### PAYMENT INFORMATION

All tuition is payable in advance. Students whose accounts are in arrears for any reason, will be denied grade reports, transcripts, personal recommendations, withdrawal in good standing, permission to register for further courses and the right to graduate, until all obligations have been settled.

If your fees change for any reason after your initial payment is made (i.e. lab fees, change in schedule, etc.), it is the student's responsibility to ensure prompt payment of the balance.

All statements are available through the Student Portal. Students can login using their user ID and password. The online bill reflects the student's current registration and billing information. The statement system is 'live' and students can verify that all fees are satisfied before the payment deadline.

### PAYMENT METHODS

**Bermuda College Online Payments** (using credit cards) (American Express not accepted)

- On the College website ([www.college.bm](http://www.college.bm)), under **Quicklinks**.
- On the Student Portal under **My Account**
- On the **College App**

**Local Banks Bill Payments** through HSBC, Butterfield Bank and Clarien Bank.

**Business Office Front Desk, College Centre 2nd floor**  
All major credit cards are accepted. (American Express not accepted).

Cheques should be made payable in Bermuda or US funds to Bermuda College.

### WITHDRAWALS & REFUNDS

**FULL REFUND** prior to the first day of class for each semester.

**PARTIAL TUITION REFUND** of 30% on or before the financial penalty date.

**NO REFUND** after the 10th day of class for each semester.

Students are responsible for fees if courses are dropped after the financial penalty date.

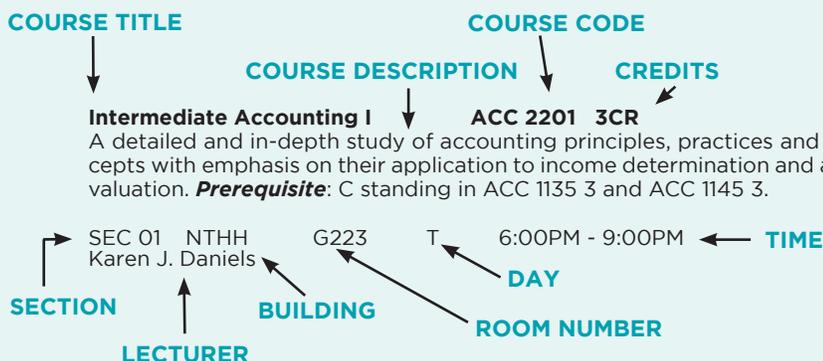

**NOTE: Withdrawal from any course is a formal process. Non-attendance of class does not constitute an official withdrawal.**

## LAB FEES *Check Bermuda College Catalogue for details @ [www.college.bm](http://www.college.bm)*

### DROPPING, WITHDRAWAL & REFUND POLICY

Students are responsible for any fees incurred. Dropping or withdrawing from a class(es) is not an automatic process. It is the student's responsibility to officially drop the classe(s) he/she is not attending or no longer wishes to be enrolled. Unwanted classes should be dropped as early as possible before the start of the term in order to receive a full refund and release seats for students on the waitlists. The Drop and Withdrawal Form must be submitted to Student Enrolment Registration and Records (SERR).

### Postcolonial Visual Art AHS 2290 3CR

This is a course of study on contemporary cross-cultural visual art in relation to its colonial heritage. Responses to the colonial archive are a significant current in late 20th and early 21st century culture. In many different contexts visual artists have critiqued and deconstructed dominant Western myths and stereotypes. In this course we will address such responses, and the issues that they raise about relationships between cultures.

**Prerequisites: AHS 1126 and AHS 1127**

### General Human Biology BIO 1104 4CR

The second half of two courses for non-biology majors needing to fulfil a natural science requirement. This course will focus on basic human gross anatomy, basic physiology and some basic pathology.

