certificate course and will not normally transfer into degree programmes. **Prerequisites**: A minimum GPA 2.0 or higher in all Accounting Assistant programme courses required as prerequisite; ACC 1041, CIS 1120, **Corequisite**: MGN 1015, OFA 1040, OFA 1025 and ACC 1042.

Foundations of Business

This course introduces students to business by defining what a business is and examining the environment in which today’s businesses exist. It defines the role of manager, examines the organisation of the business into functions and describes the responsibilities of each main function. **This course is a certificate course and will not normally transfer into degree programmes.** **Prerequisite**: A grade of “C” or better in ENG 1044

Introduction to Business

This course provides an introduction to business concepts and functions. Topics covered include: Ethics and social responsibility, Forms of business ownership, Small business and entrepreneurship, Management and organisation of the firm, Marketing, operations, finance, and human resources. Emphasis will be placed upon the discussion of current issues and trends relating to these topics. Case study analysis will be introduced. **Prerequisite**: A grade of “C” or better in ENG 0012

Tourism

An introduction to tourism, including tourism supply components, marketing and the social and economic impact of tourism development both internationally and in Bermuda. **Prerequisite**: A grade of “C” or better in ENG 0012

Customer Service Skills

This course will provide students with a systematic process for developing customer service skills that are required to deliver “service excellence,” a term used to describe the exceptional levels of service that customers seek. In addition to learning about what makes up the twenty first century “service economy,” students will have an opportunity to develop “service excellence” strategies that they can apply in their future careers. Emphasis will be placed learning how to become obsessed with satisfying customer needs, effectively dealing with difficult customers, consistently communicating with customers, building lasting relationships with customers and embracing emerging service oriented technologies designed to foster brand loyalty. **Prerequisite**: A grade of “C” or better in ENG 0012

Introduction to Human Resource Management

This course will expose students to the diverse area of human resource management and the theory and practice in areas such as recruitment and selection of staff, training and development and performance appraisal. Relevant legislation, current and future trends will also be explored. **Prerequisites**: MGN 1114 and ENG 1111

Business Work Placement

An academic practicum designed to provide an opportunity to apply knowledge gained in the classroom to a work environment. The practicum is a minimum of eighty hours of unpaid work experience. **Prerequisites**: A minimum GPA 2.0 or higher in all Business Management programme courses required as prerequisite; ACC 1140 or CIS 1130 as well as ACC 1135, ACC 1145, CIS 1120, CSC 1100 and MGN 1114 or permission from the Practicum Coordinator.
Marketing Management I  MGN 2210 3  FA
An introduction to marketing that examines the marketing concept, the consumer, marketing opportunities, target marketing and the four components of the marketing mix, i.e. price, product, place and promotion. **Prerequisite:** MGN 1114

Marketing Management II  MGN 2211 3  SP
A continuation of MGN 2210 that looks at consumer buying behaviour, retailing, wholesaling, selling, price setting, product life cycle, market research and international marketing. **Prerequisite:** MGN 2210

Business Analysis and Communication  MGN 2217 3  SP
This course reinforces the theoretical principles of business introduced in MGN 1114 through communication skills development. It will require students to make practical use of introductory business concepts. Students will be required to research and analyse business-related material and express their ideas in the form of oral presentations, formal reports and case studies. **Prerequisites:** CIS 1120 and MGN 1114

Organisational Behaviour  MGN 2222 3  SP
This course examines the behaviour of individuals and groups in organisations. Topics include: Perception; Motivation; Rewards; Managing inter-group conflict; Managerial functions; Power; Leadership styles and managing change. **Prerequisite:** MGN 1114

Introduction to Project Management  MGN 2230 3  SP
Project management is becoming increasingly more important in today's world. Mastery of key tools and concepts provides a significant competitive advantage in the marketplace. This course content deals with setting the scope of the project, planning, staffing, organising, directing, controlling and closing projects. The course includes major topics such as strategy, priorities, organisation, project tools and leadership. Primary class emphasis is on the project management process and tools. **Prerequisite:** CIS 1120

Finance I  MGN 2240 3  FA
The course provides an in-depth study of the techniques required for managerial decision-making in the financial area. Topics include: Mathematics of finance; Financial analysis; Financial management; Interest rate theories; Working capital management; Short-term financing and capital markets. **Prerequisites:** ACC 1145 and MAT 1131

Finance II  MGN 2241 3  SP
A continuation of MGN 2240. Topics include: Present values; Cost of capital; Managing risk; Long-term financing; Dividend policies; Calculating bond and stock values. **Prerequisite:** MGN 2240

Introduction to Small Business Management  MGN 2245 3  FA
This course introduces the student to interrelated operations of a small business. The content covers the essentials of starting a small business from the generation of the idea through the completion of the business plan, as well as the practical aspects of the day-to-day operation. **Prerequisite:** MGN 1114

Introduction to International Business  MGN 2250 3  FA
An introduction to the world of international business and Bermuda's role in the global economy. The course will raise students' levels of awareness and understanding of the way business is conducted worldwide. Topics such as the Role of international business in Bermuda's economy; Cross-cultural communication and management; International marketing and finance; and the Structure of the multinational organisation will be covered. **Prerequisite:** MGN 1114

Special Topics in Management  MGN 2298 3
Designed to allow students an opportunity either for in-depth inquiry into a topic covered in another 2000-level course or for the study of a special topic or theme in management.

MASONRY

Introduction to Masonry  MAS 1109 3  FA
In this unit students will be introduced to the current methods and procedures that are used in the masonry trade. The knowledge, skill and ability requirements of the mason will be stressed.

Masonry Techniques I  MAS 1110 4  FA
Students will learn the methods and procedures used in masonry unit installation and also the properties and mixture make-up of mortar.

Residential Masonry  MAS 1111 2  SP
This unit covers information that a mason would need to work with residential plans and construction drawings, as well as the construction techniques required for residential and small structure foundations.

Methods of Masonry Reinforcement  MAS 1112 1  SP
This unit focuses on the use of grout, the locations where it can be used and the techniques for placement. The course also acquaints the mason with other types of reinforcement and metal components such as steel, metal rods, joint reinforcements, plates, anchors, fasteners and hollow metal frames for doors and windows.
Masonry Techniques II  MAS 2113 5  SP
In this unit the mason will be acquainted with various types of metal and the methods of moisture control associated with masonry.

Masonry Techniques III  MAS 2114 6  FA
This unit covers the use of scaffolding in masonry construction, the procedure for testing masonry materials and the techniques for finished masonry.

Commercial Drawing & Estimating  MAS 2115 2  SP
The unit describes the standard format for specifications and content for the use of commercial drawings, the basic procedures for doing takeoffs and estimating quantities of masonry material. Several different methods are described.

Site Layout & Introduction to Crew Leadership  MAS 2116 2  SP
In this unit the trainee will be introduced to the principles, equipment and methods used to perform site layout tasks of distance measurement and differential levelling. The unit also covers: Responsibilities of individuals on site; Understanding and using methods of job site communication; Basic leadership skills; Crew leadership needs in order to supervise a crew.

MATHEMATICS
Some courses may require the use of computer software.

Basic Mathematics  MAT 0010 0  FA/SP
A review of foundational-level mathematics for students needing to strengthen their problem solving skills. Topics include adding, subtracting, multiplying, and dividing fractions, decimals, and integers. Successor: MAT 0014.

College Preparatory Mathematics I  MAT 0014 O  FA/SP/SM
An elementary course developing a foundation in algebra. Topics include linear equations & inequalities, equations of lines, exponents and polynomials. Prerequisite: A grade of “C” or better in MAT 0010, or satisfactory performance on the College Placement Test. Successor: MAT 0015

College Preparatory Mathematics II  MAT 0015 O  FA/SP/SM
An intermediate algebra course preparing students for entry to college level mathematics. Topics include polynomials with emphasis on factoring and solving quadratic equations, solving rational and radical equations, simplifying complex expressions, and performing basic operations on rational and radical expressions. Prerequisite: A grade of “C” or better in MAT 0014, or satisfactory performance on the College Placement Test. Successor: MAT 1105, MAT 1107, or MAT 1131.

Business Mathematics  MAT 1034 3  FA
Topics include bank services, payroll calculations, mathematics of buying and selling, simple and compound interest, business and consumer loans, depreciation. This course is a certificate course and will not normally transfer into degree programmes. Prerequisite: A grade of “C” or better in MAT 0010.

College Algebra I  MAT 1105 3  FA/SP
Intended to provide exposure to a number of mathematical topics at college level for those students who do not wish a concentration in mathematics but who need to improve their competency in intermediate algebra. Such topics will include absolute values, domain and range of functions, symmetry, graphs, horizontal and vertical translations and the study of roots of polynomials. Prerequisite: A grade of “C” or better in MAT 0015 Successor: MAT 1141, MAT 1152.

A Survey of Mathematics  MAT 1107 3  FA/SP
An introductory course in mathematics covering topics in set theory, Venn Diagrams, logic, consumer mathematics, as well as other selected topics including, but not limited to finite mathematical systems and graph theory. Prerequisite: A grade of “C” or better in MAT 0015.

Finite Mathematics  MAT 1131 3  FA/SP
Intended for business students needing to develop a facility with certain techniques to solve practical problems. Includes systems of linear equations and inequalities, optimisation, supply and demand analysis, linear programming, mix of constraints, matrix algebra, sinking funds, amortisation, future value of ordinary annuities. Prerequisite: A grade of “C” or better in MAT 0015 Successor: MAT 1132.

Business Calculus  MAT 1132 3  FA/SP
Intended for business students using calculus as a tool with particular applications in management and economics. Includes exponential and logarithmic functions, elementary differential calculus, applications to maxima and minima, cost analysis, marginal propensity to consume and the multiplier, integral calculus, area between two curves, simple differential equations, optimisation of profit. Prerequisite: MAT 1131.

Pre-Calculus  MAT 1141 3  FA/SP
A continuation of the study of topics in algebra, in addition to topics in trigonometry recommended for students of calculus, or those seeking a concentration in mathematics or science. Includes the study of exponential and logarithmic functions and equations, graphs of trigonometric functions, trigonometric equations, compound angles, sine and cosine formulae. Prerequisite: MAT 1105 or satisfactory performance on College Placement Test. Successor: MAT 1152.