**Prerequisite: A grade of "C" or better in BIO 0013.**

SECD1 ONLINE M 6:00PM-7:00PM  
Alnisha Simmons

### Principles of Biology I BIO 1121 4CR

Designed for students intending to pursue further studies in the biological sciences, this course is the first of two providing a comprehensive introduction to biology. The aim is to foster a realisation of the underlying similarities of organisms and an appreciation of their diversity. Topics include cellular processes with a focus on biochemistry, histology, evolution, genetics, and taxonomy. A sound background in chemistry, physics and mathematics is essential.

Laboratory. **Prerequisites: A grade of "C" or better in BIO 0013 and MAT 0015, or alternative in Biology (with Lab); Corequisite: MAT 1105.**

**Medical Nutrition** **BIO 2250** **4CR**

This course offers an introduction to the foundations of nutritional medicine. It is designed for students interested in health science. In this course the introduction and discussion of current trends in clinical nutrition as well as nutritional analysis and assessment are explored. Also covered are the general biochemistry and function of nutrients. Selected diseases prevented or managed by nutrition will be explored as well. Course topics in nutritional medicine include weight management, cancer support, cardiovascular disease, diabetes mellitus, food intolerances and allergies.

This course is highly recommended for students that are registered in the nursing programme. Laboratory.

**Prerequisite: BIO 1122**

**Introduction to Pathophysiology** **BIO 2260** **3CR**

This course offers an introduction to the foundation of pathophysiology and is designed for students who are interested in a career in medicine and allied health. This course is presented as a general overview of the functional changes that result in disease, and selected prevalent diseases are explored by way of the systems of the human body. Throughout the course, an emphasis will be placed on the underlying cellular and molecular mechanism of the physiological abnormalities occurring in clinically prevalent disease states resulting from the regulatory mechanism of the body becoming out of balance. The body systems are covered at different stages of life and case-based exercises allow for the application of the course material to real-life practice in the healthcare context. BIO 2260 students will also have the opportunity to explore current trends in literature regarding the prevention, management and treatment of disease from the functional perspective. An excellent foundation in anatomy and physiology is essential.

**Introduction to Business Applications of Computers CIS 1120 3CR**

Intended to provide students with an initial exposure to the main areas of software used in business: word processing, spreadsheets and presentation software. Additionally, an introduction to database management will be provided. A consideration of business application software in the context of the overall computer system will also be covered to include an overview of computer design, networking, operating systems and hardware options. This course is also suitable for those students studying programmes in the social sciences or science.

**Introduction to Computers and Information Technology CIS 1125 3CR**

This entry-level survey course explores computers and their applications. Students are provided with an appreciation of what computers are, how they work and what tasks can be accomplished using them. Topics include the impact of computers on society; computer hardware including CPU, disks, other storage devices and input and output devices; computer software including data representation, data structures, operating systems, application programmes and database management systems; introduction to programming and programming languages; computer communications including the Internet, the worldwide web and e-mail; a brief history of computing; computer security, privacy and ethics. The coursework will cover the material needed for students

to take the CompTIA IT Fundamental Certification.

**Prerequisite:** A grade of a "C" or better in ENG 0012. **Fundamental Computer Literacy or CIS 1120 as a corequisite.**

**Data Management CIS 1130 3CR**

This course will feature the application of the SQL query language for managing and creating databases. A typical report and application generator will also be studied. Provides essential theoretical and practical knowledge required by those who expect to be involved in the storage and retrieval of information. Students will get an introduction to Blockchain Technology and how it is now impacting cryptocurrency, FinTech, RegTech, and overall InfoTech. Data privacy and protection will also be covered in this course, with a focus on General Data Protection Regulation (GDPR) and Bermuda's Personal Information Protection Act (PIPA). The coursework will cover the material needed for students to take the Oracle Database Certification OCA or OCP. **Prerequisites:** MAT 0015 and CIS 1125