</table>

| Anti-Lock Brake Systems                    | MVT 2109 | FA       |
| The following topics are contained in this module: Perform diagnostic test and repairs on power assisted and anti-lock brake systems; Service anti-lock brake systems. |          |          |

| Steering Systems                          | MVT 2110 | SP       |
| The following topics are contained in this module: Identify steering systems; Diagnose, test and repair steering systems. |          |          |

| Power Steering Systems                     | MVT 2111 | SP       |
| The following topics are contained in this module: Perform test and service manual and power steering; Service power steering pump; Perform inspection on and repair of steering column. |          |          |

| Suspension Systems                         | MVT 2112 | SP       |
| The following topics are contained in this module: Diagnose wheel alignment; Adjust and repair wheel alignments and perform wheel balance and implement the principles of the front and rear suspension systems. |          |          |

| MUSIC                                      |          |          |
| Music Appreciation                        | MSC 1103 | FA/SP    |
| A historical survey of the development of western music and its composers from the medieval period to jazz. Emphasis is placed on how the elements of music change and develop throughout history. This course involves extensive listening and live concert attendance. |          |          |

| Introduction to Music Theory               | MSC 1104 | 3        |
| An introduction to the basics of music theory with an emphasis on: scales, rhythms, time signatures, intervals and chords (with the use of aural skills). **Prerequisite:** At least Grade III Theory R.S.M. or “B” standing in Secondary school music, MSC 1103. |          |          |

| Introduction to Harmony                    | MSC 1105 | 3        |
| An introduction to four part harmony in the choral style and music analysis (with the use of aural skills). **Prerequisite:** MSC 1104 |          |          |

| Piano Skills I                             | MSC 1204 | 3        |
| Group instruction and performance in the beginning level of piano skills and musicianship. |          |          |

| Piano Skills II                            | MSC 1205 | 3        |
| A continuation of Piano Skills I. **Prerequisite:** MSC 1204 |          |          |

| Special Themes and Topics in Music         | MSC 2298 | 3        |
| This course is designed to allow in-depth study of a subject previously studied, or an advanced subject not covered by other courses. **Prerequisite:** Appropriate 1000-level courses and/or a 2000-level course relevant to the topic. |          |          |

---

| NCCER CORE                                 |          |          |
| Basic Safety                               | NCC 1101 | SP/SM    |
| Complies with OSHA-10 training requirements. Explains the safety obligations of workers, supervisors, and managers to ensure a safe workplace. Discusses the causes and results of accidents and the impact of accident costs. Reviews the role of company policies and OSHA regulations. Introduces common job-site hazards and identifies proper protections. Defines safe work procedures, proper use of personal protective equipment, and working with hazardous chemicals. Identifies other potential construction hazards, including hazardous material exposures, welding and cutting hazards, and confined spaces. |          |          |

| Mathematics                                | NCC 1102 | SP/SM    |
| Reviews basic mathematical functions such as adding, subtracting, dividing, and multiplying whole numbers, fractions and decimals, and explains their applications to the construction trades. Explains how to use and read various length measurement tools, including standard and metric rulers and tape measures, and the architect's and engineer's scales. Explains decimal-fraction conversions and the metric system, using practical examples. Also reviews basic geometry as applied to common shapes and forms. |          |          |

| Hand Tools                                 | NCC 1103 | SP/SM    |
| Introduces trainees to hand tools that are widely used in the construction industry, such as hammers, saws, levels, pullers, and clamps. Explains the specific applications of each tool and shows how to use them properly. Also discusses important safety and maintenance issues related to hand tools. |          |          |

| Power Tools                                | NCC 1104 | SP/SM    |
| Provides detail descriptions of commonly used power tools, such as drills, saws, grinders, and sanders. Reviews applications, proper use, safety, and maintenance. Many illustrations show power tools used in on-the-job settings. |          |          |
Course Descriptions - Credit Courses

**Introduction to Construction Drawings**  NCC 1105  1  SP/SM
Familiarises trainees with basic terms for construction drawings, components, and symbols. Explains the different types of drawings (civil, architectural, structural, mechanical, plumbing/piping, electrical, and fire protection) and instructs trainees on how to interpret and use drawing dimensions. Four oversimplified drawings are included.

**Basic Communication Skills**  NCC 1107  1  SP/SM
Provides trainees with techniques for communicating effectively with co-workers and supervisors. Includes practical examples that emphasise the importance of verbal and written information and instructions on the job. Also discusses effective telephone and e-mail communication skills.

**Employability Skills**  NCC 1108  1  SP/SM
Identifies the roles of individuals and companies in the construction industry. Introduces trainees to critical thinking and problem solving skills and computer systems and their industry applications. Also reviews effective relationship skills, effective self-presentation and key workplace issues such as sexual harassment, stress and substance abuse.

**Introduction to Materials Handling**  NCC 1109  1  SP/SM
Recognises hazards associated with materials handling and explains proper materials handling techniques and procedures. Also introduces materials handling equipment and identifies appropriate equipment for common job-site tasks.

**Introduction to Construction Technology and Trades/Technology Job Skills**  NCC 1110  5  FA
This course will provide students with an appreciation for modern technology, trades and engineering. Topics covered will be basic safety, hand and power tools, employability skills, and materials handling. Also an introduction to technical skills required for the various technical occupations/trades with an introduction to plumbing, HVAC, automotive and electrical systems.

**NURSING**

**Introduction to Professional Nursing**  NUR 1101  2  SM
This introductory nursing course examines the realms of the nursing profession. Topics to be explored cover the history of nursing, nursing leaders, healthcare delivery, ethics, legal issues, health and wellness, medical terminology, math for medications, test taking strategies, culture and ethnicity, spirituality, and the nursing process. After completion of this course the student will be prepared to progress into NUR 1150.  
**Prerequisites**: A cumulative GPA 2.67, BIO 1121, BIO 1122, CSC 1110, CIS 1120, ENG 1111, ENG 1112, MAT 1100-level or higher, PED/RSO and PSY 1101

**Nursing Fundamentals**  NUR 1150  8  FA
Students in Nursing 1150 will acquire fundamental psychomotor, critical thinking and communication skills through student participation in classroom, skills lab, and clinical activities. Students learn basic assessment skills and nursing procedures utilising values and ethics necessary for practice, focusing on gerontological nursing care. **Prerequisites**: A cumulative GPA 2.67 and a grade of “B-” or better in NUR 1101

**Psychiatric Nursing**  NUR 2200  5  SP
This course introduces concepts of nursing care for patients throughout the life span with maladaptive psychosocial and physiological responses related to mental disorders. Development of communication skills, self awareness and the therapeutic use of self in selected clinical settings is integrated throughout the course. **Prerequisites**: A grade of “B-” or better in NUR 1150 **Corequisites**: NUR 2201 and NUR 2235

**Medical Surgical Nursing**  NUR 2201  7  SP
Students in Nursing 2201 will learn nursing care of individuals with common disease processes. The clinical experience allows students to further develop psychomotor skills such as health assessment and use critical thinking and communication skills to develop a nursing diagnosis on a stable medical or surgical patient. **Prerequisites**: A grade of “B-” or better in NUR 1150 **Corequisites**: NUR 2200 and NUR 2235

**Pharmacology**  NUR 2235  2  SM
This course provides the foundation for understanding the role of drug action, drug absorption, bioavailability, distribution, metabolism and excretion in nursing interventions. Application of pharmacologic principles in relation to nursing practice is integrated throughout this course. **Prerequisites**: A grade of “B-” or better in NUR 1150

**Family Health Nursing**  NUR 2240  5  FA
The course introduces the student to management of complex health issues applied to clients across the lifespan. Focus is on family education, cultural competency and sensitivity to values and ethical concerns of the child-bearing family. Students will be introduced to care of the client pre- and post-delivery with an increased focus on family-centred care. In the clinical setting, students demonstrate an ability to apply the nursing process to the care of individuals and families. Skill development reflects psychomotor, cognitive and affective domains of learning necessary for critical thinking, therapeutic communication, teaching and learning, with an introduction to leadership. In this course, students are introduced to the practice of nursing in the home and community-based settings.  
**Prerequisites**: A grade of “B-” or better in NUR 2200, NUR 2201 and NUR 2235. **Corequisite**: NUR 2250
Adult Health  
NUR 2250 5 FA  
This course focuses on the etiologic, symptomatologic and pathologic aspects of selected human diseases across the life span. Concepts of health promotion, disease prevention, disease progression, and treatment are approached from a cellular and multisystem perspective. Influences of genetic, ethnic, and cultural variables on human diseases is analysed. Application and analysis of the therapeutic management of complex health issues are applied to clients across the lifespan. Focus is on family education, cultural competency and sensitivity to values and ethical concerns. 2 credit hours of classroom and 2 credit hours of clinical (90 hours of clinical per semester) are required.  
Prerequisites: A grade of “B-” or better in NUR 2200, NUR 2201 and NUR 2235.  
Corequisite: NUR 2240

Adult Health Practicum  
NUR 2251 8 SP  
This is the capstone course of the ADN, entry level nursing programme. Students in this course examine health issues that are complex and encompass multiple systems. Information presented will be synthesised with knowledge gained in previous courses, specifically pathophysiology, pharmacology and medical surgical nursing. In the clinical setting, students will demonstrate the ability to apply the nursing process to the care of individuals with complex needs. Current evidence-based research and implications will be incorporated throughout.  
Prerequisites: A grade of “B-” or better in NUR 2240 and 2250

Office Assistants

Word Processing I  
OFA 1011 3  
This course will develop touch typing skills and will introduce students to current word processing software applications. Topics will include: Formatting of memos; Letters; Short reports; Basic tables.  
This course is a certificate course and will not normally transfer into degree programmes.

Word Processing II  
OFA 1012 3  
This course is a continuation of OFA 1011 and will introduce more advanced processing concepts including formatting of tables and reports, specialised business correspondence, and mail merge. Emphasis will be placed on keyboarding from rough draft and proofreading.  
Prerequisite: OFA 1011.  
This course is a certificate course and will not normally transfer into degree programmes.

Office Technology Procedures I  
OFA 1025 3  
This course, which integrates office knowledge and skills, applies an understanding of the roles of administrative support personnel and their activities. Organisational skills and time management are discussed and practiced. Topics include: Telephone techniques; Electronic filing and calendaring; Mail handling. The use of the calculating machines, copiers and fax machines will be practiced.  
This course is a certificate course and will not normally transfer into degree programmes.