**Operating Systems & Infrastructure CIS 2295 3CR**

This course is an introduction to concepts and algorithms incorporated in operating systems. It examines interrelationships between operating systems and computer hardware. Compares batch, real-time, and timesharing operating systems, process management techniques, interrupt, handlers, CPU scheduling algorithm, interlocks, resource allocation, deadlocks, paging, and memory systems. It also introduces advanced topics in the design of operating systems, networking, device management and file management techniques, scheduling algorithms, security, queuing theories, and comparison of existing operating systems for client-server. Students will also get exposed to virtualisation and virtual environments. The coursework will cover the material needed for students to take the CompTIA Server+, Linux+, Cloud+, and Cloud Essentials+ Certifications. **Prerequisites: CIS 2278, CIS 2290 Corequisites: CIS 2297**

**Security Fundamentals and Policies CIS 2297 3CR**

This course offers in-depth coverage of the current risks and threats to an organisation's data together with a structured way of addressing the safeguarding of these critical electronic assets. The course provides a foundation for those responsible for protecting network services, devices, traffic and data. Additionally, the course provides the broad-based knowledge necessary to prepare students for further study in other specialised security fields. The coursework will cover the material needed for students to take the CompTIA Security+ Certification and CompTIA CSA/CySA+ Cyber Security Certification. **Prerequisite: CIS 2290, CIS 2278.**

## EDUCATION

### Introduction to Child Development EDU 1103 3CR

A survey of the concepts, theories and various aspects of the development of children and adolescents. Topics include prenatal development, patterns of physical growth, sensation and perception, cognitive development, information processing, intelligence and assessment, language development and personality development. A minimum grade of B is required. **Prerequisite: A grade of "C" or better in ENG 0012**

SEC01 HH H275 R 6:00PM-9:00PM

Mellisa Gibbons-Tankard

### Nutrition Health & Safety in Early Childhood Education EDU 1104 3CR

This course will provide the student with a variety of safety concepts. The relationship between nutrition, health and safety will be explored, as well as strategies for communicating wellness concepts to children and families. **Prerequisite: A grade of "C" or better in ENG 0012**

SEC01 NH G228 T 6:00PM-9:00PM

## ELECTRICAL WIRING

**DC Theory: OHM'S Law ELN 1107 1CR**

This module introduces the student to one of the most fundamental laws in all of electricity and electronics - Ohm's Law. Other topics include: What is electricity; Electrical units and Ohm's Law; The Properties of Power in an electrical circuit; Power in

DC Circuits; An introduction to electrical and electronic devices; The potential hazards of energised circuits; How to draw basic electrical circuits.

SEC01 TH T230 MW 1:30 PM-5:30 PM  
Delroy Musson

### The DC Series Circuit ELN 1108 1CR

This module introduces the student to the DC series circuit. The topics covered are: Calculating resistance in a DC series circuit; How current reacts in DC series circuits; How voltage functions in a DC series circuit; Working with ratio and proportion; How voltage dividers work in a DC series circuit; How to calculate power in a DC series circuit. In addition to the DC theory, there are nine lab assignments that give the student hands-on experience with actual DC series circuits.

SEC01 TH T230 MW 1:30 PM-5:30 PM  
Delroy Musson

### The DC Parallel Circuit ELN 1109 1CR

This module introduces the student to the DC parallel circuit. The topics covered are: How voltage functions in a DC Parallel circuit; Calculating resistance in a DC parallel circuit; Understanding resistance in a DC parallel circuit; How current reacts in a DC parallel circuit; How current dividers work in a DC

parallel circuit; How to calculate power in a DC parallel circuit. This module also includes seven lab assignments that investigate the various characteristics of the DC parallel circuit.

SEC01 TH T230 MW 1:30 PM-5:30 PM  
Delroy Musson

**The DC Combination Circuit ELN 1110 1CR**

This module introduces the student to the DC combination circuit. Topics covered are: Calculating resistance in a DC combination circuit; How to calculate current in a DC combination circuit; How voltage functions in a DC combination circuit; How to calculate power in a DC combination circuit; Understanding voltage polarity and voltage drop; Understanding the design and operation of the three wire single-phase system; Understanding the principles of magnetism and electromagnetism. Eight labs are included in this module which provides the student with a thorough understanding of the DC combination circuit.

SEC01 TH T230 MW 1:30 PM-5:30 PM

**An Introduction to the National Electrical Code ELN 1112 1CR**

This module is the first of twelve powerful and comprehensive courses on the understanding, structure, language and application of the National Electrical Code. Topics include: Introduction to the NEC (National Electrical Code); Understanding and applying article 110 of the NEC; Interpreting the language of NEC article 100; General building wire properties and the NEC; Understanding conductor insulation and NEC specifications; Understanding the NEC process; Introduction to wiring devices; General requirements related to wiring devices; Specific receptacle and switch installation requirements.

SEC01 TH T230 MW 1:30 PM-5:30 PM  
Delroy Musson

**Working with Series and Parallel RL & RC Circuits ELN 2119 1CR**

This module introduces the student to series and parallel RL circuits and series and parallel RC circuits; Topics include: Understanding the basic characteristics of AC circuits; Comprehending the parameters of series RL circuits; Understanding and working with parallel RL circuits; Comprehending the parameters

of series RC circuits; Understanding and working with parallel RC circuits. Fifteen lab assignments give the student a thorough knowledge of series and parallel RL and RC circuits.

SEC01 TH T230 MW 8:30AM-12:30PM  
Delroy Musson

**Analysing and Working with Combination RLC Circuits ELN 2120 1CR**

This series of lessons provides the necessary information, along with twenty-one lab assignments, for the student to solve job problems for both series and parallel circuits containing resistance, inductance and capacitance. Topics include: Identifying and working with LC circuits; Comprehending and analysing series RLC circuits; Resonance in parallel circuits; Comparing series and parallel RLC circuits; Analysing and working with Combination RLC circuits; Series resonance; Parallel resonance; Clearly and accurately describe the characteristics of series and parallel resonant circuits.

SEC01 TH T230 MW 8:30AM-12:30PM  
Delroy Musson

**Filters, Power Factor and Power Factor Correction ELN 2121 1CR**

This module introduces the student to the theory and operation of various types of filters and their application. In addition, the student will examine power factor and power factor correction. Topics include: An examination of the four classifications for filters; Power factor; Power factor correction. Six labs give the student the training and the confidence to solve problems involving filters and power factor on the job.

SEC01 TH T230 MW 8:30AM-12:30PM  
Delroy Musson

**Understanding the Principles of Three Phase Systems ELN 2122 1CR**

This module introduces the student to the fundamental design and function of single and three-phase transformers. Topics include: Understanding the fundamental design and function of transformers; Learning how to identify and make single-phase transformer connections; Proper transformer installation procedures; Understanding the principles of three-phase systems; Learning how to identify and connect three phase transformers. Six lab assignments give the student practical hands on experience with the various types of transformer connections used in industry.

SEC01 TH T230 MW 8:30AM-12:30PM  
Delroy Musson

**NEC - Branch Circuits 1 & 2 and Feeders and Services ELN 2123 1CR**

This module allows the student to make use of Table 8 in chapter 9 of the NEC to investigate the properties of various conductor sizes. The student will use his/her knowledge of the NEC to work with branch circuits, services and feeders. Topics include: The principles involved in sizing building wire; Calculating conductor

ampacity; Branch circuits 1 & 2; Outside branch circuits and feeders; Services 1; Lighting and receptacles.