Office Technology Procedures II  
OFA 1026 3  
This course develops critical thinking and problem solving skills necessary in today’s business world. Topics include: Business strategies; Meetings and conferences; Travel arrangements; Use of transcription equipment; Oral and written communications; Business etiquette; Ethical behaviour. Voice recognition skills are learned and practiced. Human relations skills will be developed through case studies. Hardware and software technologies that support information creation, storage, retrieval, manipulation and distribution are emphasised.  
Prerequisites: OFA 1011 and OFA 1025.  
This course is a certificate course and will not normally transfer into degree programmes.

Speedwriting Theory and Speed Building  
OFA 1030 3  
Intensive speedwriting theory and speed development leading to a minimum of 80 wpm with 97% accuracy. Content of dictated matter will be a combination of business and literary passages. Correct spelling and punctuation in transcription are emphasised.  
Prerequisites: OFA 1055 and ENG 1050.  
This course is a certificate course and will not normally transfer into degree programmes.

Speed Development in Keyboarding  
OFA 1035 1  
This course requires a previous knowledge of touch keyboarding techniques and provides practice in speed building to a minimum speed of 40 WPM.  
This course is a certificate course and will not normally transfer into degree programmes.

Communication and Presentation Skills  
OFA 1040 2  
This course provides training in oral and written communication skills necessary in the workplace. Presentation software will be utilised.  
Prerequisite: Basic computer skills.  
This course is a certificate course and will not normally transfer into degree programmes.

Machine Transcription  
OFA 1045 3  
This course develops skills in listening, proofreading and language arts. Accuracy and clarity of transcribed materials are required to produce high quality business documents from recorded dictation.  
Prerequisite: OFA 1011 or OFA 1055 or previous experience approved by the faculty.  
This course is a certificate course and will not normally transfer into degree programmes.

Word Processing  
OFA 1055 3  
An intensive course designed for mature students with 30 wpm keyboarding skills focusing on applications and keyboarding instruction through “hands-on” experience in all commonly used word processing
Course Descriptions - Credit Courses

operations. Intermediate keyboarding techniques such as keyboarding from manuscript, statistical keyboarding and review of formats for business communications will be treated in detail. This course is a certificate course and will not normally transfer into degree programmes.

Office Applications Certification
OFA 1060 1
This course requires independent study and practice to successfully complete at least four applications to include as a minimum word processing, spreadsheet, presentation software, web browsing and communication. Either the International Computer Drivers Licence (ICDL) or the Microsoft Office Specialist (MOS) certifications will be considered acceptable. Prerequisite: CIS 1120. This course is a certificate course and will not normally transfer into degree programmes.

Office Procedures
OFA 1075 3
Deals with office functions and routines, human relations, filing procedures, telephone techniques, reception and postal services. An intensive course designed for the mature student. Prerequisites: CIS 1120 and OFA 1055. This course is a certificate course and will not normally transfer into degree programmes.

Office Work Placement
OFA 1090 3
This course requires the student to demonstrate professional ethics, skills and knowledge required of an office assistant in the office environment. This course is a final course preparing the student for immediate employment. Prerequisite: A minimum GPA 2.0 or higher in all Office Assistant programme courses required as prerequisite, CIS 1120, OFA 1011, OFA 1025 Corequisite: OFA 1040. This course is a certificate course and will not normally transfer into degree programmes.

PHILOSOPHY

Introduction to Philosophy
PHL 1104 3  FA/SP
This course addresses the questions, “What is Human?”; “How does humanity differ from other animals?”; “Are we truly free?”; “What are our responsibilities and ethical obligations”, or “Where do these obligations come from?” Answers to these questions are pursued through a historical and contemporary study of ethics, identity, the mind-body problem, or free will and determinism. Prerequisite: A grade of “C” or better in ENG 0012.

Medical Ethics
PHL 2210 3  SP
This course will provide an introduction to ethical principles that increase awareness and provide skills to comprehend and manage ethical dilemmas in healthcare. When values and beliefs differ this can lead to conflict and poor health outcomes. The learner will examine moral principles that regulate standards and codes of conduct which guide decisions and the behaviours of healthcare professionals. Analysis and reflection on concepts of ethics, human rights and social issues, related to healthcare, are essential to promote clinical competence and sensitivity to the needs of the healthcare consumer.

PHYSICS

Preparatory Physics
PHY 0013 0  SP
A basic introduction to the fundamental principles of physics. Topics include: Measurement and units; Force; Work and energy; Molecular motion and heat, waves and electrical energy; The development of problem solving skills. Laboratory. A minimum grade of “C” will be required. Prerequisite: MAT 0014

Principles of Physics I
PHY 1121 4  FA
A course in fundamental principles and applications of physics, introducing the basic concepts and principles of mechanics and thermodynamics. Topics include: Equations of motion; Newton's Laws of motion; Transnational and rotational equilibrium; Work; Energy; Momentum; Heat, Kinetic gas theory; The gas laws. Suitable for students intending to pursue other scientific studies or wishing to specialise in physics and its related technologies. Laboratory. Prerequisite: A grade of “C” or better in PHY 0013. Corequisite: MAT 1141

Principles of Physics II
PHY 1122 4  SP
A continuation of PHY 1121. Topics include: Vibration and waves; Sound; Electricity and magnetism; Light and optics and Modern physics. Laboratory. Prerequisite: PHY 1121

Special Topics in Physics
PHY 2298 3
Provides an opportunity for in-depth study at the 2000-level of a topic available as a special offering. This may be material that has been initially explored at the 1000-level or new material for whose development and exploration there has been provided an appropriate base via a 1000-level course. Prerequisite: Appropriate 1000-level courses and/or a 2000-level course relevant to the topic.
PLUMBING

Introduction to the Plumbing Profession, Safety and Tools

This module reviews the basic plumbing tools used to measure, lay out, cut, drill, bore, and ream. Trainees will learn how to safely use, properly care for, and maintain plumbing tools.

Plastic Pipe, Copper, Cast Iron, Steel Pipe and Fittings

Introduces trainees to the different types of plastic pipe and fittings used in plumbing applications, including ABS, PVC, CPVC.

Fixtures and Faucets, Drain, Waste and Vent Systems, Water Distribution Systems

Explains how DWV systems remove waste safely and effectively. Discusses how system components, such as pipe, drains, traps and vents work.

Commercial Drawings, Hangers and Supports, Installing DWV Piping

Introduces trainees to methods for attaching and running DWV and water supply piping in relation to structural elements, including pipe hangers and supports.

Types of Valves, Installing Water Supply Piping, Installing Fixtures and Faucets

Covers the installation of basic plumbing fixtures, including bathtubs, shower stalls, lavatories, sinks, toilets, and urinals. Also reviews the installation of valves and faucets.

Installing Water Heaters, Servicing Fixtures, Valves and Faucets

Covers the troubleshooting and repair of fixtures, valves, and faucets in accordance with code and safety guidelines.

Sizing Water Supply Piping, Potable Water Treatment

Explains how to disinfect, filter, and soften water supply systems. Discusses how to troubleshoot water supply problems, flush out visible contaminants from a plumbing system, and disinfect a potable water plumbing system.

Backflow Preventers, Types of Venting, Sizing DWV Systems

Reviews the different types of vents that can be installed in a DWV System and how they work. Also teaches design and installation techniques.

Sewage Pumps, Compressed Air

Explains the installation, diagnosis, and repair of pumps and controls in a water system.

Business Principles for Plumbers, Water Pressure Systems

Introduces trainees to concepts and practices that are essential for competitive, successful plumbing businesses. Covers basic business accounting and project estimating.

Codes, Private Water Supply Well Systems

Explains the operation of pumps and well components. Reviews the qualities of good wells and how to assemble and disassemble pumps and components.

Swimming Pools and Hot Tubs, Plumbing for Mobile Homes

Introduces trainees to plumbing systems in swimming pools, hot tubs, and spas. Trainees will learn how to install and troubleshoot water supply systems and drains.

POLITICAL SCIENCE

Introduction to Political Science Structures

An introduction to the major political ideologies and forms of government. The course examines the meaning of politics, the role of political language, liberalism, Marxism, as well as liberal democratic and authoritarian governments. Numerous country case studies, including Bermuda, will be used for illustrative purposes. Prerequisite: A grade of “C” or better in ENG 0012

PSYCHOLOGY

Introduction to Psychology I

A survey of the conceptual approaches in psychology: biological bases of behaviour, perception, consciousness (sleep, dreams, hypnosis, meditation), learning, language, basic drives (hunger, thirst, sex), motivation, emotion and intelligence. Prerequisite: A grade of “C” or better in ENG 0012

Introduction to Psychology II

A survey of the basic areas of specialty and practice within the field of psychology, including human sexuality, problem solving, social psychology, human development, personality, abnormal behaviour and clinical practice. Prerequisite: PSY 1101
Introduction to Social Psychology  PSY 2210 3  FA
An examination of human behaviour covering such topics as conformity, altruism, impression formation, aggression, prejudice, love and attraction attitudes, and organisational behaviour. Emphasis is placed on understanding the connection between sociological and psychological determinants of normal and abnormal behaviour.  
Prerequisites: PSY 1101 and PSY 1102

Abnormal Psychology  PSY 2220 3  SP
An evaluation of abnormal behaviour, including the core concepts of the differing psychopathology: neuroses, psychoses and social disorders. Different approaches to treatment are described.  
Prerequisites: PSY 1101 and PSY 1102

Human Development  PSY 2240 3  SP
An analysis of the principles of human development from conception to death. Basic biological processes that shape development including conception and heredity are described. The development of the infant as a social, cognitive and physical being is traced through childhood, adolescence and into adulthood and older adulthood.  
Prerequisites: PSY 1101 and PSY 1102.

Learning Theory  PSY 2270 3  FA
An examination of developmental issues influencing learning, including cognitive, personal, moral, physiological, and neuro-physiological. Specific learning theories covered include classical and operant conditioning, cognitive theories, and social learning theories.  
Prerequisites: PSY 1101 and PSY 1102

Educational Psychology  PSY 2272 3  SP
The application of both learning and educational psychology theories to teaching strategies, classroom organisation and curriculum design. Instructional planning, teaching styles and classroom dynamics are also examined.  
Prerequisite: PSY 2270

Special Topics in Psychology  PSY 2298 3
Designed to allow students an opportunity either for in-depth inquiry into a topic covered in another 2000-level course or for the study of a special topic or theme in psychology. The course is offered periodically depending upon student interest.  
Prerequisite: Appropriate 1000-level courses and/or a 2000-level course relevant to the topic.