SEC01 TH T230 MW 8:30AM-12:30PM  
Delroy Musson

**NEC – Requirements for Cable Assemblies & Wiring Methods** **ELN 2124 1CR**

This module focuses on the various wiring methods recognised by the NEC. In addition, the student will become acquainted with many of the terms the NEC uses in conjunction with conduit wiring methods. Topics include: How to correctly apply the NEC's conduit wiring methods; The NEC's requirements for cable assemblies; Identifying boxes and fittings as defined by the NEC; Wiring methods - general installation requirements; Wiring methods - specific; Electrical nonmetallic tubing (ENT)

SEC01 TH T230 MW 8:30AM-12:30PM  
Delroy Musson

**Solar Power Generation and Fuel Cell Basics** **ELN 5155 1CR**

This course focuses on two very important alternative energy topics: Solar Power and Fuel Cell Technology. The student will study the provisions of NEC Article 690 and how they apply to Solar Photovoltaic energy systems and the Array Circuits. Topics include: NEC requirements for solar power generation; Information technology sites and critical loads; Uninterruptible power supplies; Infrastructure components; Critical UPS systems design configurations; Solar photovoltaic systems-recommended practices (1), (2) and (3); Fuel cell basics; Fuel cell applications (1) and (2).

SEC01 TH T230 TR 1:30PM-5:30PM  
Delroy Musson

**High Voltage Testing** **ELN 5156 1CR**

This module introduces the student to high voltage testing. The student will learn what high voltage testing is and why it is used; list the types of high voltage tests and describe when they are used; describe the types of leakage currents that are present during these tests; describe the advantages of AC and DC testing; describe the different types of test instruments used in conducting high voltage tests. Topics include: Introduction to high voltage testing; High voltage testing safety; Preparing for high voltage testing; Insulation quality testing; Acceptance and maintenance testing; Insulation testing using the megohmmeter.

SEC01 TH T230 TR 1:30PM-5:30PM  
Delroy Musson

**Harmonics and Power Quality Surveys** **ELN 5157 1CR**

This module introduces the student to Power Quality. The student will review the various systems that comprise a modern power distribution system. He or she will learn why Harmonics is considered to be one of the most significant power quality problems found in electrical distribution systems today. Topics include: Power distribution systems; Power quality terminology, Costs and concepts; Types of power

problems; Harmonics; Power quality surveys; Power system troubleshooting; Mitigation equipment.

SEC01 TH T230 TR 1:30PM-5:30PM

**Automation Networks** **ELN 5158 1CR**

In this module the student will learn what automation networks are and how they are different from traditional wiring systems in buildings. In addition, the student will study about the advantages of a network infrastructure over dedicated wiring systems. Topics include: Introduction to automation networks; Automation network fundamentals; Installing building automation networks; Intelligent nodes and network devices; Integrating building automation networks.

SEC01 TH T230 TR 1:30PM-5:30PM  
Delroy Musson

**Understanding Emergency Building Installation Requirements** **ELN 5159 1CR**

This module serves as a review of earlier lessons on NEC Article 230 services. In addition, it will cover items like GPPE for Services under 600 volts nominal or less and the installation requirements for services exceeding 600 volts nominal. The student will study NEC Article 725-remote control signalling and examine the significant change to the 2005 Code. Topics include: Installing electrical services; Pools, Fountains and similar locations; Understanding emergency building installation requirements; Over 600 volt installations; Remote control signalling and power limited circuits; NEC 2005 (1) & (2); Determining conductor ampacity.

SEC01 TH T230 TR 1:30PM-5:30PM  
Delroy Musson

**Electrical Load Calculations as per the NEC** **ELN 5160 1CR**

This final Code lesson concentrates on various load calculations for single and multi-family residential units. Topics include: Calculating raceway fill; Box size and fill calculations; Introduction to load calculations; Calculating range loads as per the NEC; Calculating residential loads as per the NEC; Calculating multi-family dwelling loads as per the NEC.

# The ILS Bermuda College Partnership

A programme designed specifically for Bermuda College students to gain direct exposure to Bermuda's insurance, reinsurance and ILS industries.

“ The ILS Bermuda College Programme completely changed my life. By participating in the programme, I was able to learn extensively about the reinsurance industry, network with professionals, and secure two summer internships. The experiences I gained were invaluable and culminated in me receiving two scholarships that have entirely funded the remainder of my university education overseas. I would highly recommend the ILS Bermuda College Programme to anyone that is considering joining. ”

*Nicholas Heston Kessell, 2022 – 2023 ILS Bermuda College Programme member*

PHOTOS: WWW.ILSBERMUDA

ILS Bermuda has partnered with Bermuda College since 2017 to provide access to Bermuda College students to the ILS Convergence Conference held in October each year. Over the last few years, this initiative has grown to a more comprehensive offering that seeks to provide Bermuda College students with a full-year programme which runs parallel to students' academic programmes. The programme seeks to be complementary to students' academic programme by offering both practical, real-world engagement with the insurance, reinsurance and insurance-linked securities (ILS) sectors and provides multiple networking opportunities designed to help students begin careers in these sectors.

Participating students will be introduced to the ILS market as an innovative and growing segment within the insurance and reinsurance industry. Members of the international business community will provide lectures on innovative and alternative re/insurance products that are designed to respond to natural catastrophe risk and other specialty risks like cyber risk.

Key elements of the full-year programme include:

**Attending the ILS Convergence Conference** - Students will attend the annual ILS Bermuda Convergence Conference at the Hamilton Princess October 7th to 9th 2024, enjoying an opportunity to learn more about ILS and reinsurance by attending panel sessions and

through support from industry mentors available for guidance and questions. Students are also encouraged to participate in social events and network with conference attendees, mentors and ILS Bermuda committee members.

**Year-round mentorship** - In addition to the mentors who are assigned to Bermuda College students attending the ILS Convergence Conference to help with the relatively steep learning curve that the conference presents, year-round mentorship is offered to help students in areas such as their career focus, internship choices as well as university selections.

**Resumé building module** - Volunteers from the ILS sector provide a high-level overview of advice designed to enhance the impact of students' resumes followed by break-out sessions where guidance and feedback is provided for all student resúmes.

**Interview practice module** - Similar to the resume building module, this module provides a general overview of do's and don'ts for interviews that students are then encouraged to practice through two one-on-one mock interviews with industry practitioners in areas of their industry interest such as underwriting, accounting and actuarial.

**Scholarship and internship application module** - This module provides a general overview of do's and don'ts, and tips and tricks for applying for scholar-

ships and internships that aims to help students maximise their chances of a successful application.

**Lunch and Learn module** - Conducted for the first time in 2023, the 'Lunch and Learn' module was conceived based on the questions posed by Bermuda College students at the October 2022 ILS Convergence Conference. Questions included: "What do actuaries actually do?", "What does an ILS investor pitch look like?" and "How are insurance companies structured? What do the teams do, and what are the various roles within a company?". Individual students volunteer and directly arranged nine sessions with industry members while being supported behind the scenes by the ILS Bermuda team as needed.

**Internships** - ILS Bermuda solicits interest for paid summer internships and work-shadow opportunities exclusively for Bermuda College students from ILS and other insurance and reinsurance market participants where students can learn 'hands-on' and gain valuable work experience. Students may apply for these internships which involve an interview and selection process run by the individual participating companies. In 2024 there were six internships exclusively offered to Bermuda College students by five organisations in the (re)insurance and ILS space.

**Advanced Generative AI and Prompt Engineering for Industry Applications**

**TDS 1245**

Take your knowledge of generative AI to the next level with this advanced course designed for professionals seeking to specialise in AI-driven solutions across industries. Building on foundational skills, this course will focus on advanced prompt engineering, workflow automation, and the customisation of AI models for specific business needs. You'll gain hands-on experience with both ChatGPT and Microsoft Copilot, learning how to leverage the strengths of each tool to optimise business processes, generate insights, and create tailored AI applications.