RELIGIOUS STUDIES

Introduction to Religious Studies I  REL 1101 3  SP
A comparative study of religious traditions from all over the world, past and present. Explores religion with thematic topics such as nature conservation; varieties of religious experience; the paranormal; and human sexuality. The goal is to build bridges between humanity by understanding our shared community with the sacred aspects of existence.  
Prerequisite: A grade of “C” or better in ENG 0012

Introduction to Religious Studies II  REL 1102 3  FA
A comparative study of the dominant monotheistic religions from the Middle East: Judaism, Christianity and Islam. From early doctrinal development in ancient precursors, (e.g. Zoroastrianism), to modern day politics and ethnic conflicts, this course will examine critically the history and global impact of Abrahamic monotheism.  
Prerequisite: A grade of “C” or better in ENG 0012

SOCIAL SCIENCE

Research Methods in the Social Sciences I  SSC 2200 3  SP
An introduction to scientific methods as they are applied to the social sciences. The research process, including formulation of research problems and hypotheses; selection of appropriate research designs and instruments; developing questionnaires; interviewing; and observation techniques are presented and discussed.  
Prerequisite: 6 credits in approved 1000-level courses in Social Sciences.

SOCIAL WORK

Introduction to Social Work  SOW 1151 3
Designed for students wishing to explore interest in and capacity providing a comprehensive overview of the ways that social workers respond to a wide range of societal problems, as well as the agencies that administer the services to those in need. This course emphasises students own interests and abilities in relation to social work values, their capacity to interact in a caring and non-judgmental manner with others who have diverse lifestyles and different socio-economic backgrounds, and the ability to critically examine major social problems and issues. Adoption from University of West Virginia.  
Prerequisite: A grade of “C” or better in ENG 0012
**SOCIOLIGY**

**Introduction to Sociology I**
SOC 1101 3  FA
An introduction to the study of human society from the sociological perspective. Emphasises the nature and meaning of society, culture, status and role, socialisation and personality, deviance, and social stratification. **Prerequisite:** A grade of “C” or better in ENG0012

**Introduction to Sociology II**
SOC 1102 3  FA/SP
An introduction to the study of human society from the sociological perspective. Emphasises the nature and meaning of social institutions (the family, religion, education, and economy and politics), formal and informal organisations, and social change. **Prerequisite:** A grade of “C” or better in ENG0012. SOC 1101 is strongly recommended.

**Introduction to Criminology**
SOC 1160 3
An examination of the theory and practice of criminology. Included is a discussion of terms and concepts commonly used; the subject matter of criminology and its relationship to other sciences; the history and evolution of criminology and its role in present day societies. **Corequisite:** ENG 1111

**Law and Society**
SOC 1180 3
An examination of the history, growth, role and purpose of law in society with special attention on criminal law. A study of fundamental legal concepts such as the rule of law, mens rea, negligence, liability and criminal responsibility. Critical examination of the laws enforceable in Bermuda and the legal institutions that enforce them. **Prerequisites:** SOC 1101 and 1102

**Social Inequality**
SOC 2220 3  FA
An examination of the origins and nature of the principal types of social inequality including sex, caste, class and race. Deals particularly with studies of status in modern industrial societies and in Bermuda. **Prerequisites:** SOC 1101 and SOC 1102

**Sociology of Marriage and the Family**
SOC 2251 3  SP
A sociological study of marriage and family life: Demographic trends in marriage; Child bearing; Divorce; Theories of mate selection; Marital interaction and marital dissolution; Relationship of unmarried couples; Alternative marriage forms; Abortion; Violence in the family. **Prerequisite:** SOC 1101, SOC 1102 or PSY 1102

**Sociology of Deviant Behaviour**
SOC 2280 3
An examination of the nature of deviance and its sociological explanations through analysis of selected topics such as mental illness, violence, sexual deviance and drug abuse. Also examined are social responses to deviance including stigmatisation, treatment and social control. **Prerequisites:** SOC 1101 and 1102

**Sociology of Crime and Delinquency**
SOC 2290 3
A historical overview of criminological theory presenting biological, psychological, sociological, cultural, political and bicultural theories of the causes of crime and delinquency. Deviance theory, social disorganisation, labelling and delinquency sub-cultural analysis are examined and the works of major theorists are critically explored. **Prerequisites:** SOC 1101 and SOC 1102

**Sociology of Punishment and Correction**
SOC 2291 3
An overview of the sociological literature on punishment and correction through which the enforcement of criminal justice is examined. The areas for consideration include the performance of the police and the courts; the effectiveness of the correctional system, including the unintended consequences of imprisonment; and the results of probation, parole, and correctional experiences in the United States and Britain. **Prerequisites:** SOC 1101 and SOC 1102. SOC 2290 is recommended.

**Special Topics in Sociology**
SOC 2298 3
Designed to allow students an opportunity either for in-depth inquiry into a topic covered in another 2000-level course or for the study of a special topic or theme in sociology. The course is offered periodically depending upon student interest. **Prerequisite:** Appropriate 1000-level courses and/or a 2000-level course relevant to the topic.

**SPANISH**

**Beginners Spanish I**
SPA 1101 3  FA/SP
This course is a foundational course designed for students who have little or no Spanish-speaking skills previously, for students who have minimal knowledge of basic concepts of the language, or for students who have formerly studied Spanish, but who have a three-year or more gap in their schooling experience, or for those who desire a basic refresher course and re-introduction to the Spanish language. Course content will include vocabulary building, reading, speaking, writing with an emphasis on building basic writing skills and audio-lingual development.

**Beginners Spanish II**
SPA 1102 3  FA/SP
This course is a continuation of Beginners Spanish I (SPA 1101). It is designed for students who have had at least two years of Spanish at the secondary school level without any gaps in their Spanish educational
experience, or for students who are competent in the basic linguistic skills and who can minimally converse in Spanish, but who desire increased competency in the fundamentals of the language. The course is designed to build on the basics of the language and aims to increase audio-lingual development through vocabulary building, reading, speaking, and writing to prepare students for the intermediate level. **Prerequisite**: SPA 1101

**Intermediate Spanish I**

SPA 2201 3 FA

This course focuses on intermediate-level Spanish and is designed for students who have studied Spanish for a minimum of three years at the senior school level or for students who have a command of the basics of the language and who desire to strengthen their reading, writing and audio lingual skills. Students will learn more complex verb forms and idiomatic expressions to develop greater linguistic fluency and will strengthen their skills through the study of authentic text. **Prerequisite**: SPA 1102, or at least three (3) consecutive years in senior school Spanish.

**Intermediate Spanish 2**

SPA 2202 3 SP

This course is a continuation of SPA 2201 and is designed for students who have strong audio lingual and written competencies and wish to strengthen their linguistic skills. Increased attention will be placed on reading, writing and oral communication. Students will have greater cultural exposure and will continue to develop proficiency and fluency. **Prerequisite**: SPA 2201

**Conversational Spanish**

SPA 2222 3

This course is designed to give students linguistic competencies for everyday situations. Students will further develop audio-lingual, listening and writing skills and vocabulary for life settings. **Prerequisite**: SPA 2201

**TECHNICAL COURSES**

**Introduction to Computer Aided Technical Drawing**

TEC 1000 3 SP

An introduction to computer aided drafting software applications, two dimensional and three dimensional drawing. Students will develop two and three dimensional drafting design techniques, using CAD software for creating designing and printing, various designs, shapes, parts and functional objects. **Prerequisite**: TMM 1001

**Introduction to Programming for Technicians**

TEC 1002 3 SP

This introductory course will provide students with basic computing problem solving skills using the Python programming language. Students will develop, compile, debug, and execute programmes while learning basic programming terminology and concepts such as procedure definition, algorithms, functions, conditional statements, and object-oriented programming concepts. **Prerequisites**: TMM 1101 and TSM 1101

**Introduction to Electricity and Electronics**

TEC 1004 3 SP

This course will provide students with a practical overview of electrical and electronic systems and its use in modern technology, some of the topics to be covered are direct current systems, alternating current systems, semiconductors and digital systems. **Prerequisites**: TMM 1101 and TSM 1101

**Introduction to Materials and Mechanics**

TEC 1006 3 SP

This course will provide students with a practical overview of the various classifications of materials, basic mechanical devices and the practical use in mechanical technology systems. Some topics include properties of materials, material safety data sheet, basic fabrication techniques, basic mechanical principles, simple machines, pulleys, gears and pneumatic and hydraulic systems.

**Introduction to Engineering and Design**

TEC 1010 3 FA

This is an introductory course to engineering technology that provides students with an appreciation of the various engineering disciplines, problem-solving and technical design processes. Students will develop practical solutions to real world problems. **Prerequisite**: TEC 1000

**Capstone Project for Technology and Trades**

TEC 1020 3 SP

In preparation for future academic and career goals, in this course students will complete their portfolio started in college skills course CSC 1100. Also students will develop a practical project that solves a real world problem through application of their developed technical skills. **Prerequisite**: Must be in last semester of CT-TECH programme.

**Underwater Robotics**

TEC 1135 3

This course offered in conjunction with the annual Bermuda Institute of Ocean Sciences (BIOS) remotely operated vehicle (ROV) challenge will explore the design underwater vehicles as students develop their science technology engineering math and business skills. **Corequisites**: TEC 1004 and TEC 1006

**Special Topics in Applied Technology**

TEC 2298 3

Designed to allow students an opportunity for an in-depth inquiry into a topic covered in another 2000-level course or the study of a special topic or emerging technology. The course is offered periodically depending upon student interest. **Prerequisites**: Appropriate 1000- and/or 2000-level course relevant to the topic.
Course Descriptions - Credit Courses

Technical Math I       TMM 1001 3  FA
This course will provide students with a practical application of mathematical skills as it relates to technology. Some of the topics to be studied are a review of basic math skills, measurements and units, algebra essentials, Cartesian coordinates, systems of equations, plane and solid geometry, trigonometry, vectors, binary and hexadecimal numbers, and Boolean algebra. **Prerequisite:** NCC1102 or IGCSE Math (Core)

Technical Math II      TMM 1002 3  SP
This course is a continuation of TMM 1001 were students further explore practical math concepts. Some of the topics include exponential functions, statistical methods, complex numbers, analytic geometry, higher degree equations, systems of equation and inequalities, matrices, sequences and trigonometric formulas. **Prerequisite:** TMM 1001

TECHNICAL SCIENCE

Technical Science I     TSM 1101 4  FA
This module is an introduction to applied science skills for the technical trades. It applies the principles of: Basic botany; Force and motion; Simple machines; Thermodynamics and electricity and magnetism.

Technical Science II    TSM 1102 4  SP
The following skills are contained in this module: Coplanar forces; Distance; Time; Velocity and acceleration; Mechanical energy and power; Heat and temperature. **Prerequisite:** A grade of “C” or better in TSM 1101

WELDING TECHNOLOGY

Introduction to Welding WLD 1101 3
A module that provides the basic understanding of welding operations and processes.

Sheet Metal ARC 1       WLD 1102 8
A module that provides the basic understanding of metal and the knowledge of joining metal together.

Sheet Metal ARC 2       WLD 1103 8
A module that provides the understanding of how to work with thicker metal.

Sheet Metal ARC 3       WLD 1104 6
A module that provides the processes of welding pipes and heavier metals.

Welding Symbols and Detail Drawings WLD 2105 6
A module that provides the necessary understanding of the basic symbols and detail drawings.

Air Carbon and Plasma Arc Cutting WLD 2106 1
A module that provides the proper techniques and operations of the plasma cutting.

GMAC AND FCAW WLD 2107 6
A module that introduces the techniques of gas metal arc welding and flux-core arc welding.

GTAW Equipment Filler Materials & Plate WLD 2108 1
A module that provides the basic introductory specific techniques for gas tungsten arc welding.

Aluminium Plate WLD 2109 3
A module that provides the information to identify the main characteristics of aluminium.

Physical Heat Treatment & Metals WLD 3110 1
A module that introduces the technique to effectively heat different metals.

Gas Metal ARC Weld Pipe WLD 3111 4
A module that provides another method of gas metal arc welding for pipe.

Flux-Cored ARC Welding WLD 3112 4
A module that provides the technique of arc welding involving flux to weld pipe.

Gas Tungsten ARC Welding WLD 3113 4
A module that uses the techniques of joining pipes using the tungsten arc welder.

Gas Tungsten ARC Welding Low Alloy Metals WLD 3114 4
A module that introduces the more advanced techniques to join low alloy metals and stainless steel.
WOOD TECHNOLOGY

Orientation, Materials, Fasteners, Hand & Power Tools  WTC 1101 1
The following topics are contained in this module: Studying history of the trade; Identifying different materials and fasteners; Operating tools safely.

Floor, Wall, Ceiling and Roof Framing  WTC 1102 4
The following topics are contained in this module: Laying out and constructing a wood floor; Framing walls and ceilings; Describing various kinds of roofs; Building gable and hip roofs.

Windows and Exterior Doors  WTC 1103 4
The following topics are contained in this module: Recognising various types of windows; Skylights and exterior doors; Installing windows and exterior doors; Fitting locksets and weather-stripping.

Reading Plans, Site Layout I: Distance Measurement & Leveling  WTC 1104 3
The following topics are contained in this module: Performing site layout tasks of distance measuring and differential leveling; Understanding on-site communications.

Introduction to Concrete, Foundations and Flatwork, Reinforcing Concrete, Handling and Placing Concrete  WTC 1105 3
The following topics are contained in this module: Identifying materials that form different types of concrete; Constructing basic footing and edge forms; Cutting, bending and tie reinforcing steel; Safety procedures for handling concrete.

Concrete Forms, Patented Forms and Tilt-Up Wall Systems  WTC 1106 3
The following topics are contained in this module: Constructing job-built forms; Identifying various manufacturers forms; Studying history; Procedure for erecting tilt-up wall panels.

Exterior Finishing, Roofing Applications, Thermal and Moisture Protection  WTC 2107 4
The following topics are contained in this module: Learning types and installation procedures of several sidings; Roofing materials; Insulation and waterproofing materials.

Framing with Metal Studs, Drywall Installation, Drywall Finishing, Interior Finish Two: Suspended Ceilings  WTC 2108 4
The following topics are contained in this module: Selecting and installing metal framing; Installing drywall on walls and ceilings; Patching and finish gypsum drywall; Laying out and installing suspended ceilings.

Stairs, Interior Finish One, Interior Finish Three and Interior Finish Four  WTC 2109 4
The following topics are contained in this module: Constructing wood stairs; Installing wooden doors; Fitting base and wall cabinets; Installing interior trim.

Advanced Roof Systems, Advanced Floor Systems and Advanced Wall Systems  WTC 2110 4
The following topics are contained in this module: Learning procedure for installing commercial roofing materials; Installing hardwood floors; Erecting movable wall panels.

Introduction to Light Equipment, Welding and Metal Buildings  WTC 2111 1
The following topics are contained in this module: Recognising various light construction equipment; Understanding safety practices with welding equipment; Learning components of a metal building.

Site Layout II: Angular Measurement, Advanced Stair Systems & Introduction to Project Management & Supervision  WTC 2112 3
The following topics are contained in this module: Using geometry and right angle trigonometry to perform calculations related to angular measurements; Identifying techniques to finish wooden staircases; Learning project planning; Scheduling estimating and management.
Bermuda College creates a vibrant, inclusive, educational environment to help stimulate students
Professional Designation and Professional Development Programmes in the Division of Professional and Career Education at Bermuda College provide Bermuda’s workforce with access to training and qualifications to national and international standards.

ACCOUNTING

ASSOCIATION OF CHARTERED CERTIFIED ACCOUNTANTS

ACCA PROGRAMME OVERVIEW

Foundations in Accountancy

ACCA’s Foundations in Accountancy is an entry-level suite of awards, including certificates and diplomas. It contains the following qualifications:

- Introductory Certificate in Financial and Management Accounting
- Intermediate Certificate in Financial and Management Accounting
- Diploma in Accounting and Business

Foundations in Accountancy provides flexible entry points with certification awarded at each level and gives students the flexibility to progress onto the ACCA qualification after completion of the Diploma in Accounting and Business.

High school graduates, mature students and working professionals without formal academic qualification can undertake any level* within Foundations in Accountancy.

Students will be assessed to assist in determining the most appropriate level at which they should start. Additionally, ACCA has developed optional self-check modules in English and math to aid prospective students in gauging their general level of ability in English and math. These self-check modules are optional to complete, free of charge and can be accessed from the ACCA website www.accaglobal.com

Introductory Certificate in Financial and Management Accounting

This certificate is suitable for anyone looking to do an introductory qualification in accounting and finance. This includes senior high school leavers, people already working in accounts support roles as well as current high school students enrolled in a business class. Previous academic qualifications are not required.

CURRICULUM

- FA1 TDS ACCA10 Recording Financial Transactions
- MA1 TDS ACCA12 Management Information
- Foundations in Professionalism*  

Intermediate Certificate in Financial and Management Accounting

This certificate is suitable for anyone looking to do an introductory qualification in accounting and finance. This includes school leavers or those already working in accounts support roles. No previous academic qualifications are required to study for this qualification. However, you may wish to complete ACCA’s Introductory Certificate in Financial and Management Accounting before attempting the intermediate certificate.

CURRICULUM

- FA2 TDS ACCA20 Maintaining Financial Records
- MA2 TDS ACCA22 Managing Costs and Finance
- Foundations in Professionalism**

EXEMPTION:

**If one has already completed this module to gain the Introductory Certificate in Financial and Management Accounting, one is not required to complete this a second time.

Diploma in Accounting and Business

This diploma is suitable for anyone looking to do an introductory qualification in accounting and finance. The ability level is broadly equivalent to the first year of a degree programme. If one does not possess previous academic qualifications, it is suggested that they complete the ACCA’s Introductory Certificate and/or the Intermediate Certificate in Financial and Management Accounting before attempting the diploma. This diploma represents the first three exams of the ACCA Qualification.

CURRICULUM

- F1 TDS ACCA30 Accounting in Business
- F2 TDS ACCA32 Management Accounting
- F3 TDS ACCA34 Financial Accounting
- Foundations in Professionalism*

EXEMPTION:

*If one has already completed this module one does not have to complete it again.

ACCA Qualification

ACCA is one option if one wants to work in the accounting profession. If one does not have the minimum qualifications of a bachelor's degree, one should register for one or more of the introductory level qualifications (see Foundations in Accountancy on this page). Students study for the ACCA Qualification after they have completed the Diploma in Accounting.
and Business, but one may wish to complete ACCA’s Introductory Certificate and/or the Intermediate Certificate in Financial and Management Accounting before attempting the Diploma.

EXEMPTION:
* If one has already completed this module one does not have to complete it again.
* Individuals with Accounting or Business degrees may be eligible for exemptions.

**CHARTERED PROFESSIONAL ACCOUNTANT (CPA) – CANADA PROGRAMME OVERVIEW**
The new Chartered Professional Accountant (CPA) designation demonstrates leadership, inspires confidence, and commands respect, while reaffirming the reputation and influence of Canada’s accounting profession in the global financial community.

**CPA Prerequisite Education Programme (CPA PREP)**
If your baccalaureate degree does not include the necessary subject area coverage, you will be able to meet requirements through the individual modules in the new (CPA PREP). Delivered on a part-time basis, the modularised programme requires that students complete only those modules that they require.

- Modules include:
  - Introductory Financial Accounting
  - Introductory Management Accounting
  - Economics
  - Statistics
  - Inter. /Adv. Financial Accounting
  - Corporate Finance
  - Audit and Assurance
  - Tax
  - Inter. /Adv. Management Accounting
  - Strategy and Governance
  - Business Law
  - Information Technology

- see [www.cpabermuda.bm](http://www.cpabermuda.bm) for details or contact aburridge@cpaatlantic.ca

**CHARTERED PUBLIC ACCOUNTANT (CPA) – U.S.A. PROGRAMME OVERVIEW**
The traditional role of a CPA continues to expand and includes all aspects of business from performance to growth strategy. Moreover, today’s CPAs are leaders, as well as close collaborators in high-profile organisational initiatives that require skills far beyond number-crunching.

**Becker CPA Review Programme**
Becker CPA Review has been preparing students to take the CPA Exam for 50 years. The Becker approach is intensive and the results are impressive. Becker offers flexibility with live, online, and self-study CD options to choose from and offers a format that works for your learning style. Becker has a proven record with over 400,000 candidates successfully passing the exam — in fact, students who prepare with Becker CPA Review pass at double the rate of non-Becker students (based on averages of AICPA published pass rates).