Throughout five weeks of in-depth sessions, you'll explore how to refine prompts for precision, integrate generative AI models into existing workflows via APIs, and automate complex business functions with Copilot. You will also delve into data analysis techniques, develop custom AI models, and address ethical considerations such as bias and data privacy.

This course culminates in a final project where you'll design an AI solution tailored to a specific industry, which you will pitch and present in the last session. Graduates will leave with a strong portfolio of work, demonstrating advanced skills in AI implementation and strategic AI project management, making them highly competitive in this rapidly evolving field.

#### ICA SHORT COURSES

##### ICA Demystifying Environmental, Social and Governance (ESG)

TDS ICA41

Environmental, Social and Governance (ESG) is a set of principles that assist a firm in becoming socially responsible. Applied across a number of industries, its popularity has grown rapidly, with an ESG framework now considered essential for many businesses.

Embedding ESG in your organisation helps identify risks and opportunities, maintain regulatory compliance, gain the trust of stakeholders, invite investment and attract and retain talent.

This timely short course, written by subject matter experts, will help you to:

- understand ESG and its importance globally;
- apply key lessons learned from those firms neglecting ESG;
- identify where ESG fits within your organisation; and
- develop best practice to promote strong ESG engagement.

## A CYBER-ATTACK CAN BE DEVASTATING

WHETHER FROM VIRUS THREATS, BOTNETS, WORMS OR TROJANS!

### SOLUTION!

**Four, day-long sessions, online,  
between September and December**

The Cyber Foundations course at the Athora Division of PACE covers current Internet threat trends, the impact on organisational security, compliance requirements, and provides hands-on experience in a controlled environment.

### Cyber Foundations TDS 9701

Monday - Friday • 8:30AM-4:30PM

In this cybersecurity course, you will gain a global perspective of the challenges of designing a secure system, touching on all the cyber roles needed to provide a cohesive security solution. Through lectures, labs, and breakout discussion groups, you will learn about current threat trends across the Internet and their impact on organisational security. You will review standard cybersecurity terminology and compliance requirements, examine sample exploits, and gain hands-on experience mitigating controls. In a contained lab environment, you will work with live viruses, including botnets, worms, and Trojans.

## ARTICULATION AGREEMENTS AND PARTNERSHIPS

### TRANSFER PATHWAYS AND PARTNERSHIPS

Bermuda College has established over 30 agreements with colleges and universities in Canada, the United Kingdom, the United States of America, and the Caribbean Islands/West Indies. The purpose of these agreements is to formalise the pathways for Bermuda College students to continue their studies abroad. Transfer Credit Agreements facilitate a seamless transfer to baccalaureate programmes for Bermuda College graduates, with completion of the bachelor's degree in just 2 years after completion of the BC Associate's degree. Students are encouraged to make an appointment with the Bermuda College Career & Counselling Centre to ensure that they meet the requirements for transfer to the partner school selected. Visit the Bermuda College website to view the list of schools and to determine whether the proposed course of study is covered by the existing agreements. Information can be found at: [www.college.bm/pathways](http://www.college.bm/pathways)

### TRANSFER PATHWAYS AND ARTICULATION AGREEMENTS

Use our Transfer Pathways web pages to view these partnerships, browse by area of study, and to see the course comparison charts between BC and partner institutions:

Learn more about our Transfer Pathways programme. View a Quick List of partner institutions and transfer programmes from the BC Associate's Degree to the Bachelor's Degree at the partner institution: <https://www.college.bm/pathways>

### ONLINE OPTIONS

**View Options to Earn your Bachelor's Degree Online, without leaving Bermuda**

To meet a growing demand for online study after Bermuda College, we have partnerships with several institutions that will allow the Bermuda College graduate possessing an associate degree to matriculate at institutions abroad from the convenience of their own surroundings. Those partnerships are described in detail at the link, "Online Options."