**CURRICULUM**
- TDS 940 Business
- TDS 945 Audit
- TDS 950 Regulation
- TDS 955 Finance
Division of Professional and Career Education (PACE)

**COMPLIANCE**

**ASSOCIATION OF CERTIFIED ANTI-MONEY LAUNDERING SPECIALISTS (ACAMS)**

CAMS Prep - Designation Exam Review Course TDS CAMS1

The Certified Anti-Money Laundering Specialist (CAMS) designation denotes a superior level of understanding of international AML/CTF principles. **KIXKO**

**KIXKO Orientation** TDS KIXK01
Course Description: The course demonstrates AML/ATF awareness basics. The course describes money laundering, terrorist financing, and AML requirements under the legislation. An introduction is provided on how to identify money laundering risks, your personal responsibilities and the person to whom you should report any suspicious activities.

**KIXKO AML/ATF Risk Based Assessment** TDS KIXK02
Course Description: The course introduces common methodologies involved in applying a risk based approach to AML/ATF. Four AML/ATF Risk Filters are identified as Customer, Delivery Method/Interface, Products and Services and Geographic Risk. High risk areas are highlighted in respect to account opening and transaction activity. This course is a starting point in the AML/ATF programme to identify and manage risks.

**KIXKO AML/ATF Customer Due Diligence** TDS KIXK03
Course Description: Knowing Your Customer is the best defence against money laundering and terrorist financing activities. Due Diligence processes to identify and verify customer relationships are outlined in the course. The process for verifying source of funds is also introduced.

**KIXKO AML/ATF Monitoring & Reporting** TDS KIXK04
Course Description: The course introduces processes for monitoring and reporting unusual or suspicious transactions. Methods of how to detect and report unusual and suspicious transactions are demonstrated. Recordkeeping and retention requirements are highlighted.

**KIXKO AML/ATF Governance & Oversight** TDS KIXK05
Course Description: This course provides Senior Managers, Directors and Officers with Best Practice Governance and Oversight knowledge to enable compliance with Bermuda Anti-Money Laundering legislation, and to protect the entity and individuals against the threat of money laundering and terrorist financing.

**FACILITIES MANAGEMENT**

**BUILDING OWNERS AND MANAGERS INSTITUTE (BOMI) PROGRAMME OVERVIEW**
BOMI offers comprehensive professional designation programmes, reference books and a variety of other learning opportunities. BOMI designations are backed by the Institute’s 30 years of excellence in developing and offering advanced education programmes and have become marks of distinction throughout the commercial property industry.

**Facilities Management Administrator**
The Facilities Management Administrator (FMA) designation benefits new and experienced facilities professionals. Through its in-depth coverage of critical-need topics, including planning and project management, facilities technologies, finance and investment, and environmental health and worker safety, the FMA programme helps position facilities managers as key strategic contributors within their organisations.

**CURRICULUM**
- RST 880 The Design, Operations and Maintenance of Building Systems PART I
- RST 881 The Design, Operations and Maintenance of Building Systems PART II
- RST 882 Fundamentals of Facilities Management
- RST 884 Facilities Planning and Project Management
- RST 886 Environmental Health and Safety
- RST 887 Ethics is Good Business

**Elective Courses** (Two of these courses must be completed)
- RST 885 Real Estate Investment and Finance
- RST 888 Asset Management
- RST 889 Managing the Organisation

*Courses for this designation rotate. Certification can be earned in 3 years by completing 3 courses per year.*
HEALTH AND BEAUTY

CITY & GUILDS INTERNATIONAL QUALIFICATIONS PROGRAMME OVERVIEW
The City & Guilds international qualification is specifically geared for the international marketplace to measure the knowledge and practical skills of learners. Qualifications are available at three levels: Certificate, Diploma and Advanced Diploma.

HAIRDRESSING QUALIFICATION 3002
City and Guilds Certificate in Hairdressing is a UK-based programme which enjoys international recognition. This part-time programme will be delivered over three semesters in both practical and traditional classroom settings. The programme is suited for people who are new to the profession and those currently working in the profession who require certification.*

Diploma in Hairdressing LEVEL 2

CURRICULUM

First Semester
Introduction to Hairdressing HBP 002 A1
Health and Safety
Working Relationships
Client Consultations
Preparing the Work
Shampoo, Blow Dry, Cutting

Second Semester
Hair Care HBP 003 A1
Colouring
Bleaching
Relaxing

Third Semester
Practicum HBP 004 A1
Open Salon Services

*Students must be 16 years or older

INFORMATION TECHNOLOGY

INTERNATIONAL COMPUTER DRIVING LICENSE (ICDL) PROGRAMME OVERVIEW
ICDL is the world’s leading computer skills certification that promotes digital literacy as a key factor for the proficient use of Information and Communication Technology (ICT). The ICDL programme defines the skills and competencies necessary to use a computer and common computer applications. It is composed of modules covering different skills and knowledge areas, each possessing a standardised Syllabus and certification test.

CURRICULUM

ICDL Base Profile CDL 1101
- Digital literacy base
- Essential set of ICT skills that are crucial for all
- Key concepts which enable people to develop competencies in more specialised areas

Base Modules:
- Computer Essentials
- Online Essentials
- Word Processing
- Spreadsheets

ICDL Standard Profile CDL 1101
- International standard of digital competence
- Develop and certify the digital competencies of an individual offering flexibility to choose the more relevant areas
- 7 modules: 4 ICDL Base + 3 additional modules

Intermediate Modules:
- Presentation
- Using Databases
- IT Security
- Online Collaboration
- Project Management
- Web Editing
- Image Editing

ICDL Advanced Profile
- Higher-level modules
- Certification of skills and knowledge to an expert level
- 4 modules: single module or any combination
LAW

CHARTERED INSTITUTE OF LEGAL EXECUTIVES (CILEX)
PROGRAMME OVERVIEW
The Chartered Institute of Legal Executives (CILEX) is the governing membership body for legal executives.

Level 3 Certificate in Law and Practice
The Level 3 Certificate in Law and Practice was developed to recognise the growing number of students who are either interested in a short but rounded introduction to Law and Practice or have a specific learning need within an area of Law and Legal Practice.

This qualification consists of five units, which are individually accumulated. The units are chosen from a suite of 19 units in accordance with the qualification rules (see below). Each unit is regarded as a worthwhile achievement in its own right, and certification is available at unit level. Students can complete the Level 3 Certificate in Law and Practice en-route to the larger (10 unit) Level 3 Professional Diploma in Law and Practice.

Qualification Rules
You can choose from a suite of 19 units to build up your Certificate qualification. To achieve the Level 3 Certificate in Law and Practice, you must achieve five units in accordance with the following rules:

- LAW 840 Introduction to Law and Practice
- LAW 855 Client Care Skills
- LAW 856 Legal Research Skills
- Plus one Practice unit (chosen from the nine Practice units options)
- The Law unit linked to the Practice unit you have chosen.

Professional Diploma in Law and Practice CILEX Level 3
The Professional Diploma in Law and Practice is a broad-based, practical introduction to law and legal practice. It requires that students achieve across key areas of law and legal practice.

CURRICULUM

Required Courses
- LAW 840 Introduction to Law & Practice
- LAW 841 Contract Law

- LAW 842 Criminal Law
- LAW 843 Land Law
- LAW 844 Law of Tort
- LAW 845 **Criminal Litigation Practice (Linked to Criminal Law)
- LAW 855 Client Care Skills
- LAW 856 Legal Research Skills
- LAW 890 **Civil Litigation Practice (Linked to Contract Law & Law of Tort)

PLUS 1 Elective Courses
(Choice module from the selection below)
- LAW 846 **Family Law (Linked to the Practice of Family Law)
- LAW 892 **Employment Law (Linked to Practice of Employment Law)
- LAW 893 Law of Wills and Succession

Prerequisite: College Placement Test English Reading & Comprehension score of 249 or above.

*Students must be 16 years or older

Courses for this designation rotate. Certification can be earned in 3 years by completing 3-4 courses per year. **Each level 3 unit provides a foundation for the study of its related practice unit requiring one to take the relevant combination of linked units.

FOR DETAILS VISIT: cilex.org.uk

NOTE: CILEX Level 2 certificate programmes are available online via distance learning

MANAGEMENT

AMERICAN MANAGEMENT ASSOCIATION (AMA)
PROGRAMME OVERVIEW
Certificate programmes by the American Management Association have been developed by industry leaders and backed by more than 75 years of management training experience.

The certificate programmes encompass all areas of contemporary management including supervision, human resources, manufacturing, finance, sales, marketing and planning. The courseware delivers comprehensive training and real-world answers.
Certificates are earned over two semesters. Entrance is accepted in the Fall (September) and Spring (January) semesters. Candidates interested in earning their AMA certificates must successfully complete 10 Continuing Education Units. Each module completed is equivalent to 2 CEUs earned. Delegates must complete the core course and select any of the electives offered in any given semester to make up the 10 CEUs.

Certificate in Human Resource Management

The Certificate in Human Resources is a guide to every aspect of human resource management from understanding the basic HR functions to using the Web for recruiting and selecting the latest HRIS.

**CURRICULUM**
- **AMA 12**: The Legal Side of HR
- **AMA 18**: Fundamentals of Human Resources
- **Electives**
  - **AMA 49**: Performance Management
  - **AMA 38**: How to Manage Training
  - **AMA 10**: Communication Skills for Managers

Certificate in General Management

Twenty-first century managers must be able to lead as visionaries, entrepreneurs, mentors, change agents, and team builders. This certificate focuses on developing the skills that enable managers to increase competitive advantage, improve customer service, nurture a diverse workplace and meet global, ethical, and business challenges.

**CURRICULUM**
- **AMA 12**: The Legal Side of HR
- **AMA 13**: Finance and Accounting for Non-Financial Managers
- **Electives**
  - **AMA 10**: Communication Skills for Managers
  - **AMA 15**: First Line Supervision
  - **AMA 51**: How to Manage Conflict in the Organisation

**INSTITUTE OF LEADERSHIP AND MANAGEMENT DEVELOPMENT (ILM)**

The Institute of Leadership and Management is the UK’s number one awarding organisation for leadership and management. With over 2,500 approved centres and registering 90,000 learners each year ILM offers a wide range of qualifications designed to give practicing or aspiring managers a solid foundation in their formal development in their role, with the courses leaving a positive impact on learner’s confidence and career progression.

The Division of Professional and Career Education (PACE) provides a number of ILM accredited courses. The following courses are available:
- **TDS ILM 816**: ILM Level 3 Award in Leadership and Management
- **TDS ILM 815A**: Level 3 Certificate in Leadership and Management
- **TDS ILM 817**: ILM Level 4 Award in Leadership and Management

All leadership and management programmes are accredited by the Institute of Leadership and Management against UK national VRQ standards. One can register to undertake a qualification through the ILM Centre in PACE.

**SUPPLY CHAIN MANAGEMENT ASSOCIATION (SCMA) PROGRAMME OVERVIEW**

**SUPPLY MANAGEMENT TRAINING**

Supply management training consists of introductory technical courses, soft skill seminars and business management seminars. Participants can access either a single course or seminar, or can complete the entire package and earn a document of completion (Diploma/Certificate).

**NOTE:** The supply management training cannot be applied towards C.P.P. accreditation

**CURRICULUM**

**Introduction to Procurement**

This course introduces the opportunities and challenges of international versus domestic procurement. It covers a variety of procurement scenarios: Repetitive purchases of production materials; One-time low-cost items; Large capital goods acquisition; Long-term supply contracts.

**Introduction to Transportation**

Participants will learn the advantages and limitations of the modes of transportation. Topics covered include: The role of freight forwarders;
Brokers and integrated transportation companies. This course will introduce participants to transportation documentation; Basic load planning; Contracts; Insurance; Customs clearance; Letters of credit.

**Introduction to Logistics**  
**BUS 612**  
Participants will discuss how to balance the pressures for large order sizes to achieve low unit costs with the competing pressures to minimise warehouse space and inventory obsolescence. Topics covered include: Forecasting; Safety stocks; Customer service requirements.

**Introduction to Operations Management**  
**BUS 613**  
This course will familiarise participants with operations in manufacturing, distribution and services organisations. Topics covered: Capacity planning and scheduling; PLUS concepts of JIT/Lean, OPT/TOC and MRP; Forecasting techniques; Demand planning; Inventory ordering.

**Communication and Relationship Skills (Seminar)**  
**BUS 620**  
Principles and guidelines for effective communications in a business environment are the focus of this seminar.

**Negotiation Skills (Seminar)**  
**BUS 621**  
This seminar begins with an exploration of the nature and causes of conflict, and the barriers to resolving conflict. Various conflict resolution approaches are then introduced.

**Competitive Bidding, Contract Preparation and Contract Law (Seminar)**  
**BUS 622**  
Participants will learn the basics of effective contract management. Contract basics such as types of contracts, characteristics of good contracts and the contract management lifecycle are topics covered. Participants will also gain a familiarity with managing service level agreements and mitigating risk.

**Introduction to Accounting and Finance (Seminar)**  
**BUS 623**  
This seminar provides a comprehensive overview of how finance impacts supply management. Participants learn how to read financial statements and understand how to make a business case for an investment and evaluate investment opportunities.

**Introduction to Marketing (Seminar)**  
**BUS 624**  
Participants will learn the role and purpose of marketing and how marketing affects supply management, the differences between marketing and sales, marketing products and services, in addition to B2B and B2C marketing.

**Introduction to Business Planning (Seminar)**  
**BUS 625**  
This seminar provides an overview of strategic planning in an organisation and the basic elements of a strategic analysis (SWOT). Topics covered include: Porter 5-forces model; Critical success factors; Strategic maps and company positioning; Strategic models.

**HEALTH AND BEAUTY**

**CERTIFICATE IN NAIL TECHNOLOGY**

**PROGRAMME OVERVIEW**

Learn the art and science of nail technology. This programme will provide the latest training required for the nail technology industry today. You will learn everything from basic nail care to spa manicures and pedicures, artificial nails, electric nail drill filing techniques and nail art.

Students will engage in learning the right skills, knowledge, and competencies required to work as nail technicians. This is a booming industry, and the right attitude and competencies are what will keep you employed. By the completion of this programme, graduates will be ready to join the industry as highly skilled nail technicians. The eleven-month, part-time programme involves a combination of theory and practical experience in the classroom and in salon settings.

**CURRICULUM**

**First Semester**

**Introduction to Nail Technology**  
**TDS NAT1 A1**  
Life Skills/Work Ethic  
Communication for Success  
Infection Control  
General Anatomy and Physiology  
Applied Chemistry  
Nail Diseases and Disorders  
Basics of Electricity

**Second Semester**

**Nail Care**  
**TDS NAT2 A1**  
Manicuring  
Pedicuring  
Electric Filing  
Nail Tips  
UV Gels  
Nail Art
HEALTHCARE

CERTIFICATE FOR NURSING ASSISTANTS
PROGRAMME OVERVIEW

The Certificate for Nursing Assistants was developed in collaboration with the Bermuda Nursing Council. It prepares participants with the prerequisites needed to become registered with the Bermuda Nursing Council as nursing assistants in the healthcare industry. Participants will cover topics such as: Vital Signs; Medical Terminology; Caring for Seniors and Others in Need of Medical Care; Professional Regulations; Legal and Ethical Issues in the Healthcare Industry. Those entering this programme must be proficient in English and mathematics. Potential students will be assessed.

CURRICULUM

First Semester
Fundamentals of Healthcare Delivery CCW 810
This course is designed to provide a fundamental understanding of the requirements and nature of working in a healthcare setting with professionals who are responsible for patient care. Topics covered include: Medical terminology; Professional regulations; Legal and ethical issues governing healthcare in Bermuda.

Second Semester
Clinical Care Assistant CCW 820
This course blends the practical and theoretical activities of nursing assistance covering topics such as Administering Vital Signs, CPR, Manual Handling, etc. Prerequisite: CCW 810

Clinical Practicum
The clinical provides practical, hands-on experiences in a diverse group of approved healthcare settings under the supervision of a certified nurse. This takes place one weekend each month followed by a one-week, full-time clinical near the end of the programme. Prerequisite: CCW 810 & CCW 820

Those entering this programme must demonstrate proficiency in English and Math with proof of one of the following:
- CPT Scores meeting the minimum requirement
- College Level English and Math
- An Associate Degree or higher

Students will be required to submit the following prior to the programme commencing:
- Current Immunisation Record
- Hair Follicle Drug Screening (Bermuda Hospitals Board only)
- American Heart Association Cardiopulmonary Resuscitation (CPR) for Healthcare Providers (CPR & AED)
- Police Vetting Report
- Proof of valid health insurance

CERTIFICATE IN EMERGENCY MEDICAL TECHNICIAN (EMT) TDS EMT 1
PROGRAMME OVERVIEW

The Certificate programme prepares graduates to initiate assessment and care of the ill or injured patient. After successful completion of the programme, each graduate must succeed at the National Registry of Emergency Medical Technicians (NREMT) practical and computer based knowledge examinations. This programme provides opportunity to prepare for entry-level positions in the Emergency Medical Services profession for possible employment in a variety of pre-hospital, hospital, Fire and Rescue Services and industrial settings.

CURRICULUM

Educational focus is on personal safety, safety of the crew, patient and bystanders, patient assessment, patient care, lifting and moving, transport, transfer of care and patient advocacy. Emergency Medical Technicians function as part of a comprehensive emergency team. The EMT course is a 15 week course with theoretical and practical components.

All persons applying to the EMT Programme must:
- Be 18 years and older
- Be physically fit
- Have completed college level Math and English or meet the required level on the Computerised Placement Test (CPT) at the Bermuda College. (Must provide proof to the PACE Division before you can submit your registration form)
The following screenings and certificates are mandatory for all students in the programme. Screenings are available at the Health Department, King Edward Memorial Hospital or your private doctor:

- Tuberculosis (TB) Test
- Hepatitis B Test and/or Shot as Required
- Tetanus Shot
- Hair Follicle Drug Screening (Bermuda Hospitals Board only)
- CPR Certificate (American Heart Association)
- Criminal Record Check
- Proof of valid health insurance

**EXERCISE SCIENCE**

**PERSONAL FITNESS TRAINER CERTIFICATION PROGRAMME OVERVIEW**

Bermuda College, in collaboration with the World Instructor Training Schools (W.I.T.S.) a leader in fitness training and certification in the U.S., is delivering the Personal Fitness Trainer Certification. This programme consists of four essential components: a strong theoretical foundation taught through classroom lecture and discussion; hands-on practice during which students develop professional skills and techniques through observation and practice; an internship which provides additional practical experiences in a real world setting; and CPR/AED Certification which must be sought externally. This is a nine-week, intensive course ending with an internship in an approved local fitness centre.

**CURRICULUM**

**PART 1** FIT 820

- Theory of Personal Fitness Training
- Anatomy and Biomechanics
- Assessing Body Composition
- Rx for Cardiovascular Fitness and Muscular Fitness
- Exercise Physiology
- Theory Assessment
- Practical assessment

**PART 2** FIT 821

- Internship
- CPR/AED Certification

**VOCATIONAL**

**CERTIFICATE IN BASIC HORTICULTURE PROGRAMME OVERVIEW**

This foundational, competency-based programme is designed to prepare students with the skills and knowledge to engage in careers in the horticulture industry. Upon completion, students will be qualified and ready to work in grounds maintenance, plant nurseries, landscaping, garden centres, golf courses, lawn care, and parks and recreation departments.

**CURRICULUM**

**First Semester**

- **Science of Horticulture** AGC 990
  Topics include: Horticulture and the environment; Plant structures and functions; Plant propagation; Soil science and nutrients; Plant identification and pruning.

**Second Semester**

- **Technology in Horticulture** AGC 991
  Topics include: Operation and Maintenance of Horticulture Equipment including power and hand tools.

**CERTIFIED RESTAURANT SERVER PROGRAMME OVERVIEW**

The Restaurant Server training will cover the art of table service, effective techniques, and dealing with difficult customers. The American Hotel and Lodging Association has been a primary source of these certifications. The certification requires a certain level of knowledge and experience. Practical knowledge and theoretical knowledge both are important phases of learning in the restaurant industry. This programme offers a perfect combination of both practical and theoretical methods.
SHORT TRAINING AND EXAM REVIEW COURSES

Bartending FAB 815
Bartending is a course designed for persons wishing to become professional bartenders or for the person who wants to know more about mixology, liqueurs and wine. The course also covers the required TIPS training.

ENGLISH FOR SPEAKERS OF OTHER LANGUAGES (ESOL) PROGRAMME OVERVIEW
English as a Second Language offers up-to-date English language instruction to adult learners seeking to communicate with English speakers, acquire basic literacy skills, learn about the culture and customs of Bermuda and fulfill their goals as family members, workers, community participants, and lifelong learners. Applicants will be assessed to determine placement.

English for Speakers of Other Languages
Beginners ESL 800
This course is ideal for individuals who have little experience communicating in English. The participants will explore communicative English and develop conversation skills.

English for Speakers of Other Languages
Intermediate ESL 801
Students must have some fluency in speaking and reading English. The course will focus on all four skill areas: listening, speaking, reading, and writing. Students will work to improve their grammar, use of idioms, reading, and writing. Discussions will be related to various topics of student interest.

Introduction to Real Estate RST 860
The Introduction to Real Estate course provides the fundamental knowledge required for those thinking of entering, or have just entered the real estate industry. Additionally, it is designed to assist those undertaking the Bermuda Real Estate exam.

Marine Navigation NAV 851
Navigation is a comprehensive course designed to acquaint one with all the tools and skills required for successful coastal navigation. NOTE: This course covers the requirement for Marine and Ports local Class C license.

Student Resources are those areas and functions of Bermuda College that directly contribute to a successful learning environment for the student.

STUDENT RESOURCES: p. 129 - 134

Academic Resource Centre ................................................................. 130
Counselling and Career Centre ......................................................... 131
Student Life Activities ........................................................................ 131
Student Government Council .......................................................... 131
Student Employment ......................................................................... 131
Financial Support Programmes ......................................................... 131
Library/Bookstore ............................................................................. 132
Security & Safety ............................................................................... 133
College Map ...................................................................................... 134
The Academic Resource Centre serves all Bermuda College students in their quest for academic excellence. The ARC provides academic support, enhances student learning and assists in the development of independent learning in a friendly comfortable environment. The tutors provide individual and small group tutoring. Throughout the year, workshops are offered on a variety of topics including time management, test-taking skills, study strategies, writing skills, etc.

The ARC has an open door policy. It is advisable, however, to make appointments to see individual tutors when deadlines for research papers and exams are approaching.

The ARC urges all students to seek assistance at the earliest opportunity and become familiar with the Centre even before they encounter difficulties in their courses. On occasion, students come into the ARC to do homework assignments and/or study in order to take advantage of the supportive environment. Lecturers often direct students to use the ARC. Such referrals should be taken seriously, in order to ensure success.

Bermuda College also offers SMARTHINKING, a 24/7 online tutoring service accessible through the student portal.

Disabilities Support Services
Students who have a documented disability are encouraged to discuss their challenges with the ARC Director early in the application process and by disclosure on the application form. Students can be assured that all such information is treated with the strictest of confidence and is used to address student needs in a timely manner. Testing accommodations (extended time) are provided for students who qualify based on their documented disability.

Types of Disabilities (mild to moderate) include but are not limited to:
- Learning Disabilities-deficit in processing information (includes dyslexia, dysgraphia, dyscalculia)
- Attention Deficit Disorder/Attention Deficit Hyperactivity Disorder (ADD/ADHD)
- Autism (including Asperger Syndrome which is a high functioning form of autism)
- Visual Impairment
- Hearing Impairment
- Mobility Impairment
- Mental Health Disorder
- Speech Disorder
- Traumatic Brain Injury

Applying to the College and Requesting Services
Applications to the College will be considered if the student discloses the disability on the application form. Students must complete Section 5 which addresses special needs. The student must contact the Director of the Academic Resource Centre to discuss disability details. Parents are welcome, however, the student must be able to clearly articulate his or her educational goals. All documentation and requests for accommodations will be assessed in order for College acceptance to be considered. Students can be assured that all such information is treated with the strictest of confidentiality. Factors that determine college acceptance and the granting of reasonable accommodations include the following:
- Documentation provided by a qualified professional accompanies College application.
- Student must meet programme or course placement score requirements in mathematics and English.
- The academic and technical standards required for admission in a College programme or course are not substantially altered.
- The effects of the disability can be overcome with reasonable accommodations.
- The nature and cost of the accommodation must not create an undue financial burden to the College.

For information, contact:
Dr. Lisa Osborne | Director T: 239-4102 E: losborne@college.bm
COUNSELLING & CAREER CENTRE
Located on the second level of the Library Building, the Counselling & Career Centre (CCC) team facilitates opportunities for goal achievement with respect to academic, career, and personal development. Members of staff provide individual and group services to students, alumni and members of the community.

We aim to:
- Explore and evaluate the variety of transfer abroad options supporting continuing education including online and traditional options.
- Develop effective admission essays and personal statements to support university and scholarship applications.
- Understand and select the appropriate financing options to support continuing education goals.
- Facilitate workforce development through assessment of interests, skills, and abilities.
- Prepare effective job search/career transition strategies by developing an effective toolkit – resumé writing, cover letter writing, interview skills, and networking skills.

By appointment or walk-in, the Counselling & Career Centre is ready to work with students as they consider, assess and develop their goals. A timely visit equals a strong foundation for future success!

STUDENT LIFE ACTIVITIES
The College offers students the opportunity to participate in a variety of co-curricular activities. This includes membership in Registered Student organisations, such as: W.O.M.Y.N. (Well-Educated, Open-Minded, Modern, Young and Noble) - Young Women’s Forum, MENSPEAK - (Male Forum), Literary Society, Teachers of Tomorrow, Photography, Hospitality Club, Cura Te Ipsum (Heal Thyself), IAAP - Student Chapter, Bermuda College Art Gallery (BCAG) and Volunteer Action. Students may also participate in more physical activities that include Zumba, soccer, basketball, badminton (beginner and intermediate), archery and weight training.

STUDENT GOVERNMENT COUNCIL
Student Government Council (SGC) is a campus organisation established to voice student concerns and implement student-led activities. The SGC is comprised of senators (student representatives) and executive members (president, vice-president, treasurer and secretary). Senatorial appointments are made in September allowing incoming freshmen to participate and gain experience in the operations of SGC.

STUDENT EMPLOYMENT
Students wishing to work part-time on and off campus may register with the Student Employment Office located in the Counselling & Career Centre. Students who are employed through the Office may work no more than twenty hours per week when classes are in session and must maintain a minimum grade point average of 2.0 each semester.

For information, contact:
Ms. Elisha Miller | Student Employment Coordinator
Tel: 236-9000 ext.4393  Email: emiller@college.bm

FINANCIAL SUPPORT PROGRAMMES
The Counselling & Career Centre facilitates financial support programmes to offset the educational cost of enrolment at Bermuda College. Options include entry scholarships, awards and financial aid grants. Financial Aid grants were recently diversified to include the following options: tuition/fees grants, the Book loan programme, tuition/fee waivers for Ex-Foster Care recipients, and work study grants.
A visit to www.bermudascholarships.com provides summary information describing all of the awards administered by the Counselling & Career Centre. Alternatively, we invite prospective and current students to contact the Financial Aid Committee directly via financialaid@college.bm for more information on financial support options, application criteria and application deadlines.

For information, contact:
Ms. Nikkita Scott | Director
Tel: 239-4084  Email: nscott@college.bm
LIBRARY
The Bermuda College Library subscribes to thousands of journals and magazines via an academic database, and new titles are added monthly to the bookshelves. The Library also has subject-related e-books to complement the curriculum.

Professionally trained librarians and skilled staff are here to provide patrons’ information needs whether as a student, faculty, staff, or member of the community.

The Library provides quiet spaces where students can work with laptops, conduct research, or study. The Library also has computer workstations and group meeting rooms which patrons may use. There is a lounge for relaxation and quiet socialisation known as the “Chill Zone” all in the building under the Clocktower.

OUR MISSION is to successfully facilitate and support the teaching and learning objectives of the College.

SEMESTER OPENING HOURS:
Monday - Thursday: 9 a.m. - 8 p.m.
Friday: 9 a.m. - 5 p.m.
Sunday: 1 p.m. - 5 p.m.

NOTE: Opening hours are reduced during semester breaks and during the summer session
- All hours are subject to change.

For information visit our:
- Webpage: http://www.college.bm
- Facebook page: Bermuda College Library
- Tel: 239-4033
- Email: circulation@college.bm or reference@college.bm

BOOKSTORE
BOOKS AND SUPPLIES THAT WORK AS HARD AS YOU DO!
We are not just any bookstore.
We offer all the tools you need to make your college experience A SUCCESS!

OPENING HOURS
Monday - Thursday: 8:45 a.m. - 6:00 p.m.
Friday: 8:45 a.m - 4:30 p.m.

EXTENDED HOURS
FALL SEMESTER
FIRST TWO WEEKS Monday - Thursday: 8:45 a.m. - 7 p.m.
First Saturday before semester begins: 10 a.m. - 2 p.m.
SPRING SEMESTER
FIRST WEEK: 8:45 a.m. - 7 p.m.

SUMMER HOURS
Monday - Thursday: 8:45 a.m. - 4:30 p.m.
Friday: 8:45 a.m - 4:30 p.m. (subject to change)

LOCATION: 1st Floor College Centre

SECURITY & SAFETY

Location: 1st Floor College Centre (Room C107)

Hours of Operation:
- Monday to Thursday 7:00 a.m. – 9:30 p.m.
- Friday 7:00 a.m. – 6:30 p.m.
- Saturday 7:00 a.m. – 5 p.m.
- Sunday 9:00 a.m. – 5 p.m.

These are the normal hours of operation for Bermuda College. During the hours stated above, Security will be available to perform regular duties. Any events scheduled outside of regular operating hours will need to be pre-approved to ensure the presence of required facilities and security personnel.

Contact Numbers:
- 236-9000 ext.4911 – Security Office
- 239-4053 – Fax
- Locker queries directed to: lockers@college.bm
- Lost and found queries directed to: lostandfound@college.bm

Department Responsibilities:
- Mail Services, Security Monitoring (CCTV), Card Access, Fire & Intrusion Alarms, Lost & Found, Student/Employee ID’s, Campus Key Cutting and Parking

A few pointers: Every one has a right to feel safe on campus. You can help make the campus safe for everyone by:

- Recognising risks and taking steps to avoid potentially hazardous situations.
- Making use of the College’s team of Security & Safety Officers by reporting any suspicious activity or behaviour to Security.
- Avoiding isolated places, especially at night. If you require an escort contact Security at ext. 4911.
- Changing direction and going to an area where there are other people if you think you are being followed.
- Parking your car or cycle in designated areas; they are well lit and observed via CCTV.
- Walking confidently to or from your car or bike, with your keys in your hand ready to unlock your vehicle.
- Saying something if you see something suspicious.
